**Sustainable Operations Management Mar 16 2021** Sustainable Operations Management applies the issues of sustainability to all strategic decisions of operations: capacity management, supply network, process technology, and development and organisation. This book extends the existing literature of operations management that for years has been paramount in creating economic value with little consideration of environment and social dimensions. Whilst based on robust theoretical frameworks, some developed by its own authors, the book is enriched by international case studies and real-world illustrations throughout, to demonstrate how this theory translates to practice. Each chapter begins with learning objectives and ends with a summary, activity, and questions for discussion. Readers will gain a comprehensive and in-depth knowledge on how to manage operations for sustainability. They will learn the ways to formulate a sustainable operations strategy and the elements involved in managing tactical and operational activities to enhance sustainability performance over time. The book covers all aspects of the new business sustainability paradigm from an operations perspective, including sustainable development goals, the circular economy and digital transformation. With international agreements and national policies in place around themes such as climate change, ocean plastic pollution, loss of biodiversity, water scarcity, and zero landfill targets, this book will be a must for any university abiding to the Principles of Responsible Management Education (PRIME). The text is suitable mostly for MSc and MBA students on sustainable supply chain and operations management modules as well as broader Operations Management courses, but it can also be used for final-year Undergraduate students as part of advanced operations management modules. Online resources include chapter-by-chapter PowerPoint slides and a test bank of questions.

**Industrial Cleaning Technology** Dec 25 2021 The word cleaning covers a wide range of activities from good housekeeping and janitorial duties to clinical process cleaning applications that form part of our everyday lives, most people are not aware of their existence, and yet without them, many of the services and products we take for granted would not be available. Most chapters include case studies of various cleaning problems together with the solutions offered. Emphasis is placed on the practical aspects of designing, manufacturing and operating cleaning equipment, this includes a detailed examination of traditional cleaning methods, and considers a number of lesser known techniques that have been developed over recent years together with a glimpse of the future trends in the industry. In addition to the actual cleaning techniques, the book examines the effect, of increasing international health, safety, training, and environmental legislation together with regulations that control cleaning standards in the pharmaceuticals, cosmetics, food and drinks manufacturing industries. In this respect, the book is not intended to be a definitive reference book. Legislation and regulations are continually being upgraded, particularly those relating to European Directives. No apologies are given for the fact that the reader will be continually reminded of the need to obtain up to date copies of the various documents referred to, and to secure expert advice on those issues that are crucial in terms of health, safety and hazardous conditions. To assist the reader, useful information sources are listed in the reference section following each chapter. jkljk

**International Industrial Networks and Industrial Restructuring in Central and Eastern Europe** Jan 26 2022 International Industrial Networks and Industrial Restructuring in Central and Eastern Europe analyses the role of international industrial networks in industrial restructuring and corporate growth in central Europe, Russia and Ukraine. It shows that two distinct patterns of international industrial integration - domestic vs. foreign led modernisations - have developed in these two regions which have significant effects on patterns of growth and integration of these economies. International Industrial Networks and Industrial Restructuring in Central and Eastern Europe is based on a number of industry and firm case studies which are analysed and interpreted within the current international business and political economy literature. The publication provides valuable insights to managers and policy-makers who are interested in understanding different strategic options for business activity in Central and East European countries. For the academic reader, it offers a new perspective on international, industrial networks in which theories on strategic management and on industry restructuring and corporate growth are merged into a new view of growth and transformation process.

**Änderung der Emissionen limitierter und nicht limitierter Abgaskomponenten durch die Einführung biogener Kraftstoffe als Substitut für fossile Dieselmotoren** Jul 08 2020 Im Buch ist die Entwicklung der Emissionen aus der Verbrennung von Biokraftstoffen über einen Zeitraum von 15 Jahren beschrieben. Dazu wurden am Thünen-Institut für Agrartechnologie in Braunschweig limitierte und nicht limitierte Emissionen an sechs verschiedenen Dieselmotoren bestimmt, die in verschiedenen Abgasklassen bis Euro IV eingestuft waren. Dabei wurden hauptsächlich Motoren untersucht, die in Nutzfahrzeugen oder in landwirtschaftlichen Maschinen Verwendung finden. Als prominentester biogener Kraftstoff wurde Biodiesel aus Raps mit fossilem Dieselmotoren bei allen Versuchsreihen verglichen. Daneben wurden reines Pflanzenöl, hydriertes Pflanzenöl und Fischer-Tropsch-Kraftstoffe sowohl in Reinkraftstoffform als auch in Mischung mit Dieselmotoren untersucht. Im Laufe der Jahre musste die Analysetechnik kontinuierlich an die immer sauberen Verbrennungsabgase angepasst werden. Probenahme und Messtechnik sind beispielhaft in dieser Arbeit beschrieben.
