[Gender Influences](#) Jun 23 2019 DonnaLee Rubin examines the responses of thirty-one freshman composition teachers to student writing and shows the negative effects of gender bias on assessment to prove that gender perceptions and expectations can influence assessment decisions that seem neutral on the surface. Arguing that certain pedagogies are more likely to minimize gender bias than others, Rubin believes that teachers are more likely to overcome the influence of gender bias on their teaching if they adopt a process-based method and work intimately with their students through nondirective, supportive conferences. Rubin characterizes the conference/process-centered class as the type of environment in which maternal teaching can be cultivated. She stresses that maternal can describe any teacher, male or female, who exhibits the nurturing and supportive qualities that the conference/process approach embodies. With a primary focus on the student's well-being and development as a person and a writer, the maternal teacher is in a better position to overcome gender bias that could distort the interpretation of student texts. In order for writing instructors to increase their sensitivity to gender issues in assessment, Rubin recommends that they self-consciously engage in what she calls "responsive reading." Responsive reading occurs when the teacher reads with an eye toward providing the sorts of supportive feedback and dialectic exchange that will encourage student writers to think for themselves and to revise effectively. Rubin argues that when teachers commit to a responsive-reading pedagogy, they are more likely to question their reactions to student writing along the lines of gender influence and to strive for self-conscious awareness of how their own inner male-female voices may distort their reading of student texts. She challenges all writing teachers to become more aware of the inevitable challenge gender influence presents.

Understanding and Evaluating Research Jul 05 2020 Understanding and Evaluating Research: A Critical Guide shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.

The Elements of Reasoning May 03 2020 THE ELEMENTS OF REASONING is a concise and lucid introduction to the basic elements of argumentative prose and the conceptual tools necessary to understand, analyze, criticize, and construct arguments. This text is not only perfect for a college course in argument analysis, but also as a reference tool when confronted with arguments outside the classroom experience. While THE ELEMENTS OF REASONING covers the standard formal tools of introductory logic, its emphasis is on practical applications to the kinds of arguments students most often encounter. Teaching Literacy in Fifth Grade Nov 08 2020 For students, fifth grade is a time of increasing independence and responsibility. Yet fifth-graders vary widely in their reading and writing abilities--and they are still young enough to require considerable teacher support. Depicting an exemplary teacher in action, this indispensable book presents innovative, practical strategies for creating an organized, motivating, and literacy-rich fifth-grade classroom. The authors show how to assess student needs and implement standards-based instruction that targets comprehension, vocabulary, writing, genre study, and other crucial areas. Grounded in current best practices, the book includes helpful planning tips, illustrations, and reproducibles.

Writers at Work: The Essay Student's Book Apr 13 2021 Following on from Writers at Work: The Paragraph and Writers at Work: The Short Composition, Writers at Work: The Essay will teach the basics of academic essay writing to intermediate-level students. In Writers at Work: The Essay, college and university students use the process approach to write different genres of essays common at the post-secondary level, the most important being expository writing, persuasive writing, and timed essay exams. Each chapter uses the same five-step approach to writing that is used in the two lower-level books. In each chapter, students analyze a model essay, noticing key organizational and linguistic features; brainstorm ideas; write multiple drafts; revise their work; engage in peer reviews; and share their finished work. Chapters recycle and build upon previously taught material.

Reconceptualizing the Literacies in Adolescents' Lives Sep 26 2019 Reconceptualizing the Literacies in Adolescents' Lives, Second Edition focuses on exploring the impact of young people's identity-making practices in mediating their perceptions of themselves as readers and writers in an era of externally mandated reforms. What is different in the Second Edition is its emphasis on the importance of valuing adolescents' perspectives--in an era of skyrocketing interest in improving literacy instruction at the middle and high school levels driven by externally mandated reforms and accountability measures. A central concern is the degree to which this new interest takes into account adolescents' personal, social, and cultural experiences in relation to literacy learning. In this new edition of Reconceptualizing the Literacies in Adolescents' Lives students' voices and perspectives are featured front and center in every chapter. Particular attention is given throughout to multiple literacies--especially how information and new communication technologies are changing learning from and with text. Nine of the 15 chapters are new; all other chapters are thoroughly updated. The volume is structured around four main themes: * Situating Adolescents' Literacies--addressing how young people use favorite texts to perform their identities; how they counter school-based constructions of incompetence; and how they re/construct their literate identities in relation to certain kinds of gendered expectations, pedagogies, and cultural resources; * Positioning Youth as Readers and Writers--stressing the importance of classroom discourse, cultural capital, agency, and democratic citizenship in mediating adolescents' literate identities; * Mediating Practices in Young People's Literacies--looking at issues of language, social class, race, and culture in shaping how adolescents represent themselves and are represented by others; and * Changing Teachers, Teaching Changes--capturing the productive ambiguities associated with teaching urban adolescents to read and write in changing times, encouraging students to conduct action research on topics that are personally relevant, and using 'enabling constraints' as a concept to formulate policies on adolescent literacy instruction. Reconceptualizing the Literacies in Adolescents' Lives, Second Edition is an essential volume for researchers, faculty, teacher educators, and graduate students in the field of adolescent literacy education.

