AIR CRASH INVESTIGATIONS - CRACKED SOLDER JOINT - The Crash of Indonesia AirAsia Flight 8501 Dec 02 2019 On 28 December 2014 an Airbus A320-216 aircraft registered as PK-AXC was cruising at 32,000 feet on a flight from Juanda Airport, Surabaya, Indonesia to Changi Airport, Singapore with total occupants of 162 persons. The Pilot in Command (PIC) acted as Pilot Monitoring (PM) and the Second in Command (SIC) acted as Pilot Flying (PF). The Flight Data Recorder (FDR) recorded that many master cautions activated following the failure of the Rudder Travel Limiter which triggered Electronic Centralized Aircraft Monitoring (ECAM) message of AUTO FLT RUD TRV LIM SYS. The crew tried repeatedly to reset the computers but the autopilot and auto-thrust disengaged and the flight control reverted to Alternate Law.

The investigation showed that the loss of electricity and the RTLU failure were caused by a cracked solder joint. All occupants of the plane were killed in the accident.

Spiritual Values in the Workplace Sep 10 2020 From his energy-based approach to interior design and his appearances on HGTV, readers familiar with Cary Weldy will appreciate this new offering, in which Weldy speaks to the business community. Businesses have often run under the assumption that efficiency and productivity automatically equal success, measured solely in terms of profit. In this competitive paradigm, values must take second place, leading to the stereotype of the corporation as a soulless place. In this ground-breaking book, Cary Weldy moves beyond "synergy" to a model of business that focuses on the whole person. Take care of people, unleash their creativity, and innovation will follow. A new corporate mindset, one that is socially and environmentally conscious, now takes root around the world, leading to a better working environment, and, ultimately, a better world. Weldy takes readers on a journey through this change in consciousness, discussing the theory and the practice of bringing spiritual values into business. The book discusses the spiritual evolution we are witnessing on the planet, and how it is affecting companies, both large and small. It discusses the importance of embodying spiritual values in a workplace setting, and how the profits will follow. A reader will learn how to move from fear to love, the power of simplicity, how to use intuition for guidance, and the importance of moving from goals into flow and process. Cary also discusses the challenges and importance of diversity, and a new paradigm for leadership, providing examples of the template for our new emerging leaders. Readers can also learn many practical ways that some companies are already doing to create a new workplace environment geared for truly taking care of its employees, including offering massage therapy services, meditation classes, and the use of aromatherapy to

increase productivity.
