*Allelopathy* Dec 04 2019 There are many good books in the market dealing with the subject of allelopathy. When we designed the outline of this new book, we thought that it should include as many different points of view as possible, although in an integrated general scheme. Allelopathy can be viewed from different of perspectives, ranging from the molecular to the ecosystem level, and including molecular biology, plant biochemistry, plant physiology, plant ecophysiology and ecology, with information coming also from the organic chemistry, soil sciences, microbiology and many other scientific disciplines. This book was designed to include a complete perspective of allelopathic process. The book is divided into seven major sections. The first chapter explores the international development of allelopathy as a science and next section deals with methodological aspects and it explores potential limitations of actual research. Third section is devoted to physiological aspects of allelopathy. Different specialists wrote about photosynthesis, cell cycle, detoxification processes, abiotic and biotic stress, plant secondary metabolites and respiration related to allelopathy. Chapters 13 through 16 are collectively devoted to various aspects of plant ecophysiology on a variety of levels: microorganisms, soil system and weed germination. Fundamental ecology approaches using both experimental observations and theoretical analysis of allelopathy are described in chapters 16 and 17. Those chapters deal with the possible evolutionary forces that have shaped particular strategies. In the section named “allelopathy in different environments”, authors primarily center on marine, aquatic, forest and agro ecosystems. Last section includes chapters addressing application of the knowledge of allelopathy.

**The Legends of King Arthur and His Knights** Jul 31 2019 Arthurian expert Sir James Knowles brings together fourteen tales of King Arthur and his knights, inspired by Alfred, Lord Tennyson's first four 'Idylls of the King'. Here is a fascinating journey through the land of ancient England where magic, mystery and warring factions come together in cataclysmic fashion. Beginning with the finding of the wizard Merlin, Sir James recounts the discovery of the legendary sword Excalibur, King Arthur's victory over the Saxons and his marriage to the beautiful Guinevere, as well as his battles against armies from Europe and his evasion of Queen Morgan's attempts to kill him with a magic garment. Tales include: • The Prophecies of Merlin and the Birth of Arthur • The Miracle of the Sword and Stone • The Lady of the Lake • The Founding of the Round Table • The Adventures of Sir Gawain Revealing the escapades of the Knights of the Round Table, such as Lancelot, Bedivere, Bors, Modred, Tristram and Galahad, as they seek to protect Arthur's kingdom, we discover how these fabled figures found their destiny. ABOUT THE SERIES: Arcturus Classic Myths and Legends brings together beautiful retellings of mythologies from different traditions, from Celtic to Native American.

**Virgil, Aeneid 11** Mar 19 2021 This is the first comprehensive commentary on Aeneid 11. The commentary treats fully matters of linguistic and textual interpretation, metre and prosody, grammar, lexicon and idiom, of Roman behaviour, social and ritual, as well as Virgil's sources and the literary tradition. New critical approaches and developments in Virgilian studies have been taken into account with economy and fairness. The Latin text is presented with a facing English translation. The commentary is followed by an appendix on Penthesilea and the Epic Cycle and a second appendix which discusses the weaknesses of Aeneid 11. The book concludes with English and Latin indices. In approach and learning, this commentary continues Nicholas Horsfall's impressive work as a commentator and will advance our understanding of the Aeneid and the poet Virgil."

**Virgil, Aeneid 11 (Pallas & Camilla), 1–224, 498–521, 532–96, 648–89, 725–835.** Aug 12 2020 A dead boy (Pallas) and the death of a girl (Camilla) loom over the opening and the closing part of the eleventh book of the Aeneid. Following the savage slaughter in Aeneid 10, the book opens in a mournful mood as the warring parties revisit yesterday's killing fields to attend to their dead. One casualty in particular commands attention: Aeneas' protégé Pallas, killed and despoiled by Turnus in the previous book. His death plunges his father Evander and his surrogate father Aeneas into heart-rending despair – and helps set up the foundational act of sacrificial brutality that caps the poem, when Aeneas seeks to avenge Pallas by slaying Turnus in wrathful fury. Turnus' departure from the living is prefigured by that of his ally Camilla, a maiden schooled in the martial arts, who sets the mold for warrior princesses such as Xena and Wonder Woman. In the final third of Aeneid 11, she wreaks havoc not just on the battlefield but on gender stereotypes and the conventions of the epic genre, before she too succumbs to a premature death. In the portions of the book selected for discussion here, Virgil offers some of his most emotive (and disturbing) meditations on the tragic nature of human existence – but also knows how to lighten the mood with a bit of drag. This course book offers the original Latin text, vocabulary aids, study questions, and an extensive commentary. Designed to stretch and stimulate readers, Ingo Gildenhard's volume will be of particular interest to students of Latin studying for A-Level or on undergraduate courses. It extends beyond detailed linguistic analysis to encourage critical engagement with Virgil's poetry and the most recent scholarly thought. King's College, Cambridge, has generously contributed to this publication.

