Role Development in Professional Nursing Practice Jun 29 2019 Designed for use in sequential professional development courses across the curriculum, Role Development in Professional Nursing Practice covers role development of the professional nurse as it occurs in three developmental stages, moving from the simple to the more complex: Nurse as Individual; Nurse/Client Relationships; and Nurse as Member of the Health Care Team.

Designing Case Studies Mar 31 2022 The authors explore three ways of conducting causal analysis in case studies. They draw on established practices as well as on recent innovations in case study methodology and integrate these insights into coherent approaches. They highlight the core features of each approach and provide advice on each step of the research process.
Lasting Female Educational Leadership Oct 26 2021 Our colleges and universities are being led

in large part by baby boomers who are now in later midlife. Huge numbers of those middle-aged leaders will retire within the next 10 years. While we know that being in later midlife and impending retirement must influence a person in a leadership position at an institution of higher learning, we don't really understand how. This book is based upon an empirical study that linked higher education leadership to one aspect of midlife known as generativity. This psychosocial phenomenon was described by Erik Erikson as a desire that peaks in midlife to leave something for future generations before one dies. Generativity typically manifests itself in the legacy one intends to leave. The author of this book has completed a multiple case study of women who are in later midlife and who hold high-level leadership positions at an institution of higher learning. In this work, she shares more than has ever been known about the nature, antecedents, and support of generativity in the leadership of female higher education leaders in midlife.

The University as Urban Developer: Case Studies and Analysis Dec 28 2021 Integrating topics in urban development, real estate, higher education administration, urban design, and campus landscape architecture, this is the first book to explore the role of the university as developer. Accessible and clearly written, and including contributions from authorities in a wide range of related areas, it offers a rich array of case studies and analyses that clarify the important roles that universities play in the growth and development of cities. The cases describe a host of university practices, community responses, and policy initiatives surrounding university real estate development. Through a careful blending of academic analysis and practical, hands-on administrative and political information, the book charts new ground in the study of the university and the city.

Case Study Methods in Education Jan 17 2021 This four-volume major work collates and contextualises key papers on the use of case study in education. The collection brings together methodological publications and publications which provide exemplars of case study. The methodological material provides both critical analyses of case study and those

which champion its use, offering at the same time a chronological map of the development of case study from its earliest uses to today. Framed by an introductory passage in each volume which seeks to provide a synopsis of the methodological discussion and a commentary on the exemplary material, this set provides for serious students in education original source material to appraise the method together with exemplary sample material to help them plan and organize their case studies. Volume One: Methodological issues around the use of case studies in social science Volume Two: Methodological issues around the use of case studies in education Volume Three: The case study in practice - general issues and specific examples Volume Four: Examples of case studies in education

Research in Organizations Feb 27 2022 Richard A. Swanson and Elwood F. Holton, leading scholars in the field, bring together contributions from more than twenty distinguished researchers from multiple disciplines to provide a comprehensive introductory textbook on organizational research. Designed for use by professors and students in graduate-level programs in business, management, organizational leadership, and human resource development, *Research in Organizations* teaches how to apply a range of methodologies to the study of organizations. This comprehensive guide covers the theoretical foundations of various research methods, shows how to apply those methods in organizational settings, and examines the ethical conduct of research. It provides a holistic perspective, embracing quantitative, qualitative, and mixed-methodology approaches and illuminating them through numerous illustrative examples.

Case Study Research Jan 29 2022 Case Study Research: Principles and Practices aims to provide a general understanding of the case study method as well as specific tools for its successful implementation. These tools can be utilized in all fields where the case study method is prominent, including business, anthropology, communications, economics, education, medicine, political science, social work, and sociology. Topics include the definition of a 'case study,' the strengths and weaknesses of this distinctive method, strategies for choosing cases, an experimental template for understanding research design, and the role of singular observations in case study research. It is argued that a diversity of approaches - experimental, observational, qualitative, quantitative, ethnographic - may be successfully integrated into case study research. This book breaks down traditional boundaries between qualitative and quantitative, experimental and nonexperimental, positivist and interpretivist.

