Making land work May 22 2021 In this report, the Law Commission makes recommendations to simplify, modernise and enhance the law of easements, covenants and profits á prendre. These rights are essential to the effective use of land and are relied upon by a significant proportion of property owners in England and Wales. Parts of the current law are ancient, contradictory and unfit for modern society. The report recommends reform where it is needed, while preserving those aspects of the law that function as they should. The recommendations would not affect the validity and enforceability of existing rights. The reforms would: make it possible for the benefit and burden of positive obligations to be enforced by and against subsequent owners; simplify and make clearer the rules relating to the acquisition of easements by prescription (or long use of land) and implication, as well as the termination of easements by abandonment; give greater flexibility to developers to establish the webs of rights and obligations that allow modern estates to function; facilitate the creation of easements that allow a substantial use of land by the benefiting owner (for example, rights to park a car); expand the jurisdiction of the Lands Chamber of the Upper Tribunal to allow for the discharge and modification of easements and profits created post-reform.

Intact Jan 18 2021 'A must-read for psychotherapists, doctors and everyone else who enjoys connecting ideas' Philippa Perry 'Compassionate and challenging, warmly human and coolly rigorous. . . I am now thinking afresh about how I live in my own body, in a world where, as Clare Chambers argues, nobody's body is ever allowed to be good enough, just as it is' Timandra Harkness What would it take for your body to be good enough? The pressure to change our bodies is overwhelming. We strive to defy ageing, build our biceps, cure our disabilities, conceal our quirks. Surrounded by filtered photos and surgically-enhanced features, we must contort our physical selves to prejudiced standards of beauty. Perfection is impossible, and even an acceptable body seems out of reach. In this mind-expanding book, Cambridge philosopher Clare Chambers argues that the unmodified body is a key political principle. While defending our right to change our bodies, she argues that the social pressures to modify undermine equality. She shows how the connected ideas of the natural body, the normal body, and the whole body have been used both to disrupt and to maintain social hierarchies - sometimes oppressing, other times liberating. The body becomes a site of political importance: a place where hierarchies of sex, gender, race, disability, age, and class are reinforced. Through a thought-provoking analysis of the power dynamics that structure our society, and with examples ranging widely from bodybuilding to breast implants, deafness to male circumcision, Intact stresses that we must break away from the oppressive forces that demand we alter our bodies. Instead, it offers a bold, transformative vision of the human body that is equal without expectation.

This book presents some of the most important modeling and prediction techniques, along with relevant applications. Topics include linear regression, classification, resampling methods, shrinkage approaches, tree-based methods, support vector machines, clustering, and more. Color graphics and real-world examples are used to illustrate the methods presented.