**Maritime Law in Motion** Jun 09 2020 This book provides valuable insights into various contemporary issues in public and private maritime law, including interdisciplinary aspects. The public law topics addressed include public international law and law of the sea, while a variety of private law topics are explored, e.g. commercial maritime law, conflict of laws, and new developments in the application of advanced technologies to maritime law issues. In addition, the book highlights current and topical discussions at international maritime forums such as the International Maritime Organization on regulatory and private law matters within the domain of marine environmental law, the law respecting seafarers' affairs and maritime pedagogics, maritime security, comparative law in the maritime field, trade law, recent case law analysis, taxation law in the maritime context, maritime arbitration, carriage of passengers, port law, and limitation of liability.

**The Cosmographia of Sebastian Münster** Feb 04 2020 Sebastian Münster's Cosmographia was an immensely influential book that attempted to describe the entire world across all of human history and analyse its constituent elements of geography, history, ethnography, zoology and botany. First published in 1544 it went through thirty-five editions and was published in five languages, making it one of the most important books of the Reformation period. Beginning with a biographical study of Sebastian Münster, his life and the range of his scholarly work, this book then moves on to discuss the genre of cosmography. The bulk of the book, however, deals with the Cosmographia itself, offering a close reading of the 1550 Latin edition (the last and definitive edition worked upon by Münster). By analysing the contents of the Cosmographia it attempts to recreate how the world of the sixteenth century appeared to a scholar living in Basel, and understand what he saw and heard. Through this examination of Münster, his publications and scholarly networks, the conflicts and continuities between medieval scholarly traditions and the widening horizons of the sixteenth century are explored and revealed. Of interest to scholars of humanist culture, the Reformation and book history, this ambitious work throws into relief previously overlooked aspects of the intellectual and religious culture of the time.

**Differential Equations and Dynamical Systems** Aug 24 2021 Mathematics is playing an ever more important role in the physical and biological sciences, provoking a blurring of boundaries between scientific disciplines and a resurgence of interest in the modern as well as the classical techniques of applied mathematics. This renewal of interest, both in research and teaching, has led to the establishment of the series: Texts in Applied Mathematics (TAM). The development of new courses is a natural consequence of a high level of excitement on the research frontier as newer techniques, such as numerical and symbolic computer systems, dynamical systems, and chaos, mix with and reinforce the traditional methods of applied mathematics. Thus, the purpose of this textbook series is to meet the current and future needs of these advances and encourage the teaching of new courses. TAM will publish textbooks suitable for use in advanced undergraduate and beginning graduate courses, and will complement the Applied Mathematical Sciences (AMS) series, which will focus on advanced textbooks and research level monographs.

Preface to the Second Edition This book covers those topics necessary for a clear understanding of the qualitative theory of ordinary differential equations and the concept of a dynamical system. It is written for advanced undergraduates and for beginning graduate students. It begins with a study of linear systems of ordinary differential equations, a topic already familiar to the student who has completed a first course in differential equations.

**French Cruisers** Jul 23 2021 The French produced some of the most striking and innovative interwar cruiser designs. A large amount of new information about these ships has become available over the past twenty years in France, but this book is the first to make this accessible to an English-speaking readership. Part I explains the design philosophy behind each of the classes built after 1922, and outlines the characteristics of each type, accompanied by detailed data tables and a comprehensive set of specially-drawn plans based on official documents, as well as carefully-selected photographs. Coverage includes the De Grasse, laid down in August 1939 and completed postwar as an AA cruiser, and also the heavy cruisers of the Saint Louis class intended to follow her, about which little has been published. Part II deals with the historical side, covering not only the eventful careers of these ships, but also explaining the peacetime organisation of the Marine Nationale, the complex politics of this turbulent period and their impact on the navy. Like its highly successful predecessor, French Battleships, this beautifully presented book subtly blends technical and historical analysis to produce what must become the standard reference work.