Case Study Designs in Music Therapy Jul 03 2022 This book shows, for the first time, how research and clinical work can creatively complement one another, proving beneficial to both disciplines. Hayman Fire Case Study Aug 24 2021 In 2002 much of the Front Range of the Rocky Mountains in Colorado was rich in dry

vegetation as a result of fire exclusion and the droughty conditions that prevailed in recent years. These dry and heavy fuel loadings were continuous along the South Platte River corridor located between Denver and Colorado Springs on the Front Range. These topographic and fuel conditions combined with a dry and windy weather system centered over eastern Washington to produce ideal burning conditions. The start of the Hayman Fire was timed and located perfectly to take advantage of these conditions resulting in a wildfire run in 1 day of over 60,000 acres and finally impacting over 138,000 acres. The Hayman Fire Case Study, involving more than 60 scientists and professionals from throughout the United States, examined how the fire behaved, the effects of fuel treatments on burn severity, the emissions produced, the ecological (for example, soil, vegetation, animals) effects, the home destruction, postfire rehabilitation activities, and the social and economic issues surrounding the Hayman Fire. The Hayman Fire Case Study revealed much about wildfires and their interactions with both the social and natural environments. As the largest fire in Colorado history it had a profound impact both locally and nationally. The findings of this study will inform both private and public decisions on the management of natural resources and how individuals, communities, and organizations can prepare for wildfire events.

Policy-Oriented Research Impact Assessment (PORIA) case study on the International Food Policy Research Institute (IFPRI) and the Mexican PROGRESA anti-poverty and human resource investment conditional cash transfer program Apr 19 2021 "The objective of this study is to attempt to characterize the influence and impact of IFPRI in relation to the Mexican PROGRESA/Oportunidades anti-poverty and human resource program with its conditional cash transfers (CCT)—conditional on specific investments in education, health, and nutrition. The paper first describes PROGRESA/Oportunidades and estimates of the impact and benefits-to-costs of this program; then discusses the challenges in assessing the influence and impact of IPFRI on and through PROGRESA/Oportunidades; and then presents

the information sources used in this study to attempt to identify the influence and impact of IFPRI on PROGRESA/Oportunidades including interviews with 39 key informants as well as various published and unpublished studies and memos, publications in the popular media and on the internet and press releases and other documents. With this foundation it next explores the apparent influence and impact of IFPRI on PROGRESA/Oportunidades by considering four questions: Was the PROGRESA program design influenced by prior IFPRI research? Why was IFPRI chosen to undertake the initial impact evaluation of PROGRESA? How did the IFPRI evaluation of PROGRESA contribute to the program? Were there spillovers of the IFPRI evaluation of PROGRESA?

Essential Skills for Management Research

Mar 07 2020 This essential text provides an authoritative overview of research methodology for both students and professional researchers in management. Based on course needs and written by expert academics in the field, this core text addresses the practical concerns of students in undertaking research that is relevant to management practice. It places emphasis on the more practical concerns of management researchers, focusing on the detail of developing and applying particular sets of research skills. In addition, the book gives straightforward advice on how to: ·develop a systematic methodology · learn to be a successful writer · acknowledge the individual in the researcher The text develops tangible skills and will be an invaluable guide for management researchers and students at postgraduate and MBA levels.

Research Methodology in Strategy and Management

Case Study Research in Applied Linguistics

May 09 2020 Case studies of individual language learners are a valuable means of illustrating issues connected with learning, using, and in some cases, losing another language. Yet, even though increasing numbers of graduate students and scholars conduct research using case

studies or mix quantitative and qualitative methods, there are no dedicated applied linguistics research methods texts that guide one through the case study process. This book fills that gap. The volume provides an overview of case study methodology and examples of published case studies in applied linguistics, without attempting to be a comprehensive survey of the innumerable case studies that exist. The case studies presented here involve teachers and learners of English and various other languages in North America and other parts of the world. Advice is also given about how to conduct and publish case studies. Case Study Research in Applied Linguistics is designed for students, both undergraduate and graduate, as well as other scholars seeking to understand case study methods and their applications in research on language learners and language users in a variety of contexts. Applied linguists working in other subfields will find the volume useful in their own research and in their supervision and evaluation of others' case studies.

