Youth, Globalization, and Society in Africa and Its Diaspora Sep 21 2021 This edited collection provides a window into Africa's diversity. A wide-ranging body of authors offers a valuable glimpse into the challenges and opportunities presented by globalization to the youth in Africa and its diaspora, while issuing a stern call for action to local governments to act now and tap into the energy of Africa's burgeoning youth population. In doing so, the authors expand extant literature on the continent's coping with globalization in the context of young people in various African nations. Featured in the collection are views on education, language, agriculture, sport and technology, deeply interwoven into the schooling, behavior, and health of youth. Specifically, these practices are found in both formal and non-formal education, agricultural production, and food nutrition, computer technology, and sport's amelioration of health issues, throughout Africa.

The Archival Box Sep 29 2019 King Ainose had two wives and three daughters but he had no son— an heir. He became cantankerous towards his wives and was desperate to have an heir to succeed him. King Ainose married Nurse Eki as his third wife and hoped for male twins. He gave his trusted guard, Nosa a box before he died. It's a secret between them. What is in the box? Who killed King Ainose?

Exporting Communication Technology to Developing Countries Apr 28 2022 *Exporting Communication Technology to Developing Countries* analyzes the economic, cultural, educational, and political implications of exporting information technology to Africa. Emmanuel K. Ngwainmbi tackles the numerous complexities related to the development of African telecommunications. He not only presents the technological aspects of telecommunications, but effectively depicts the cultural implications that must be considered. Ngwainmbi investigates and evaluates the history of African telecommunications, clearly showing the path that has led to its present state. He then assesses the potential for development within the countries of Africa upon the influx of technology from the outside world.

Handbook of Research on Digital-Based Assessment and Innovative Practices in Education May 18 2021 Even though digital technologies are ubiquitous in education, assessment methods continue to employ traditional assessments even though they are inadequate to provide information about a student's reasoning and conceptual understanding. Digital-based assessment models allow students to demonstrate higher-order skills while integrating digital technologies as a powerful teaching tool. Digital technologies can support inquiry-based learning that is essential to developing a deep conceptual understanding of the content. The Handbook of Research on Digital-Based Assessment and Innovative Practices in Education identifies digital tools and applications for effective assessment of learning, shares various models of digital-based assessment in education, and considers best pedagogical practices for assessment in education. Covering a range of topics such as formative assessments, design thinking, virtual reality, and equity, this major reference work is crucial for educational technologists, instructional designers, policymakers, administrators, faculty, researchers, academicians, scholars, practitioners, instructors, and students.

Information Technology in Developing Countries Nov 04 2022 Many developing countries are waking up to the potential of information technology and the role it can play in accelerating the pace of development. This book reports on the situation in various countries, looking at the problems and at successful strategies, methodologies and procedures. The papers are organized in three sections. The first includes six papers which discuss a theoretical framework for developing and implementing information systems in a developing country context. The next section of five papers presents the country reports covering many aspects of computerization in these countries. The third section includes five papers which present a regional/comparative status of computer use in selected countries, three papers that deal with framework/specific applications in some sectors, and finally two papers focusing on the software industry and ergonomics.

Nigerian Information and Communications Technology Handbook 2005 Sep 09 2020 This volume revises and updates the 2003 handbook on the ICT sector in Nigeria. It is a timely publication as Nigeria moves from being a country overwhelmingly dependent on oil, to a multi-product economy, with ICTs now representing US\$1.3bn per annum. There is still however a dearth of data and information on the nature, characteristics and need to track the progress and dynamics of the industry.
