***The Antarctic Environmental Protocol and Its Domestic Legal Implementation* Dec 04 2019** A major step towards the comprehensive protection of the Antarctic environment is the adoption of the Protocol on Environmental Protection to the Antarctic Treaty in 1991. The Protocol entered into force in January 1998 and provides a comprehensive system of obligations and prohibitions addressing most types of activities in the region south of 60 degrees south latitude. However, because of the absence of undisputed sovereignty in Antarctica, the legal protection of the Antarctic environment depends on the collective efforts of the Contracting Parties to the Protocol. Have the Contracting Parties adequately incorporated the key provisions of the Protocol into their domestic legal systems? Will the complex of domestic legal systems of the Contracting Parties adequately ensure a 'comprehensive protection' of the 'natural reserve' of Antarctica, as specified by Article 2 of the Protocol? These questions are the subject of this book.

Chemical Mixtures and Combined Chemical and Nonchemical Stressors Jan 05 2020 In this book, both basic and advanced concepts are discussed for considering mixtures from initial exposure characterization through evaluation of risk

associated with combined exposures. This book will provide an introduction to key issues and multiple options for evaluating both the toxicity of mixtures as well as the risk associated with exposure to mixtures. Additionally, promising tools adapted from other disciplines will be discussed in the context of mixtures toxicology and risk assessment. Finally, the discussion will move beyond chemical mixtures to address incorporating non-chemical stressors into toxicity studies and cumulative risk assessments. Although exposure to multiple chemical and non-chemical stressors is the rule, not the exception, consideration of mixtures in toxicology and risk assessment continues to be a significant challenge. This book will be an essential resource for researchers and professionals in the fields of toxicology, epidemiology, exposure science, risk assessment, and statistics.