Global Universities and Urban Development: Case Studies and Analysis

Jul 11 2020 The editors of "The University as Urban Developer" now extend that work's groundbreaking analysis of the university's important role in the growth and development of the American city to the global view. Linking the fields of urban development, higher education, and urban design, "Global Universities and Urban Development" covers universities and communities around the world, including Germany, Korea, Scotland, Japan, Mexico, South Africa, Finland - 13 countries in all. The book features contributions from noted urban scholars, campus planners and architects, and university administrators from all the countries represented. They provide a wide-angled perspective of the issues and practices that comprise university real estate development around the globe. A concluding chapter by the editors offers practical evaluations of the many cases and identifies best practices in the field. *Case Studies in Bayesian Statistics* Aug 31 2019 The series of workshops Case Studies in Bayesian Statistics at Carnegie Mellon University is unique in devoting an entire meeting to extended presentation and discussion

of scientific investigations in which statisticians play central roles within integrated, cross-disciplinary teams. The goal has been to elucidate the interplay between Bayesian theory and practice, and thereby identify successful methods and indicate important directions for future research. This volume contains the four invited case studies, with accompanying discussion, and nine contributed papers, from the 4th workshop, which was held September 27-28, 1997. While most of the case studies in this volume come from biomedical research, the reader will also find studies in environmental science and marketing research. Students and teachers of statistics, research statisticians, and investigators from other fields should find a wealth of ideas and methods in this series of case studies.

Conservation in the 21st Century: Gorillas as a Case Study Jan 05 2020 This volume identifies the primary problems faced in conserving wild populations of gorillas throughout Africa, pinpointing new approaches to solving these problems and outlining the increased role that zoos can play in gorilla conservation. It includes the in-depth expertise of field scientists in a variety of disciplines to discuss current conservation threats, novel approaches to conservation, and potential solutions.

Electronic Customer Relationship Management Mar 19 2021 This work offers a state-of-the art survey of information systems research on electronic customer relationship management (eCRM). It provides important new frameworks derived from current cases and applications in this emerging field. Each chapter takes a collaborative approach to eCRM that goes beyond the analytical and operational perspectives most often taken by researchers in the field. Chapters also stress integration with other enterprise information systems. The book is organized in four parts: Part I presents an overview of the role of CRM and eCRM in marketing and supply chain management; Part II

focuses on the organizational success factors behind eCRM implementation; Part III presents cases of eCRM performance enhancement; and Part IV addresses eCRM issues in business-to-consumer commerce.

Case Study Methodology in Business

Logistics Management Apr 07 2020 This book gathers papers presented at the Logistik-Management-Konferenz 2013, which was organized by the VHB Wissenschaftliche Kommission Logistik and held in Bremen, Germany. The papers reflect the current state-of-the-art in logistics and supply chain management, focusing on environmental sustainability in logistics and supply chain network dynamics and control. The target audience primarily consists of researchers and practitioners in the field, but the book may also be beneficial for graduate students.

Supply Chain Governance for Social

Sustainability Nov 02 2019 This PhD thesis approaches the phenomenon of supply chain governance for social sustainability in the ready-made garment industry in Bangladesh. This research is based on a study of eight large multinational corporations (e.g. clothing brands and retailers) and their ready-made garment suppliers. The purpose of this research is to understand how supply chain governance mechanisms and governance structures improve social sustainability performance when stakeholders are engaged. The study identifies four main governance systems, namely, market-based, hierarchical controlbased, collaborative multi-stakeholder-based and relational cross-sectoral-based. These governance systems are employed in the supply chain by the multinational corporations in combination with different stakeholders, such as suppliers, multi-stakeholder-initiatives, and non-government organisations. The study focuses on the challenges faced by the multinational corporations to ensure social sustainability, whilst at the same time, incorporating suppliers'

viewpoints on the consequences of different governance systems for social sustainability. This research shows the choice of governance structures from market-based, hierarchy-based, collaboration-based and relational-based depend on the cost of managing relationships with the stakeholders and potential risks of governance in a given situation. An effective governance structure for a multinational corporation in a particular context is determined by how well the structure supports governance mechanisms to reduce associated transaction risks that results from potential opportunistic behaviour of the suppliers. In this research, it is argued that governance structure provides the platform for practicing a set of governance mechanisms. The study claims that social sustainability governance incorporates three mechanisms with separate outcomes: one consists of buyer-driven control-based mechanisms which include codes of conduct, supplier assessment and monitoring, and supplier training for regular social compliance; the second consists of multi-stakeholder-based governance mechanisms for structural compliance when unexpected problems occur, for example, building collapse, electrical and fire safety risks emerge; and the third comprises cross-sectoral governance mechanisms when the multinational corporations involve with non-government organisations for social development of the garment workers and community by facilitating drinking water, health-hygiene, education, and so on. This thesis contributes to the Sustainable Supply Chain Management literature by expanding knowledge of supply chain governance through bringing an understanding of governance mechanisms, governance structures and stakeholder engagements for social sustainability. As the demand for supply chain governance for social sustainability are growing, this thesis can help responsible corporate sourcing managers to develop a deeper understanding of how supply chain governance can affect social sustainability. Denna doktorsavhandling tar sig an fenomenet leverantörsstyrning för social hållbarhet i klädindustrin i Bangladesh. Forskningen baseras på en studie av åtta stora multinationella företag, tillika återförsäljare av kläder och välkända klädmärken. Syftet med studien är att