**The Divine Office in the Latin Middle Ages** Jun 21 2021 The Divine Office--the cycle of daily worship other than the Mass--is the richest source of liturgical texts and music from the Latin Middle Ages. However, its richness, the great diversity of its manuscripts, and its many variations from community to community have made it difficult to study, and it remains largely unexplored terrain. This volume is a practical guide to the Divine Office for students and scholars throughout the field of medieval studies. The book surveys the many questions related to the Office and presents the leading analytical tools and research methods now used in the field. Beginning with the Office in the early Middle Ages, the book covers manuscript sources and their contents; regional developments and variations; the relationship between the Office, the Mass, and other ceremonies and repertoires; and the deep links between the Office and medieval hagiography. The book concludes with a discussion of recent technical advances for handling the enormous amounts of evidence on the Office and its performance, in particular CANTUS, the vast electronic database developed by Ruth Steiner of Catholic University for the analysis of chant repertoires. The Divine Office in the Latin Middle Ages is an essential resource for anyone studying medieval liturgy. Its accessible style and broad coverage make it an important basic reference for a wide range of students and scholars in art history, religious studies, social history, literature, musicology, and theology.

**An Anthology of Informal Latin, 200 BC--AD 900** Sep 24 2021 This book contains over fifty passages of Latin from 200 BC to AD 900, each with translation and linguistic commentary. It is not intended as an elementary reader (though suitable for university courses), but as an illustrative history of Latin covering more than a millennium, with almost every century represented. Conventional histories cite constructions out of context, whereas this work gives a sense of the period, genre, stylistic aims and idiosyncrasies of specific passages. 'Informal' texts, particularly if they portray talk, reflect linguistic variety and change better than texts adhering to classicising norms. Some of the texts are recent discoveries or little known. Writing tablets are well represented, as are literary and technical texts down to the early medieval period, when striking changes appear. The commentaries identify innovations, discontinuities and phenomena of long duration. Readers will learn much about the diversity and development of Latin.

**Allelochemicals: Biological Control of Plant Pathogens and Diseases** Oct 02 2019 Biological control of plant diseases and plant pathogens is of great significance in forestry and agriculture. This book, the first of its kind, is organized around the indication that allelochemicals can be employed for biological control of plant pathogens and plant diseases. This volume focuses on discovery and development of natural product based fungicides for agriculture, direct use of allelochemicals, and application of allelopathy in pest management.

The Rescue of the Bride delves deep into the essence of the human spirit, dividing joy and fear, light and darkness, using God's promises to unlock the truth hidden within the heart of every man.

**Simply Imperfect** Nov 26 2021 This revised and updated edition of The Wabi-Sabi House recounts the history of this aesthetic philosophy and reveals ways to introduce it into your home. The ancient Japanese philosophy of wabi-sabi is about appreciating simplicity and letting go of the superficial--the perfect antidote to modern consumerism and perfectionism. In 2004, author Robyn Griggs Lawrence helped popularize wabi-sabi in North America with her book The Wabi-Sabi House. In Simply Imperfect, Lawrence shows that wabi-sabi is far more than a style of home décor. It's a state of mind--a way of living modestly in the moment, stripping away the unnecessary, and finding satisfaction in everyday things. Tracing the rich history of wabi-sabi from its Zen Buddhist roots to the present day, this beautifully-illustrated book also offers tips on: Clearing clutter and blocking noise Integrating salvaged and recycled materials Making and growing things yourself (or supporting local artisans who do) Taking time and space for self-reflection

**The Story of King Arthur and His Knights** Aug 04 2022 In these wonderfully illustrated tales, renowned storyteller Howard Pyle carries us back to the enchanting world of King Arthur and his Round Table. The book chronicles the adventures of Arthur as he draws the sword Excalibur from the anvil, proving his right to the throne, and as he courts and wins the heart of Guinevere. Later he suffers the treachery of the wicked Morgana le Fay and witnesses the tragic fate of the Enchanter Merlin. In Pyle's classic retelling, the legends come alive in unsurpassed vividness. More powerful than any of Merlin's spells, The Story of King Arthur and His Knights has enthralled and delighted generations of readers fascinated by chivalry, magic, and the unforgettable drama of medieval times. A wonderfully fantastical and compelling version of the Arthur legend. Howard Pyle's stories of King Arthur and his knights are themselves legendary. Colorful tales of chivalry are combined with his own detailed illustrations to create an elegant and beautiful book.
