The Psychosocial Implications of Disney Movies Dec 21 2021 In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

[Small Team Portal Into the 21st Century](#) Feb 20 2022 "Behavioral scientists from the U.S. Army Research Institute for the Behavioral and Social Sciences assisted the Institute for Defense Analyses (IDA) Simulation Center in conduct of excursions into the virtual 21st Century battlefield. The 1996 Defense Science Board (DSB) Summer Study requested analytical insights about concepts and technologies being considered for small team operations on the DSB's conceptual 21st Century Battlefield. The DSB focused on the concept of using technology to enable small rapidly deployable forces to accomplish missions previously only available to larger forces. Exercises were conducted in a virtual simulation environment U.S. Army and Marine Corps personnel used specially designed devices in a virtual simulation facility to test concepts about the capabilities of small (3- to 12-man) teams operating in a sensor-rich environment. In addition to computer reported data behavioral and tactical observers documented man-in-the-loop soldier performance and interactions with specific equipment. Combat effectiveness was enhanced through sophisticated communication devices and computers. Personnel were able in the virtual environment to perform tasks similar to those that might occur in a future battlefield scenario. A benefit of the simulation was the ability to portray future missions with prototype equipment."--DITC.

Interagency Coordination in Environmental Hazards (pesticides) Mar 12 2021

Book Jan 10 2021 Abstract: In this study I propose a strong and innovative model of teaching that centers on the student, and I report on the efficacy of this model using quantitative research procedures. This model of teaching is systematized in the Marhaba! curriculum, a method of teaching first year high school Arabic that I designed, tested, and evaluated. The Marhaba! curriculum is founded on best practices and is a natural outgrowth of contemporary education theories, including non-linear curriculum design and multiple-modality teaching materials that take into consideration students' diverse learning styles. Analysis of data indicates that use of the Marhaba! curriculum positively influences student proficiency in Arabic. In particular, students become proficient regardless of a student's gender, grade, socioeconomic status, or parent educational background. Also, student proficiency is not dependent on a student's attitude to learning or engagement in class, or a student's attitude toward the curriculum.
