Confederate Casualties at Gettysburg Mar 07 2020 This reference book provides information on 24,000 Confederate soldiers killed, wounded, captured or missing at the Battle of Gettysburg. Casualties are listed by state and unit, in many cases with specifics regarding wounds, circumstances of casualty, military service, genealogy and physical descriptions. Detailed casualty statistics are given in tables for each company, battalion and regiment, along with brief organizational information for many units. Appendices cover Confederate and Union hospitals that treated Southern wounded and Federal prisons where captured Confederates were interned after the battle. Original burial locations are provided for many Confederate dead, along with a record of disinterments in 1871 and burial locations in three of the larger cemeteries where remains were reinterred. A complete name index is included.

The Dynamics of Devolution Oct 02 2019 This book is the fifth, and final, volume in the State of the Nations yearbook series on devolution in the UK. This book explores the future of devolution, by examining the new political dynamics devolution has put into play. These concern devolution's operation and also its impact - how devolution has altered politics in the parts of the UK that experience devolution and in the UK as a whole. Chapters examine the key topics in devolution, and examine the interplay between institutional

change and social, economic and political forces (both those that existed before devolution and those brought into being by it). This interplay creates scope for varying forms of change, but what that change means varies from topic to topic. In some cases - such as Wales - institutional issues remain to the fore, while in others - such as Scotland - pressures for institutional change are relatively limited but the devolved institutions create scope for new political factors to come into play.
