**Greek to GCSE: Part 1** Sep 06 2022 First written in response to a JACT survey of over 100 schools, and now endorsed by OCR, this textbook has become a standard resource for students in the UK and for readers across the world who are looking for a clear and thorough introduction to the language of the ancient Greeks. Revised throughout and enhanced by coloured artwork and text features, this edition will support the new OCR specification for Classical Greek (first teaching 2016). Part 1 covers the basics and is self-contained, with its own reference section. It covers the main declensions, a range of active tenses and a vocabulary of 250 Greek words to be learned. Pupil confidence is built up by constant consolidation of the material covered. After the preliminaries, each chapter concentrates on stories with one source or subject: Aesop, Homer's Odyssey and Alexander the Great, providing an excellent introduction to Greek culture alongside the language study. Written by a long-time school teacher and examiner, this two-part course is based on experience of what pupils find difficult, concentrating on the essentials and on the understanding of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is reduced. It aims to be user-friendly, but also to give pupils a firm foundation for further study.

**Agency, Contingency and Census Process** Feb 16 2021 The Indigenous Enumeration Strategy (IES) of the Australian National Census of Population and Housing has evolved over the years in response to the perceived 'difference' of the Aboriginal and Torres Strait Islander populations. Its defining characteristics are the use of locally recruited, mostly Indigenous collector interviewers, and the administration of a modified collection instrument in discrete Indigenous communities, mostly in remote Australia. The research reported here is unique. The authors, with the assistance of the Australian Bureau of Statistics, were able to follow the workings of the IES in the 2006 Census from the design of the collection instrument to the training of temporary census field staff at the Northern Territory's Census Management Unit in Darwin, to the enumeration in four remote locations, through to the processing stage at the Data Processing Centre in Melbourne. This allowed the tracking of data from collection to processing, and an assessment of the effects of information flows on the quality of the data, both as input and output. This study of the enumeration involved four very different locations: a group of small outstation communities (Arnhem Land), a large Aboriginal township (Wadeye), an 'open' town with a majority Aboriginal population (Fitzroy Crossing), and the minority Aboriginal population of a major regional centre (Alice Springs). A comparison between these contexts reveals differences that reflect the diversity of remote Aboriginal Australia, but also commonalities that exert a powerful influence on the effectiveness of the IES, in particular very high levels of short-term mobility. The selection of sites also allowed a comparison between the enumeration process in the Northern Territory, where a time-extended rolling count was explicitly planned for, and Western Australia, where a modified form of the standard count had been envisaged. The findings suggest that the IES has reached a point in its development where the injection of ever-increasing resources into essentially the same generic set and structure of activities may be producing diminishing returns. There is a need for a new kind of engagement between the Australian Bureau of Statistics and local government and Indigenous community-sector organisations in remote Australia. The agency and local knowledge of Indigenous people could be harnessed more effectively through an ongoing relationship with such organisations, to better address the complex contingencies confronting the census process in remote Indigenous Australia.

Modern Polygamy and Mormon Fundamentalism Oct 27 2021 2007 Best Book Award, John Whitmer Historical Association Under the subject of alternative lifestyles, the issue of polygamous relationships falls squarely in the middle of the debate. Polygamous marriages are a common practice in many other countries, but the United States has vehemently opposed such unions and will no doubt find itself disputing its position on them again in the near future. As with the same-sex marriage issue, a firestorm of controversy surrounds the question since the right to participate in a polygamous union is very much tied to the right to live out one's preferences, religious or not. Detailed accounts of sexual abuse and child brides are frequently leaked from the various polygamous societies, notwithstanding their extreme efforts to remain under the radar of law enforcement and the press. A by-product of these mysterious societies is that public interest is vitalized by their continuous efforts to gain independence from traditionalist culture. This fascinating study seeks to trace the historical tapestry that is early Mormon polygamy, details the official discontinuation of the practice by the Church, and, for the first time, describes the many zeal-

driven organizations that arose in the wake of that decision. Among the polygamous groups discussed are the LeBaronites, whose "blood atonement" killings sent fear throughout Mormon communities in the late seventies and the eighties; the FLDS Church, which made news recently over its construction of a compound and temple in Texas and Warren Jeffs' arrest and conviction; and the Allred and Kingston groups, two major factions with substantial membership statistics both in and out of the United States. All these fascinating histories, along with those of the smaller independent groups, are examined and explained in a way that all can appreciate.
