Medical Anthropology Jul 29 2019 Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

The Trigger Point Therapy Workbook Dec 02 2019 Trigger point therapy is one of the fastest-growing and most effective pain therapies in the world. Medical doctors, chiropractors, physical therapists, and massage therapists are all beginning to use this technique to relieve patients ' formerly undiagnosable muscle and joint pain, both conditions that studies have shown to be the cause of nearly 25 percent of all doctor visits. This book addresses the problem of myofascial trigger points—tiny contraction knots that develop in a muscle when it is injured or overworked. Restricted circulation and lack of oxygen in these points cause referred pain. Massage of the trigger is the safest, most natural, and most effective form of pain therapy. Trigger points create pain throughout the body in predictable patterns characteristic to each muscle, producing discomfort ranging from mild to severe. Trigger point massage increases circulation and oxygenation in the area and often produces instant relief. The Trigger Point Therapy Workbook, Third Edition, has made a huge impact among health professionals and the public alike, becoming an overnight classic in the field of pain relief. This edition includes a new chapter by the now deceased author, Clair Davies ' daughter, Amber Davies, who is passionate about continuing her father 's legacy. The new edition also includes postural assessments and muscle tests, an illustrated index of symptoms, and clinical technique drawings and descriptions to assist both practitioners and regular readers in assessing and treating trigger points. If you have ever suffered from, or have treated someone who suffers from myofascial trigger point pain, this is a must-have book.

Radar Instruction Manual Sep 30 2019 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs
