**ECCWS2016-Proceedings fo the 15th European Conference on Cyber Warfare and Security "** Dec 05 2019 These proceedings represent the work of researchers participating in the 15th European Conference on Cyber Warfare and Security (ECCWS 2016) which is being hosted this year by the Universitat der Bundeswehr, Munich, Germany on the 7-8 July 2016. ECCWS is a recognised event on the International research conferences calendar and provides a valuable plat-form for individuals to present their research findings, display their work in progress and discuss conceptual and empirical advances in the area of Cyberwar and Cyber Security. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and ex-panding range of Cyberwar and Cyber Security research available to them. With an initial submission of 110 abstracts, after the double blind, peer review process there are 37 Academic research papers and 11 PhD research papers, 1 Master's research paper, 2 Work In Progress papers and 2 non-academic papers published in these Conference Proceedings. These papers come from many different coun-tries including Austria, Belgium, Canada, Czech Republic, Finland, France, Germany, Greece, Hungary, Ireland, Kenya, Luxembourg, Netherlands, Norway, Portugal, Romania, Russia, Slovenia, South Africa, Sweden, Turkey, UK and USA. This is not only highlighting the international character of the conference, but is also promising very interesting discussions based on the broad treasure trove of experience of our community and partici-pants."

**News Media Innovation Reconsidered** Jun 10 2020 A guide to journalistic ethics for today's digital technologies With contributions from an international panel of experts on the topic, News Media Innovation Reconsidered offers a guide for the revitalizing of the ethical and civil ideals of journalism. The authors discuss how to energize journalistic practices and products and explore how to harness the power of digital technological innovations such as immersive journalism, the automatization and personalization of news, newsgames, and artificial-intelligence news production. The book presents an innovative framework of "creative reconstruction" and reviews new journalistic concepts, models, initiatives, and practices that clearly demonstrate professional ethics that embrace truth seeking, transparency, fact checking, and accuracy, and other ethical considerations. While the contributors represent numerous countries, many of examples are drawn from the Spanish-speaking media and can serve as models for an international audience. This important book: Explores the impact on the news media from mobile-first, virtual reality, and artificial intelligence-driven platforms Examines the challenges of maintaining journalistic ethics in today's digital world Demonstrates how to use technology to expose readers to news outside their comfort zones Provides information for discerning truth from fake news Written for researchers, students in journalism and communication programs, New Media Innovation Reconsidered offers a much-needed guide for recreating journalistic ethics in our digital age.

**Highways to the End of the World** Feb 05 2020 This book argues that road-building was naturalised in the twentieth century to the point of common sense, integrating roadbuilding into a system of climate change denial hidden within a broad international development imperative. But if we can 'read' South Asian roads as forms of governance and knowledge, we can challenge the region's established geopolitical

narratives, and the idea of a never-ending future. *Highways to the End of the World* explores the political economy of these ideas by focusing on the history of this phenomenon, and on the road-builders of South Asia themselves. How do these flamboyant and controversial 'roadmen' think about their work and the future of the planet? What do roads do, and why? And how did they become central to the region's nationalist and developmental projects in the first place? Simpson's fascinating ethnographic account takes us from fume-filled toll booths in the heart of India, via overworked government offices in Pakistan, to pharaonic bridges in the Indian Ocean. Simpson follows the money, explores the politics of evidence, and argues against the utopian hyperbole of present-day 'road talk', finding both humanitarian crises and freewheeling international capital in the hedgerows. Roads have never been so interesting, or so controversial.

**One Currency, Two Europes** Nov 03 2019 The aftermath of the US subprime mortgage crisis in 2008 saw its influence spread around the world, including Europe. The European crisis turned out to be longer, deeper and more resilient than anticipated. An unexpected consequence was the increasingly divergent economic and financial situation of two main groups of countries within the Eurozone, which includes the countries that adopt the euro as their common currency. The divergence was caused by a number of factors, fundamentally stemming from the dissimilar economic and financial situation of its member countries and from the incomplete institutional architecture and the monetary and fiscal policies in the Eurozone. *One Currency, Two Europes: Towards a Dual Eurozone* seeks to explore these factors which give rise to the Eurozone's asymmetric composition and the growing difficulties and ineffectiveness that policies meet. It presents evidence to show how the presently incomplete institutional architecture of the Eurozone is the main reason for the extreme detrimental effects of the international crisis and austerity policies, along with the asymmetric economic situation and the insufficient mutual trust demonstrated by the vulnerable as well as resilient countries. Other than presenting a complete overview and analysis of the events that unfolded in the Eurozone as a result of the financial crisis that first emerged in the US, this book also suggests possible solutions which could help to reunify the Eurozone, and make the common currency sustainable and beneficial for all member countries. *One Currency, Two Europes* will be useful for policymakers who want to learn from the Eurozone's experience with the financial crisis and the importance of complete institutional architectures and inter-country economic convergence. It will also serve as a reference to students and researchers who would like more in-depth analysis of the crisis and the Eurozone's fiscal, monetary and institutional past, present, and future. *ICCSM2014-Proceedings of the International Conference on Cloud Security Management ICCSM-2014* Sep 25 2021 These Proceedings are the work of researchers contributing to the 2nd International Conference on Cloud Security Management Security (ICCSM 2014), being held

this year at the University of Reading, UK on the 23-24 October 2014, . The conference chair is Dr John McCarthy, Vice President, from the Cyber Security, ServiceTech, UK and the Programme Chair is Dr. Barbara Endicott-Popovsky, from the Center for Information Assurance and Cybersecurity, University of Washington, Seattle, USA. As organisations rush to adopt Cloud Computing at a rate faster than originally projected, it is safe to predict that, over the coming years, Cloud Computing will have major impacts, not only on the way we conduct science and research, but also on the quality of our daily human lives. Computation research, education, and business communities have been exploring the potential benefits of Cloud Computing and the changes these imply. Experts have predicted that the move to the cloud will alter significantly the content of IT jobs, with cloud clients needing fewer hands-on skills and more skills that administer and manage information. Bill Gates was recently quoted: "How you gather, manage, and use information will determine whether you win or lose." Cloud Computing impacts will be broad and pervasive, applying to public and private institutions alike.

*Tax Justice and Global Inequality* May 10 2020 In the wake of the Panama Papers scandal and similar leaks, tax havens are now firmly in the spotlight. Today, roughly half of all global trade still passes through tax haven jurisdictions, costing millions in lost revenue to countries around the world. Such practices affect all of us, but are most keenly felt by poorer people in developing countries, where unfair tax practices have become a major obstacle to development, and which have allowed multinational corporations to continue to exploit developing economies. This collection argues that, for developing countries to achieve social justice and lasting prosperity, they must take control of their own tax destinies, and that this will also be crucial to achieving the Sustainable Development Goals. Covering such topics as natural resource management, representation in global tax institutions and effective strategies for building and protecting tax bases, the collection brings together expertise from a variety of countries and disciplines. It explores the options available to developing countries, and provides a basis for concerted action by tax authorities, policy makers, academics and civil society experts to design tax systems that can sustain a just society.

*Optimization for Control, Observation and Safety* Dec 29 2021 Mathematical optimization is the selection of the best element in a set with respect to a given criterion. Optimization has become one of the most used tools in control theory to compute control laws, adjust parameters (tuning), estimate states, fit model parameters, find conditions in order to fulfill a given closed-loop property, among others. Optimization also plays an important role in the design of fault detection and isolation systems to prevent safety hazards and production losses that require the detection and identification of faults, as early as possible to minimize their impacts by implementing real-time fault detection and fault-tolerant systems. Recently, it has been proven that many optimization problems with convex objective functions and linear matrix inequality (LMI) constraints can be solved easily and efficiently using existing software, which increases the flexibility and applicability of the control algorithms. Therefore, real-world control systems need to comply with several conditions and constraints that have to be taken into account in the problem formulation, which represents a challenge in the application of the optimization algorithms. This book offers an overview of the state-of-the-art of the most advanced optimization techniques and their applications in control engineering.

The Role of Calcium Handling in Heart Failure and Heart Failure Associated Arrhythmias May 02 2022 Under normal, healthy conditions, the contraction of cardiac myocytes, leading to the pump function of this organ, is driven by calcium-dependent mechanisms. Entry of calcium into the myocyte during the cardiac action potential causes activation of the ryanodine receptors and release of calcium from the sarcoplasmic reticulum. This process termed calcium-induced calcium release is essential for excitation-contraction coupling and enables each action potential to be transduced into a mechanical event. Indeed, in healthy myocytes, the calcium concentration in the cytosol of is elevated approximately 10-fold from a resting level of  $\approx 100$  nM to  $\approx 1$   $\mu$ M. This process is finely orchestrated by a number of key proteins, which can be specifically regulated by various pathways depending on the oxygen demand. Furthermore, the specific structure of the myocyte allows certain calcium-dependent processes to be compartmentalised, increasing the efficiency and safety of this regulation. Heart failure is a common, costly, and life-threatening condition. In 2015, for example, it affected around 40 million people globally. In patients with heart failure, the risk of sudden cardiac death and arrhythmias increases substantially. Cellular remodelling and alterations in calcium handling, which appear to contribute to the arrhythmogenic burden in heart failure, have been extensively reported. However, a number of unanswered questions remain, and each new study - while continuing to shed light on this subject - raises additional novel questions. This current compendium of articles covers a number of aspects and comprehensively reviews current knowledge and perspectives regarding the link between calcium handling, arrhythmias and heart failure providing at the same time insights that may lead to novel therapeutic options for the future.

Military Intervention in the Middle East and North Africa Nov 15 2020 This book contributes to an increasingly important branch of critical security studies that combines insights from critical geopolitics and postcolonial critique by making an argument about the geographies of violence and their differential impact in contemporary security practices, including but not limited to military intervention. The book explores military intervention in Libya through the categories of space and time, to provide a robust ethico-political critique of the intervention. Much of the mainstream international relations scholarship on humanitarian intervention frames the ethical, moral and legal debate over intervention

in terms of a binary, between human rights and state sovereignty. In response, O'Sullivan questions the ways in which military violence was produced as a rational and reasonable response to the crisis in Libya, outlining and destabilising this false binary between the human and the state. The book offers methodological tools for questioning the violent institutions at the heart of humanitarian intervention and asking how intervention has been produced as a rational response to crisis. Contributing to the ongoing academic conversation in the critical literature on spatiality, militarism and resistance, the book draws upon postcolonial and poststructural approaches to critical security studies, and will be of great interest to scholars and graduates of critical security studies and international relations.

*DIMINISHING PRESS FREEDOM IN TURKEY* Nov 08 2022

Going Places Jan 30 2022 Migration and the movement of people is one of the critical issues confronting the world's nations in the twenty-first-century. This book is about the economic contribution of migration to and from New Zealand, one of the most frequently discussed aspects of the debate. Can immigration, in economic terms, be more than a gap filler for the labour market and help as well with national economic transformation? And what is the evidence on the effect of migration not just on house prices but also on jobs, trade or broader economic performance? Building on Sir Paul Callaghan's vision of New Zealand as a place 'where talent wants to live', this book explores how we can attract skilled, creative and entrepreneurial people born in other countries, and whether our 'seventeenth region' – the more than 600,000 New Zealanders living abroad – can be a greater national asset.

**Whistleblower Protection by the Council of Europe, the European Court of Human Rights and the European Union** Sep 13 2020 First introduced in the United States, whistleblower laws have become increasingly popular around the world. This book illustrates the regional efforts undertaken by European organizations to promote whistleblower protection in Europe. To provide context, the first part of the book presents an overview of the international best practices for whistleblowing legislation and explores the status of whistleblower under international law. It also assesses the global hot topics regarding whistleblowing, from the cases of Edward Snowden and Julian Assange to the silencing of whistleblowers during the COVID-19 pandemic. The following parts focus on the European approach to whistleblower laws. It illustrates the influence of the Council of Europe in putting whistleblower protection on the European agenda and discusses the European Court of Human Rights' case law on whistleblowing under Article 10 of the European Convention on Human Rights. In the final part, the author analyzes the evolution of the European Union's approach to whistleblowing and the legal significance of the EU Whistleblower Directive adopted in 2019. In the respective parts, the author also examines the effectiveness of the international organizations' own internal rules on whistleblowing, from the United Nations and the World Bank Group to the Council of Europe and the European Union.

**The Routledge Handbook of Soft Power** Aug 25 2021 The Routledge Handbook of Soft Power is the first volume to offer a comprehensive and detailed picture of soft power and associated forms of public diplomacy. The terms soft power and public diplomacy have enormous currency in media and policy discourse, yet despite all the attention the terms remain conceptually ambiguous for analysts of international influence. The consequence is that the terms have survived as powerful, yet criticized, frames for influence. Divided into two main parts, Part I outlines theoretical problems, methodological questions, the cultural imperative and the technological turn within the study of soft power and Part II focuses on bringing the theory into practice through detailed discussion of key case studies from across the Americas, Europe, the Middle East, Africa and Asia. This innovative handbook provides a definitive resource for students and scholars seeking to familiarize

themselves with cutting-edge debates and future research on soft power and will be of interest to those studying and researching in areas such as international relations, public diplomacy and international communication.

**Illicit Finance and the Law in the Commonwealth Caribbean** Aug 13 2020 This book provokes fresh ways of thinking about small developing States within the transnational legal order for combating money laundering and the financing of terrorism and proliferation (TAMLO). From the global wars on drugs and terror to journalistic exposés such as the ‘Paradise’, ‘Panama’ and ‘Pandora’ Papers, the Commonwealth Caribbean has been discursively stigmatised as a mythical island paradise of ‘rogue’ States. Not infrequently, their exercise of regulatory self-determination has been presented as the selling of their economic sovereignty to facilitate shady business deals and illicit finance from high-net-worth individuals, kleptocrats, tax-dodgers, organised crime networks and terrorist financiers. This book challenges conventional wisdom that Commonwealth Caribbean States are among the ‘weakest links’ within the global ecosystem to counter illicit finance. It achieves this by unmasking latent interests, and problematising coercive extraterritorial regulatory and surveillance practices, along the onshore/offshore and Global North/South axes. Interdisciplinary in its outlook, the book will appeal to policymakers, regulatory and supervisory authorities, academics and students concerned with better understanding legal and development policy issues related to risk-based regulatory governance of illicit finance as well as those arising from money laundering related to corruption, politically exposed persons (PEPs), offshore finance and offshore Internet gambling services.

Leaks, Whistleblowing and the Public Interest Dec 17 2020 This book is the first of its kind to provide an in-depth treatment of the law of unauthorised disclosures in the United Kingdom. Drawing upon extensive data obtained using freedom of information as a methodology and examples from comparative jurisdictions, the book considers the position of civil servants, employees of the security and intelligence services and service personnel in the armed forces. It considers the protections available, the consequences of leaking and a full assessment of the authorised alternatives.

**The Future of Journalism: Risks, Threats and Opportunities** Jul 12 2020 This volume draws together research originally presented at the 2015 Future of Journalism conference at Cardiff University, UK. The conference theme, ‘Risks, Threats and Opportunities,’ highlighted five areas of particular concern for discussion and debate. The first of these areas, ‘Journalism and Social Media’, explores how journalism and the role of the journalist are being redefined in the digital age of social networking, crowd-sourcing and ‘big data’, and how the influence of media like Twitter, Facebook, YouTube, Instagram, and Reddit affects the gathering, reporting or consumption of news? ‘Journalists at Risk’ assesses the key issues surrounding journalists’ safety and their right to report, as news organizations and their sources are increasingly targeted in war, conflict or crisis situations. The third area, ‘Journalism Under Surveillance’, asks what freedom of the press means in a post-Snowden climate. What are the new forms of censorship confronting journalism today, and what emergent tactics will help it to speak truth to power? ‘Journalism and the Fifth Estate’ examines the traditional ideals of the fourth estate, which risk looking outdated, if not obsolete, in the modern world. How much can we rely on citizen media to produce alternative forms of news reporting, and how can we reform mainstream media institutions to make them more open, transparent and accountable to the public? The final area, ‘Journalism’s Values’, asks how journalism’s ethical principles and moral standards are evolving in relation to the democratic cultures of communities locally, regionally, nationally or internationally. What are the implications of changing priorities for the education, training and employment of tomorrow’s

journalists? Every chapter in this volume engages with a pressing issue for the future of journalism, offering an original, thought-provoking perspective intended to help facilitate further dialogue and debate. The chapters in this book were originally published in special issues of Digital Journalism, Journalism Practice, and Journalism Studies.

**Demonetisation** Sep 06 2022 This book is based on the 2016 Indian demonetisation. It revolves around demonetisation's objectives stated by the Government as a measure to attack on black Money, terrorism, counterfeit currency and making cash-less, further corrected to less-cash economy. The book weighed these stated objectives and assessed whether objectives will be achieved by this demonetisation. In addition to three Indian demonetisations, the book covers 18 demonetisations across the globe and 14 demonetisation-like events. Analysed demonetisation on the basis of cost-benefit analysis, the book has also covered impact of demonetisation on major industries like FMCG, Realty, Power, infrastructure, etc. and on prime economic indicators like GDP, GVA, CRR, repo rate, inflation, etc.

**Research Anthology on Securing Mobile Technologies and Applications** Oct 27 2021 Mobile technologies have become a staple in society for their accessibility and diverse range of applications that are continually growing and advancing. Users are increasingly using these devices for activities beyond simple communication including gaming and e-commerce and to access confidential information including banking accounts and medical records. While mobile devices are being so widely used and accepted in daily life, and subsequently housing more and more personal data, it is evident that the security of these devices is paramount. As mobile applications now create easy access to personal information, they can incorporate location tracking services, and data collection can happen discreetly behind the scenes. Hence, there needs to be more security and privacy measures enacted to ensure that mobile technologies can be used safely. Advancements in trust and privacy, defensive strategies, and steps for securing the device are important foci as mobile technologies are highly popular and rapidly developing. The Research Anthology on Securing Mobile Technologies and Applications discusses the strategies, methods, and technologies being employed for security amongst mobile devices and applications. This comprehensive book explores the security support that needs to be required on mobile devices to avoid application damage, hacking, security breaches and attacks, or unauthorized accesses to personal data. The chapters cover the latest technologies that are being used such as cryptography, verification systems, security policies and contracts, and general network security procedures along with a look into cybercrime and forensics. This book is essential for software engineers, app developers, computer scientists, security and IT professionals, practitioners, stakeholders, researchers, academicians, and students interested in how mobile technologies and applications are implementing security protocols and tactics amongst devices.

**Lawyers in Conflict and Transition** Jul 24 2021 Studies what lawyers do in challenging contexts of conflict, authoritarianism, and the transition from violence.

**School Governance** Jul 04 2022 The recent Trojan Horse scandal, in which twenty-five Birmingham, UK, schools were investigated following allegations that school governors were imposing a hard-line Muslim curriculum, raised important questions not only about school governance, but also about the future of a democratic system of education in England. Taking the Trojan Horse scandal as a starting point and drawing on her own experience as a school governor, Jacqueline Baxter examines what implications these questions will have for the newly elected British government. By examining the political, social, and economic contexts surrounding education in 2015, School Governance offers keen insights into pressures and challenges engendered by the current system and what these challenges may mean for English

education in the twenty-first century.

**Capacity Mechanisms in the EU Energy Market** Nov 27 2021 Ensuring an adequate, long-term energy supply is a paramount concern in Europe. EU member states now intervene by encouraging investment in generation capacity, offering an additional revenue stream for conventional power plants in addition to the existing, heavily subsidised investments in renewable energy sources. These capacity remuneration mechanisms (or simply capacity mechanisms) have become a hot topic in the wider European regulatory debate. European electricity markets are increasingly interconnected, so the introduction of a capacity mechanism in one country not only distorts its national market but may have unforeseeable consequences for neighbouring electricity markets. If these mechanisms are adopted by several member states with no supra-national coordination and no consideration for their cross-border impact, they may cause serious market distortions and put the future of the European internal electricity market at risk. This book provides readers with an in-depth analysis of capacity mechanisms, written by an expert team of policy-makers, economists, and legal professionals. It will be a first point of reference for regulators and policy-makers responsible for designing optimal capacity mechanisms in Europe, and will be an invaluable resource for academics and practitioners in the fields of energy, regulation, and competition.--

*The Pimping of Prostitution* Aug 01 2019 This book examines one of the most contested issues facing feminists, human rights activists and governments around the globe – the international sex trade. For decades, the liberal left has been conflicted as to whether pro-prostitution activists or abolitionists hold the correct view, and debates are ongoing as to who holds the key to the solutions facing the women and girls involved. Over the course of two years, Bindel conducted 250 interviews in almost 40 countries, cities and states, traveling around Europe, Asia, North America, Australia, New Zealand, and East and South Africa. Visiting legal brothels all around the world, Bindel got to know pimps, pornographers, survivors of the sex trade, and the women being sold by men classed as ‘business entrepreneurs’. Whilst meeting feminist abolitionists, pro-prostitution campaigners, police and government officials, and the men who drive the demand, Bindel uncovered the lies, mythology and criminal activity that shroud this global trade, and suggests here a way forward for the women seeking to abolish the oldest oppression. Informed by the lived human experience of those interviewed, this book will be of great interest to feminists, students, criminal justice advocates, criminologists and human rights activists.

Journalism, Economic Uncertainty and Political Irregularity in the Digital and Data Era Aug 05 2022 Analysing the evolving industry as it turns to the help of digital technologies such as algorithms and cloud computing to reach and engage local and global audiences, Journalism, Economic Uncertainty and Political Irregularity in the Digital and Data Era explores the challenges journalism faces in great depth and detail. **Neighbourhood Policy and the Construction of the European External Borders** Oct 07 2022 This book looks both backward and forward with regard to the European Union's political strategies towards its neighbouring countries. By bringing together the perspectives of critical geopolitics, policy studies and border studies, it presents a comprehensive review of the European Neighbourhood Policy and how it impacts the ongoing construction of the EU's external frontiers. Is the EU committed to promoting integration in a 'wider' European space, or is a "fortress Europe" emerging where the strengthening of internal cohesion is coupled with the militarisation of its external borders? The book aims to problematize this question by showing how the EU's external policies are based on a mixture of openness and closure, inclusion and exclusion, cooperation and securitisation. The European Neighbourhood Policy is a controversial strategy where regionalization and bordering, homogenisations and differentiations, centrifugal and centripetal forces proceed side-by-side, in an explicit attempt to construct a selective, mobile and fragmented border. A specific focus is devoted to the diversity of geo-strategies the EU is pursuing in its neighbouring countries and regions, macro-regional strategies and cross-border cooperation initiatives as new scales of cooperation, and the role of other global players.

**Monetary Policy, Financial Crises, and the Macroeconomy** Jun 30 2019 This volume investigates different aspects of monetary policy and prevention of financial crises. It discusses some recently suggested measures for central banks' responses to liquidity shortages and to the liquidity trap, methods for assessing the potential of crisis contagion via the interbank network, and the interaction between micro- and macro-prudential regulation. It compares different approaches for solving the Eurozone sovereign-debt problem and provides a new and intriguing explanation for rising income inequality. The authors are experts on monetary policy, financial crises, and contract theory from different European universities and central banks.

**Taxing Crime** Apr 20 2021 Taxing Crime: A Whole-of-Government Approach to Fighting Corruption, Money Laundering, and Tax Crimes examines how tax audits and investigations can lead to uncovering white-collar crime and how investigations of corruption can, in turn, lead to prosecutions of tax evasion or recovery of unpaid taxes. Prepared jointly by the World Bank and the United Nations Office on Drugs and Crime (UNODC) Stolen Asset Recovery Initiative (StAR) and the Global Tax Policy Center at the Institute for Austrian and International Tax Law, Vienna University of Economics and Business, this report offers analysis, case studies, examples of legal and operational frameworks, and recommendations that policy makers can use to enhance cooperation between tax authorities and law enforcement agencies at the national

and international levels. This study is designed to serve as a reference and source of advocacy for policy makers, but it may be useful to other practitioners as well, including law enforcement officials, investigating magistrates, and prosecutors. Specifically, chapters present strategic considerations for establishing communication channels between tax and criminal investigative agencies; suggestions for combining tax and financial crime prosecution as part of an interagency asset recovery strategy; and approaches to developing interagency information exchange at the regional and international levels. It concludes with recommendations on ways to enhance the roles of both the tax authorities in combating money laundering and corruption and of the law enforcement authorities in recovering the proceeds of tax crimes. • Chapter 1 provides an introduction. • Chapter 2 presents strategic considerations for establishing information exchange channels between tax and criminal investigative agencies. • Chapter 3 explains how to combine tax and financial crime prosecution as part of an interagency asset recovery strategy. • Chapter 4 discusses approaches to developing interagency information exchange at the regional and international levels. • Chapter 5 provides recommendations for future efforts to enhance the role of tax authorities in supporting efforts to combat money laundering and corruption, and the role of law enforcement authorities in the recovery of proceeds of tax crimes. • The appendix contains case studies that illustrate effective interagency cooperation, including at the international level.

Patterns of the Future Oct 03 2019 *Patterns of the Future* explains the current world using the theory of long-term development waves (Kondratiev waves). Markku Wilenius, Professor of Futures Studies, argues that we are now entering the sixth wave: the age of intelligent, integrated technologies, helping to restore the balance between humans, technology and nature by radically improved material and energy efficiency and a wiser use of human potential. The unfolding sixth wave will challenge our current values, institutions and business models. Using a systems-based approach, *Patterns of the Future* analyses how corporations and the public sector can navigate in the sixth wave. Case studies look at specific examples of this, using high-profile companies to demonstrate both the best- (and worst-) case scenarios of innovation for change. This book spans concepts from multiple disciplines in the social sciences, making it relevant not only to undergraduate and graduate students in futures studies, environmental studies, economics, and business, but also national policymakers, think tanks, corporate operators and indeed for any one seriously interested in the future. *Just Like Us* Sep 01 2019 In *Just Like Us: Digital Debates on Feminism and Fame*, Caitlin E. Lawson examines the rise of celebrity feminism, its intersections with digital culture, and its complicated relationships with race, sexuality, capitalism, and misogyny. Through in-depth analyses of debates across social media and news platforms, Lawson maps the processes by which celebrity culture, digital platforms, and feminism transform one another. As she analyzes celebrity-centered stories ranging from “The Fappening” and the digital attack on actress Leslie Jones to stars’ activism in response to #MeToo, Lawson demonstrates how celebrity culture functions as a hypervisible space in which networked publics confront white feminism, assert the value of productive anger in feminist politics, and seek remedies for women’s vulnerabilities in digital spaces and beyond. *Just Like Us* asserts that, together, celebrity culture and digital platforms form a crucial discursive arena where postfeminist logics are unsettled, opening up more public, collective modes of holding individuals and groups accountable for their actions.