förstå hur leverantörsstyrningsmekanismer och styrstrukturer kan förbättra socialt hållbarhetsarbete när flera aktörer är engagerade och samverkar. Resultatet av studien indikerar att multinationella företag de facto engagerar sig med andra aktörer för att förbättra sin förmåga att bedriva socialt hållbarhetsarbete. Studien identifierar fyra olika typer av leverantörsstyrningssystem: ett marknadsbaserat, ett hierarkiskt kontrollbaserat, ett kollaborativt multi-intressentbaserat samt ett relationellt sektorsövergripande system. Dessa styrningssystem tillämpas i leverantörskedjan av de multinationella företagen i samarbete med andra aktörer såsom leverantörer, 'multi-intressentinitiativ' och icke-statliga organisationer. Studien fokuserar dels på de utmaningar som föreligger för de multinationella företagen när det gäller att säkerställa social hållbarhet, dels på hur leverantörer uppfattar konsekvenserna av de olika styrningssystemen för social hållbarhet. Denna forskning visar att valet av styrstruktur, från marknadsbaserad, hierarkibaserad, kollaborativ och relationell är beroende dels av kostnaden för att hantera och upprätthålla relationer med de olika aktörerna, dels av de potentiella riskerna som föreligger i en viss situation. Vad som utgör en effektiv styrstruktur för ett multinationellt företag i en viss given kontext avgörs av hur väl strukturen stödjer styrningsmekanismer för att reducera transaktionsrisker som bottenar i ett potentiellt opportunistiskt beteende hos leverantörerna. I denna forskning argumenteras det för att struktur ger en plattform för att tillämpa ett antal styrningsmekanismer. Studien visar att styrning av social hållbarhet omfattar tre typer av mekanismer med olika utgång. En består av köparstyrda styrningsmekanismer som omfattar uppförandekoder, leverantörskontroll och leverantörsutbildning. Den andra består av multi-initiativbaserade styrningsmekanismer av hur det strukturella arbetet för att hantera oväntade problem (t.ex. bygg-, el- och brandsäkerhetsrisker) efterföljs. Det tredje omfattar sektorsövergripande styrningsmekanismer där de multinationella företagen samverkar med lokala icke-statliga organisationer i projekt som syftar till social utveckling (tillgång till rent vatten, hälso- &

utbildningsinsatser, etc.) för fabriksarbetarna och det omgivande samhället. Denna avhandling bidrar till Sustainable Supply Chain Management-litteraturen då den utvidgar kunskapen om leverantörsstyrning för social hållbarhet genom en den ger en ökad förståelse för styrningsmekanismer, styrstrukturer och olika aktörers engagemang för social hållbarhet. I takt med att behovet av leverantörsstyrning för social hållbarhet ökar kan denna avhandling hjälpa ansvariga 'corporate sourcing managers' att utveckla en fördjupad förståelse för hur leverantörsstyrning kan påverka social hållbarhet.

Statistical Methods for Health Care

Research Aug 12 2020 Focusing on the statistical methods most frequently used in the health care literature and featuring numerous charts, graphs, and up-to-date examples from the literature, this text provides a thorough foundation for the statistics portion of nursing and all health care research courses. All Fifth Edition chapters include new examples and new computer printouts using the latest software, SPSS for Windows, Version 12. New material on regression diagnostics has been added.

Case Study Methodology in Higher Education

Feb 04 2020 In higher education, case studies can be utilized to have students put themselves into problems faced by a protagonist and, by doing so, address academic or career-related issues. Working through these issues provides students with an opportunity to gain applied perspective and experiences. Professors in higher education who choose this method of teaching require navigational tools to ensure that students achieve stated learning objectives. Case Study Methodology in Higher Education is an essential research publication that focuses on the history and theories relating to case study methodology including techniques for writing case studies and utilizing them in university settings to prepare students for real-life career-related scenarios. This publication features a wide range of topics such as educational leadership, case writing, and teacher education. It is essential for educators, career professionals, higher education faculty, researchers, and students.

