A Shocker on Shock Street Apr 29 2022 Erin Wright and her best friend, Marty, love horror movies. Especially Shocker on Shock Street movies. All kinds of scary creatures live on Shock Street. The Toadinator. Ape Face. The Mad Mangler. But when Erin and Marty visit the new Shocker Studio Theme Park, they get the scare of their lives. First their tram gets stuck in The Cave of the Living Creeps. Then they're attacked by a group of enormous praying mantises! Real life is a whole lot scarier than the movies. But Shock Street isn't really real. Is it?

Schools that Work Oct 12 2020 At a time when so many pivotal education issues are closely tied to the performance of schools and NCLB policy, Schools That Work provides critical insight into elementary schools and how these must change if they are to meet the increased demands of education for the 21st century. In response to the increased pressure on teachers to develop high levels of reading and writing proficiency for ALL students, renowned authors Dick Allington and Pat Cunningham continue their commitment to foster expert teaching in every classroom. The Third Edition of Schools That Work builds from this emphasis on developing the expertise of classroom teachers to a dynamic analysis of systematic school reform that encompasses virtually all areas of elementary school organization and planning. With its goal of turning readers into educated, informed decision-makers, Allington and Cunningham provide a clear and concise introduction that offers a strong focus on the basic theories of school reform and includes an organizational framework to accomplish this goal. Often praised as the most accessible, readable and practical book, while grounded in proven practices and current research, Schools That Work describes the critical features of school organization plans at the elementary level (e.g., professional roles, organization of time, curriculum, student assessment, professional development, and parental involvement) that can support or impede developing more effective educational settings. Perfect for those who are preparing to be elementary principals, those serving on elementary school leadership teams and those preparing to be reading supervisors, reading coaches, reading specialists, and elementary education supervisors.

Landslides - Disaster Risk Reduction Jun 07 2020 This book documents the First World Landslide Forum, which was jointly organized by the International Consortium on Landslides (ICL), eight UN organizations (UNESCO, WMO, FAO, UN/ISDR, UNU, UNEP, World Bank, UNDP) and four NGOs (International Council for Science, World Federation of Engineering Organizations, Kyoto Univ. and Japan Landslide Society) in Tokyo in 2008. The material consists of four parts: The Open Forum "Progress of IPL Activities; Four Thematic Lectures in the Plenary Symposium "Global Landslide Risk Reduction"; Six Keynote Lectures in the Plenary session; and the aims and overviews of eighteen parallel sessions (dealing with various aspects necessary for landslide disaster risk reduction such as: observations from space; climate change and slope instability; landslides threatening heritage sites; the economic and social impact of landslides; monitoring, prediction and early warning; and risk-management strategies in urban area, etc.) Thus it enables the reader to benefit from a wide range of research intended to reduce risk due to landslide disasters as presented in the first global multi-disciplinary meeting.

Kokota Grammar Mar 29 2022 This work describes the grammar of Kokota, a highly endangered Oceanic language of the Solomon Islands, spoken by about nine hundred people on the island of Santa Isabel. After several long periods among the Kokota, Dr. Palmer has written an unusually detailed and comprehensive description of the language. Kokota has never before been described, so this work makes an important contribution to

our knowledge of the Oceanic languages of island Melanesia. Kokota Grammar examines the phonology of the language and includes a lengthy section on stress assignment. It continues with chapters on nouns and noun phrases, minor participant types, possession, argument structure, the verb complex, clause structure, imperative and interrogative constructions, and subordination and coordination (including verb serialization). The typological interest of Kokota, along with its degree of endangerment and the paucity of information on Northwest Solomonian languages in general, combined with the level of detail given in the volume, make this a work of considerable interest to Austronesian linguists, typologists, syntacticians, phonologists, and all who are involved in describing and documenting endangered languages.