*Mega-Regional Trade Agreements* Feb 28 2022 This book provides an in-depth analysis of "Mega-Regionals", the new generation of trans-regional free-trade agreements (FTAs) currently under negotiation, and their effect on the future of international economic law. The main

focus centres on the EU-US Transatlantic Trade and Investment Partnership (TTIP), the Trans-Pacific Partnership (TPP) and the EU-Canada Comprehensive Economic and Trade Agreement (CETA), but the findings are also applicable to similar agreements under negotiation, such as the Regional Comprehensive Economic Partnership (RCEP). The specific features of Mega-Regional Trade Agreements raise a number of issues with respect to their potential effect on the current system of international trade and investment law. These include the consequences of Mega-Regionals for the most-favoured-nation (MFN) principle, their relation to the multilateral system of the World Trade Organization (WTO), their democratic legitimacy and their interaction with existing bilateral investment treaties (BITs). The book is intended for academics and practitioners working in the field of international economic law.

**Media Leaks and Corruption in Brazil** Jan 06 2020 Analyzing the political consequences of the most extensive corruption investigation in recent Latin American history, *Operação Lava-Jato, Media Leaks and Corruption in Brazil* answers two central questions about the contradictory effects news media has on political systems. First, how can political actors in a seemingly well-functioning democracy quickly override checks and balances, and replace a head of state with a corrupt vice-president? Second, how can very active news media, while ostensibly performing the role of the watchdog, still fail to deliver media accountability to the public? Combining a quantitative view of the media sphere with case studies of the leaks, legal actions, and alliances forming and breaking in the Brazilian Congress, Mads Bjelke Damgaard demonstrates that the media's attention to leaks and investigations of corruption paved the way for Dilma Rousseff's impeachment. By timing the disclosure of information in scandals, actors with inside information were able to drive the media agenda and let some scandals escape from the limelight. The book delivers an in-depth study of how scandals become political weapons in a time of media personalities and post-politics. This book will interest scholars of Latin American Studies, and Brazil, and the broader fields of media studies, democracy studies, and journalism studies.

*The New Authoritarianism* Mar 08 2020 This volume continues the series that scrutinizes, from a risk perspective, the current phenomenon of authoritarianism, as displayed by the new radical right (also known as alternative right), and whether it represents 'real' democracy or an unacceptable hegemony potentially resulting in elected dictatorships and abuses as well as dysfunctional government and harm to many parties. The book identifies and analyzes risk issues arising from the radical-right phenomenon in many forms, including the personal safety and security of individual citizens, ethno-religious minorities, and other minorities and vulnerable groups, as well as threats to organizations, public order and national security, to democratic governance, and to international security. As chapters reveal, the cross-flow of ideological, organizational, and 'dark money' support emanating primarily from US corporate foundations, lubricates the fusion of corporate and radical-right interests nationally, transnationally, and globally. This volume gathers contributions from eight leading academic authors and provides a detailed examination of the fusion of mutual interests between, on the one hand, powerful corporate leaders, executives, and wealthy oligarchs and, on the other, radical-right political leaders, parties and intermediary organizations promoting radical-right causes. The two worlds feed off, enable, and strengthen each other. Of particular relevance to the third decade of the 21st century is an examination of the corporate/radical-right stance on the COVID-19 pandemic and the phenomenon of wild allegations and grand conspiracy theories disseminated by the radical-right against their enemies.