Contemporary Bohemia: A Case Study of an Artistic Community in Philadelphia

Jul 23 2021

This book presents an investigation and assessment of an artistic community that emerged within Philadelphia's Fishtown and the nearby neighborhood of Kensington. The book starts out by examining historical and sociological work on bohemia, and then provides a detailed history of greater Philadelphia and the Fishtown/Kensington region. After analyzing the ways in which Fishtown/Kensington's artistic community maintains continuity with bohemian tradition, it demonstrates that this community has decoupled traditional bohemian practices from their anti-bourgeois foundation. The book also demonstrates that this community helped generate and maintains overlapping membership with a larger community of hipsters. It concludes by defining the area's artistic community as an artistic bohemian lifestyle community, and argues that the artistic activities and cultural practices exhibited by the community are not unique, and have significant implications for urban artistic policy, and for post-industrial urban society.

Encyclopedia of Case Study Research Sep 24

2021 This is the authoritative reference work in the field. An interdisciplinary set, it investigates the extensive history, design and methods of case study research.

Case Study Research Nov 26 2021 Providing a complete portal to the world of case study research, the Fourth Edition of Robert K. Yin's bestselling text Case Study Research offers comprehensive coverage of the design and use of the case study method as a valid research tool. This thoroughly revised text now covers more than 50 case studies (approximately 25% new), gives fresh attention to quantitative analyses, discusses more fully the use of mixed methods research designs, and includes new methodological insights. The book's coverage of case study research and how it is applied in practice gives readers access to exemplary case studies drawn from a wide variety of academic and applied fields. Key Features of the Fourth Edition Highlights each specific research feature through 44 boxed vignettes that feature previously published case studies Provides methodological insights to show the similarities between case studies and other social science methods Suggests a three-stage approach to help readers define the initial questions they will

consider in their own case study research Covers new material on human subjects protection, the role of Institutional Review Boards, and the interplay between obtaining IRB approval and the final development of the case study protocol and conduct of a pilot case Includes an overall graphic of the entire case study research process at the beginning of the book, then highlights the steps in the process through graphics that appear at the outset of all the chapters that follow Offers in-text learning aids including “tips” that pose key questions and answers at the beginning of each chapter, practical exercises, endnotes, and a new cross-referencing table Case Study Research, Fourth Edition is ideal for courses in departments of Education, Business and Management, Nursing and Public Health, Public Administration, Anthropology, Sociology, and Political Science.

Index Medicus Oct 14 2020

Research Methodologies in Supply Chain Management May 21 2021 For research in all subjects and among different philosophical paradigms, research methodologies form one of the key issues to rely on. This volume brings a series of papers together, which present different research methodologies as applied in supply chain management. This comprises review oriented papers that look at what kind of methodologies have been applied, as well as methodological papers discussing new developments needed to successfully conduct research in supply chain management. The third group is made up of applications of the respective methodologies, which serve as examples on how the different methodological approaches can be applied. All papers have undergone a review process to ensure their quality. Therefore, we hope that this book will serve as a valid source for current and future researchers in the field. While the workshop on “Research Methodologies in Supply Chain Management” took place at the Supply Chain Management Center, Carl von Ossietzky University in Oldenburg, Germany, it is based on a collaboration with the Supply Chain Management Group of the Department of Operations Management at the Copenhagen Business School and the Department of Production Management at the Vienna University of Economics and Business

Administration. We would like to thank all those who contributed to the workshop and this book. **Case Studies in Ethics and HIV Research** Jun 09 2020 This important work takes as its subject one of medicine’s most pressing arenas of ethical debate. There has been a consistent interest in ethical issues arising in the context of HIV research. Ongoing international and multi-site studies and the continuing search for an HIV vaccine continue to prompt examination of how this research is conducted. Also examined are how participants are engaged in the studies and the obligations of the researchers to individual participants and their communities during the course of and following the conclusion of the research. Each chapter of this book is authored primarily by one of the editors (secondarily by the other) and is accompanied by one to two case studies.

