Perigee Sep 09 2020 Stranded in orbit, with no way home before the air runs out... A veteran pilot flying a revolutionary spaceplane, A media mogul on an urgent mission halfway around the world, And an aerospace legend fighting to save his legacy, in the face of a government that would stand aside to let it be destroyed. At hypersonic speed, Arthur Hammond's fleet of Clipper spaceplanes has become the premium choice for high-flying travel, placing every corner of the globe within a few hours' reach. But when the line's flagship is marooned in space with a load of VIP clients, its crew must fight to stay alive knowing that help may never arrive. As they struggle with failing life support and

increasingly desperate passengers, their colleagues back on Earth scramble to mount an audacious rescue. A contentious mix of old airline hands and NASA veterans, they will face shocking betrayals in a battle to save their friends. In this race against time, Hammond must confront an onslaught of horrendous press, nitpicking bureaucrats, and dubious financiers - all of them pawns in a larger game, with his business empire as the prize. Amid a spreading web of industrial espionage, he may find the truth to be worse than imagined. And in space, one man will discover that escape may demand a terrible sacrifice. Reviewers have called it "a real barn-burner" and "the best darned 'sci-fi' novel I've read in years." PERIGEE opens the next chapter in air and space travel, where ordinary

people will accomplish extraordinary things.

20th ISPE International Conference on Concurrent Engineering Dec 13 2020 As a concept, Concurrent Engineering (CE) initiates processes with the goal of improving product quality, production efficiency and overall customer satisfaction. Services are becoming increasingly important to the economy, with more than 60% of the GDP in Japan, the USA, Germany and Russia deriving from service-based activities. The definition of a product has evolved from the manufacturing and supplying of goods only, to providing goods with added value, to eventually promoting a complete service business solution, with support

from introduction into service and from operations to decommissioning. This book presents the proceedings of the 20th ISPE International Conference on Concurrent Engineering, held in Melbourne, Australia, in September 2013. The conference had as its theme Product and Service Engineering in a Dynamic World, and the papers explore research results, new concepts and insights covering a number of topics, including service engineering, cloud computing and digital manufacturing, knowledge-based engineering and sustainability in concurrent engineering.

Protect the Harvest; Defend the Harvester Mar 16 2021 Protect the Harvest; Defend the Harvester talks about the conversion of a journalist who was very much against the rise of the modern day church, particularly the prophetic movement and the so-called prosperity gospel preachers. In his attempt to discredit the preachers, the journalist has a heavenly encounter which transforms his views and alters his spiritual course. At a later stage, while the journalist is travelling to DR Congo from Zambia, God shows him a vision and speaks to him about the need to 'Protect the Harvest, protect the granary and defend the harvester(s)'. An interesting encounter and valuable reading as he outlines how the Media in today's world is conspiring to discredit the church and soil the characters of the servants of God. He talks of how the church is under attack from the enemy within and without; he likens the gossip inside

church to weevils. A fascinating read. "A powerful and exhilarating testimony of an amazing encounter with God." Pastor Rikki Doolan - Superintendent (Osborn Institute of Theology) www.osbourninstitute.com "An amazing testimony accompanied by very powerful teaching. The world needs this at this very moment." Apostle Max Matonhodze www.planetministries.org.uk "A captivating testimony that carries you through a journey and teaches you the deep things about visions. Brilliant Pongo has demonstrated an amazing way of teaching and testifying. Indeed this book is testament to that. It is a great read." The Financial Gazette www.fingaz.co.zw

The Art of BMW Jun 30 2022 BMW began its life in aero-engineering--as anyone who's ever ridden one of its motorcycles might guess. These are bikes as close to airborne as any get. And what's more, fifty percent of all the motorcycles BMW has manufactured are still flying down the world's roads. These are the best, and in this book, the best of the best get their due, with brilliant, full-color photographs of BMW's classic models and detailed descriptions of their features, all located within the context of a concise history of this legendary marque. From the first of BMW's bikes, the R32, through the models that catapulted the company out of the ruins of World War II, to the latest bikes with the revamped opposed-twin-cylinder "boxer" engines that brought BMW its first fame--these are the bikes that made history, and, better yet, gave the most demanding riders a taste for flight.

Integrated Vehicle Health Management Sep 21 2021 Integrated Vehicle Health Management: Implementation and Lessons Learned is the fourth title in the IVHM series published by SAE International. This new book introduces a variety of case studies, lessons learned, and insights on what it really means to develop, implement, or manage an integrated system of systems. Integrated Vehicle Health Management: Implementation and Lessons Learned brings to the reader a wide set of hands-on stories, made possible by the contribution of twenty-three authors, who agreed to share their experience and wisdom on how new technologies are developed and put to work. This effort was again coordinated by Dr. Ian K. Jennions, Director of the IVHM Centre at Cranfield University (UK), and editor of the previous books in the series. Integrated Vehicle Health Management: Implementation and Lessons Learned, with seventeen, fully illustrated chapters, covers diverse areas of expertise such as the impact of trust, human factors, and evidential integrity in system development. They are complemented by valuable insights on implementing APU health management, aircraft health trend monitoring, and the historical perspective of how rotorcraft HUMS

(Health and Usage Monitoring Systems) opened doors for the adoption of this cutting-edge technology by the global commercial aviation industry.

Sleeping Bear Sep 02 2022 "After her young husband's untimely death, Army veteran Cassie Gale decides to take a few days of solitude in the Alaska wilderness before she starts her new job. But when she fails to show up on her first day and her dog is discovered injured at her wrecked campsite, her father knows that this is much more than a camping trip gone awry. As it turns out, Cassie's not the first person to disappear without a trace in Alaska's northern interior. Bears. Wolves. Avalanches. Frostbite. Starvation. There are many ways to die in here. But not all disappearances can be explained. Cassie's is one of them, along with a number of other outdoor enthusiasts who have vanished in recent years. Regaining consciousness in a Russian prison, Cassie finds herself trapped in a system designed to ensure that no one ever escapes alive. It will require all her grit and skills to survive. Meanwhile, her father rushes to outrun the clock, scouring thousands of acres, only to realize she's been taken by a far more nefarious adversary-one with the power of the Eastern Bloc behind it. Ties to his past life, one full of secrets, threaten to surface. He knows there's a price to be paid, but he's determined it won't be his daughter"--

Revolutionizing Aircraft Materials and Processes Nov 11 2020 This book addresses the emerging needs of the aerospace industry by discussing recent developments and future trends of aeronautic materials. It is aimed at advancing existing materials and fostering the ability to develop novel materials with less weight, increased mechanical properties, more functionality, diverse manufacturing methods, and recyclability. The development of novel materials and multifunctional materials has helped to increase efficiency and safety, reduce costs, and decrease the environmental foot print of the aeronautical industry. In this book, integral metallic structures designed by disruptive concepts, including topology optimization and additive manufacturing, are highlighted.