The International Student's Guide to Writing a Research Paper Aug 18 2021 The International Student's Guide to Writing a Research Paper is a reference text for undergraduate students and those in ESL or bridge courses who are writing a research paper for the first time. This book is partly an update of *Writing a Research Paper* (by Lionel Menasche, 1998) and partly a companion to *The ESL Writer's Handbook*. Each section of the book includes a discrete task called a Building Block, which requires students to apply the skills learned toward the development of their own paper. This step-by-step approach allows students to construct knowledge as they become more familiar with the process, making writing a research paper a less intimidating task. Special features: This guide uses simple direct language for those for whom writing a research paper is new. Most example writing is from international students in an ESL program or first-year writing class, including two sample papers—one in APA and one in MLA. A section on responding to instructor feedback to provide students with the tools to read and understand comments and use them to improve the first draft. A subsection dedicated to constructing clear and cohesive paragraphs and sentences. The guide includes citation and style examples in MLA 8th edition.

Empirical Methods for Evaluating Educational Interventions Jul 17 2021 New US government requirements state that federally funded grants and school programs must prove that they are based on scientifically proved improvements in teaching and learning. All new grants must show they are based on scientifically sound research to be funded, and budgets to schools must likewise show that they are based on scientifically sound research. However, the movement in education over the past several years has been toward qualitative rather than quantitative measures. The new legislation comes at a time when researchers are ill trained to measure results or even to frame questions in an empirical way, and when school administrators and teachers are no longer remember or were never trained to prove statistically that their programs are effective. *Experimental Methods for Evaluating Educational Interventions* is a tutorial on what it means to frame a question in an empirical manner, how one needs to test that a method works, what statistics one uses to measure effectiveness, and how to document these findings in a way so as to be compliant with new empirically based requirements. The book is simplistic enough to be accessible to those teaching and administrative educational professionals long out of schooling, but comprehensive and sophisticated enough to be of use to researchers who know experimental design and statistics but don't know how to use what they know to write acceptable grant proposals or to get governmental funding for their programs. * Provides an overview to interpreting empirical data in education * Reviews data analysis techniques: use and interpretation * Discusses research on learning, instruction, and curriculum * Explores importance of showing progress as well as cause and effect * Identifies obstacles to applying research into practice * Examines policy development for states, nations, and countries

Landmark Essays on ESL Writing Sep 18 2021 In recent years, the number of nonnative speakers of English in colleges and universities in North America has increased dramatically. As a result, more and more writing teachers have found themselves working with these English as a Second Language (ESL) students in writing classes that are designed primarily with monolingual, native-English-speaking students in mind. Since the majority of institutions require these students to enroll in writing courses at all levels, it is becoming increasingly important for all writing teachers to be aware of the presence and special linguistic and cultural needs of ESL writers. This increase in the ESL population has, over the last 40 years, been paralleled by a similar growth in research on ESL writing and writing instruction--research that writing teachers need to be familiar with in order to work effectively with ESL writers in writing classrooms of all levels and types. Until recently, however, this body of knowledge has not been very accessible to writing teachers and researchers who do not specialize in second language research and instruction. This volume is an attempt to remedy this problem by providing a sense of how ESL writing scholarship has evolved over the last four decades. It brings together 15 articles that address various issues in second language writing in general and ESL writing in particular. In selecting articles for inclusion, the editors tried to take a principled approach. The articles included in this volume have been chosen from a large database of publications in second language writing. The editors looked for works that mirrored the state of the art when they were published and made a conscious effort to represent a wide variety of perspectives, contributions, and issues in the field. To provide a sense of the evolution of the field, this collection is arranged in chronological order.

The NPEC Sourcebook on Assessment: Definitions and assessment methods for critical thinking, problem solving, and writing Nov 28 2019 Volume 1 of this sourcebook is a compendium of information about tests used to assess critical thinking, problem solving, and writing. It serves as a tool for people who want comparative data about the policy relevance of specific student outcomes measured in these areas. An interactive version of Volume 1 allows users to specify their areas of interest and create a customized search of assessment measures in the three domain areas. The tests described in Volume 1 are those that are designed to measure cognitive variables for traditional students. The compendium does not describe less traditional methods such as portfolios and competencies. In addition, the evaluations of the tests are based on the way test developers represent them in their materials and, in some cases, in information from third-party reviews. Volume 2 is a companion volume that provides eight case studies of institutions that have addressed related issues through the use of assessment methods in Volume 1. Volume 1 contains the following sections: (1) "General and Specific Issues in Selecting Assessments"; (2) "Critical Thinking and Problem Solving"; (3) "Templates--Critical Thinking and Problem Solving"; (4) "Writing"; (5) "Templates--Writing Commercially Developed Tests"; and (6) "Templates--Writing Locally Developed Tests." Volume 2 discusses the eight case studies and contains four appendixes providing details about the methodology. (Volume 1 contains 10 tables and 150 references.) (SLD)

Metacognition, Strategy Use, and Instruction Aug 06 2020 Showcasing exemplary research programs, this book explores how the latest theories and findings on cognitive development can be used to improve classroom instruction. The focus is on how children acquire knowledge about the processes involved in learning—such as remembering, thinking, and problem solving—as well as strategies for mastering new information. The contributors are leading experts who illustrate ways teachers can support the development of metacognition and goal-directed strategy use throughout the school years and in different academic domains. Teacher behaviors and instructional methods that promote these abilities are identified, and innovative assessment approaches and research designs are described.