Statistical Analysis with Missing Data Feb 15 2021 An up-to-date, comprehensive treatment of a classic text on missing data in statistics The topic of missing data has gained considerable attention in recent decades. This new edition by two acknowledged experts on the subject offers an up-to-date account of practical methodology for handling missing data problems. Blending theory and application, authors Roderick Little and Donald Rubin review historical approaches to the subject and describe simple methods for multivariate analysis with missing values. They then provide a coherent theory for analysis of problems based on likelihoods derived from statistical models for the data and the missing data mechanism, and then they apply the theory to a wide range of important missing data problems. Statistical Analysis with Missing Data, Third Edition starts by introducing readers to the subject and approaches toward solving it. It looks at the patterns and mechanisms that create the missing data, as well as a taxonomy of missing data. It then goes on to examine missing data in experiments, before discussing complete-case and available-case analysis, including weighting methods. The new edition expands its coverage to include recent work on topics such as nonresponse in sample surveys, causal inference, diagnostic methods, and sensitivity analysis, among a host of other topics. An updated “classic” written by renowned authorities on the subject Features over 150

exercises (including many new ones) Covers recent work on important methods like multiple imputation, robust alternatives to weighting, and Bayesian methods Revises previous topics based on past student feedback and class experience Contains an updated and expanded bibliography The authors were awarded The Karl Pearson Prize in 2017 by the International Statistical Institute, for a research contribution that has had profound influence on statistical theory, methodology or applications. Their work "has been no less than defining and transforming." (ISI) Statistical Analysis with Missing Data, Third Edition is an ideal textbook for upper undergraduate and/or beginning graduate level students of the subject. It is also an excellent source of information for applied statisticians and practitioners in government and industry.

Rethinking the Case Study in International Business and Management Research

Jun 21 2021 This important and original book places the case study in international business research in its historical context, critically evaluates current case study practices in the field and proposes a more pluralistic future for case research within international business and international management research. While the case study is the most popular qualitative research strategy in the field, only a narrow selection of possible approaches is currently used. IB and IM researchers typically rely on a case study approach that could be characterized as 'qualitative positivism'. The editors and contributors look beyond this disciplinary convention and encourage greater pluralism in IB and IM case research. Their key argument is that increased awareness of prevailing disciplinary conventions - and their limitations - increases the potential for methodological innovation and versatility in case research. The contributions provide critical, novel and innovative perspectives on the case study in IB and IM research. The book offers inspiration to case authors and an authoritative methodological reference for those publishing and reviewing case research. It will also be highly regarded by postgraduate and doctoral students in IB and IM as well as both qualitative and quantitative researchers in the field.

Doing Case Study Research Dec 16 2020

Reflecting recent knowledge and developments

in the field, this very practical, easy-to-use guide emphasizes learning how to do case study research—from the first step of deciding whether a case study is the way to go to the last step of verifying and confirming findings before disseminating them. The authors show students how to determine an appropriate research design, conduct informative interviews, record observations, document analyses, delineate ways to confirm case study findings, describe methods for deriving meaning from data, and communicate their findings. Featuring many new examples, the Third Edition offers step-by-step guidance to help beginning researchers through the stages of planning and implementing a thesis, dissertation, or independent project. This succinct "how-to" guide is an excellent place for anyone to begin doing case study research. Book Features: Straightforward introduction to the science of doing case study research. A step-by-step approach that speaks directly to the novice investigator. Many concrete examples to illustrate key concepts. Questions, illustrations, and activities to reinforce what has been learned.

[Software Product-Family Engineering](#) Oct 02 2019 This book contains the proceedings of the 5th International Workshop on Product Family Engineering, PFE-5. This workshop was held in Siena, Italy, November 4–6, 2003. This workshop was the fifth in the series, with the same subject, software product family engineering. These workshops have been held initially irregularly about every 18 months since 1996. Since 1999 the workshop has been held every second year in the fall. The proceedings of the second, third and fourth workshops were published as Springer LNCS volumes 1429, 1951 and 2290. The workshops were organized within co-operation projects of European industry. The first two were organized by ARES (Esprit IV

20.477) 1995–1999; this project had 3 industrial and 3 academic partners, and studied software architectures for product families. Some of the partners continued in the ITEA project if99005 ESAPS (1999–2001). ITEA is the software development programme (?! 2023) within the European Eureka initiative. ITEA projects last for 2 years, and ESAPS was succeeded by CAFÉ (ITEA if00004) for 2001–2003 and FAMILIES (ITEA if02009). This fifth workshop was initially prepared within CAFÉ and the preparation continued in FAMILIES. As usual Henk Obbink was the workshop chair, and Linda Northrop and Sergio Bandinelli were the co-chairs.
