Parts of Speech in Construction Grammar May 02 2020 Seminar paper from the year 2007 in the subject English Language and Literature Studies - Linguistics, grade: 1,0, University of Hamburg (Institut für Anglistik und Amerikanistik), course: Parts of Speech, 6 entries in the bibliography, language: English, abstract: This term paper is concerning Construction Grammar and the way it attempts to handle parts of speech categories like nouns, verbs and adjectives. The seminar this paper was written for proved in a manifold of ways that when we restrict ourselves to the categories provided by traditional grammar, we may face serious difficulties which call into question the fundamental categorizations of such grammar. These problems, or potential problems, are the subject matter of the first part of this paper. In the second part, I will give an overview of Construction Grammar. Since the concept of construction is central to Construction Grammar, I will first clarify the notion of construction outside of the Construction Grammar framework in 2.1., before moving to an account in 2.2 of those features that can be seen as the smallest common denominator for defining constructions within different Construction Grammars. One of my principal findings is the differing manners in which Construction Grammars in general, and a specific variant of Construction Grammar, namely Croft's Radical Construction Grammar, address the issue of parts of speech. Part three will present Croft's grammar as an answer to one of the central questions raised in this seminar, namely, which model is most adequate for categorising word classes in a single language like English but also in a cross-linguistic sense. This examination will be followed by some concluding remarks in part four. *Concise Encyclopedia of Grammatical Categories* Feb 29 2020 Complementing Brown & Miller's recent Concise Encyclopedia of Syntactic Theories (1996), to which this is a companion volume, this encyclopedia is a collection of articles drawn from the highly successful Encyclopedia of Language and Linguistics. It presents a collection of 79 articles, all of which have been revised and updated. It also provides a number of newly commissioned articles, one of which has been substantially updated and extended. The volume is alphabetically organised and includes an introduction and a glossary. The Concise Encyclopedia of Grammatical Categories will provide a uniquely comprehensive and authoritative overview of the building blocks of syntax: word classes, sentence/clause types, functional categories of the noun and verb, anaphora and pronominalisation, transitivity, topicalisation and word order. *Verbs Say Go!* Jun 02 2020 Jump! Assuming no specialized knowledge and with helpful real-world exercises at the end of each chapter, the book aids growth and inspires thought in students and other readers, spelling out the implications of these changes for teachers, writers, and all who write or speak in English.

[Parts of Speech in Mandarin](#) Jan 28 2020 This book offers a comprehensive survey of the major parts of speech in Mandarin. Seeking to identify the sets of universal and language-specific categories, it compares the range of categories available in Mandarin and the Indo-European languages and establishes six universal categories – nouns, verbs, adjectives, adverbs, prepositions and conjunctions – and three language-specific ones, namely classifiers, localizers and sentence-final particles. Incorporating insights from recent research findings and the diachronic development of the language, the book sheds new light on the factors that contribute to the long-standing debate on the categorical status of adjectives, prepositions and localizers in the extant literature. Bringing together the earlier general descriptions and the latest advances, it is broadly accessible to non-native and native speakers of the language and offers an ideal reference source for all students and scholars who are interested in studying the parts of speech in Mandarin.

Spoken Sibe: Morphology of the Inflected Parts of Speech Jun 26 2022 At present, the Sibe language is the only oral variety of Manchu which is actually in use. With some 20,000 to 30,000 speakers it is also the most widely spoken Tungusic language. The Sibe people, who live at the North-Western border of the present-day Sinkiang Uyghur Autonomous province of China, are descendants of the garrison men of the Manchu army from 18th century. They were sent there after the area was annexed by the Manchus with the task to guard the newly established border between the Manchu Empire and Russia. Being soldiers of an alien army they remained isolated from the indigenous Turkic and Mongolian peoples, which resulted in an almost miraculous preservation of the language. In the 1990s, when the oral varieties of Manchu in historical Manchuria became either extinct or at the verge of extinction, Sibe kept surviving as a language spoken by all generations of Sibe people in the Chapchal Sibe autonomous county, and by the middle and older generations in virtually all other Sibe settlements of Xinjiang. By now, although the percentage of Sibe-Chinese bilingualism is high, the number of speakers, including young people, is still significantly great. The present description of the grammatical functioning of the two main inflected word classes – nouns and verbs – is documented by examples and sample texts, and provided with the basic general information about the Sibe language and its speakers. The intention of this work is to offer the reader a more complex image of the Sibe language as it is used at present on its historical and cultural territory.

Parts of Speech Jul 28 2022 Parts of Speech are a central aspect of linguistic theory and analysis. Though a long-established tradition in Western linguistics and philosophy has assumed the validity of Parts of Speech in the study of language, there are still many questions left unanswered. For example, should Parts of Speech be treated as descriptive tools or are they to be considered universal constructs? Is it possible to come up with cross-linguistically valid formal categories, or are categories of language structure ultimately language-specific? Should they be defined semantically, syntactically, or otherwise? Do non-Indo-European languages reveal novel aspects of categorical assignment? This volume attempts to answer these and other fundamental questions for linguistic theory and its methodology by offering a range of contributions that spans diverse theoretical persuasions and contributes to our understanding of Parts of Speech with analyses of new data sets. These articles were originally published in "Studies in Language" 32:3 (2008).

Meet the Parts of Speech: The Complete Series Oct 31 2022 With a book for every part of speech, the complete Meet the Parts of Speech series includes story-based adventures combined with traditional instruction and usage examples for nouns, verbs, adjectives, adverbs, pronouns, conjunctions, prepositions, and interjections. In Grammaropolis, adverbs don't just modify verbs; adverbs are bossy. They tell the verbs where to go, when to leave, and how to get there. A pronoun doesn't just replace a noun; Roger the pronoun is a shady character who's always trying to trick Nelson the noun into giving up his spot. The Meet the Parts of Speech series uses the mechanics of character and story (plot, motivation, setting, etc.) to breathe life into what has traditionally been unengaging subject matter. Our story-based approach combines traditional instruction with original narrative content, which appeals to different learning styles, increases both engagement and retention, and encourages students to make a deeper connection with the parts of speech and punctuation marks. The complete series includes: Nelson the Noun Nelson takes a break from his stressful day job, leaving the Noun Office in the hands of Roger the pronoun. After discovering that vacation isn't what he'd hoped it would be, Nelson returns just in time to fix the confusion Roger has caused in his absence. Vinny the Action Verb & Lucy the Linking Verb Vinny and Lucy approach life differently. He's all action, while she's content to sit back and be. With their friend Jake the adjective in trouble, however, the two verbs must put aside their differences and work together to save the day. Jake the Adjective When Jake's nemesis pulls a prank and turns Grammaropolis into a grey, misshapen, tasteless town, Jake is forced to run around restoring everything--the colors, shapes, sizes, tastes, and more--to the way it was all meant to be. Benny the Adverb When his prized rock collection is stolen from the bank, Benny opens an investigation into how and when the theft took place and where the thief might have gone. Roger the Pronoun Feeling that he's destined for more than just renaming nouns, Roger opens up his own store next to Nelson's Nouns. But when Nelson goes missing, Roger realizes that for life to mean anything at all, every pronoun has to have an antecedent. Connie the Conjunction Nobody in all of Grammaropolis has more style than Connie; she simply knows how to put things together. After a bump on the head makes her give bad advice, she uses all the conjunctions at her disposal to set everything right again. Lil' Pete the Preposition When launching his model rocket in the park, Lil' Pete gets excited and forgets to add objects to his prepositional phrases. Without objects, the prepositions become adverbs, and chaos ensues as the rockets fly up, by, and around with no direction at all. Izzy the Interjection No matter whether the emotion is strong or mild, positive, negative, or somewhere in between, Izzy lives to express it. Loneliness can be a problem sometimes because she's not grammatically connected to the other words in the sentence, but when the time comes, she leaps at the chance to express her strongest emotion yet.
