The Complete Sneaker Reseller Guide Jun 27 2022 The hottest growing eBay business today is reselling high-demand sneakers, clothing, and cosmetics. And no wonder: A properly-guided newbie with less than $2,000 working capital can realistically create a part-time business that within 2-3 months' time is netting $50,000 annually from 4-6 hours per week "work" (which most participants actually find to be a heck of a lot of fun). You don't need a secret supply source for this – you only need to know what to buy and when/how to buy it, because we're purchasing product at retail and reselling it to hungry, hyped-up buyers for a 50% to 300%+ profit margin ...yes, you read that right, and we do it all day long, baby. The stuff we target sells out within minutes of release time and then flies off eBay all month long, often for double+ retail. The Sole Master's new 24,000+ word training manual will eliminate the normally-long learning curve for becoming a successful sneaker aftermarket seller. He'll teach you all the tricks of the trade that no one else is willing to show you, including: – Which products to target, and why – Where to get early release info, drop dates, and links – How to properly analyze the aftermarket before pulling the trigger – The proper banking setup so your orders always check-out without problems – How to cop multiples on limited "one per customer" releases – A list of the best "sneaker bot" software programs and a detailed tutorial

on how to use them – Web browser tricks that will have you manually copping just as many items as your bots grab – How to nab the sudden restock alerts with a high success rate – Where, when, and how to resell your inventory quickly for the best prices – A complete business plan that will have you netting $3500+ from your 2nd month forward – Personal help if you need it Looking for a fun side business that can make your house and car payments? This is it. Copping high-demand sneakers is a blast, my friends, and satisfyingly profitable to boot. If you sit in front of a computer every day and can squeeze in a few minutes of side-activity here and there, the sneaker reseller business is for you. So let's get started...

The Reseller's Survival Guide Aug 30 2022 n this Ebook you will learn: How to start a reselling business. Which apps to sell on. How to resell full time. How to create a schedule and a budget. Examples given. And much more. No Refunds on digital products

Buying and Selling Laboratory Instruments Jun 03 2020 A time-tested, systematic approach to the buying and selling of complex research instruments Searching for the best laboratory instruments and systems can be a daunting and expensive task. A poorly selected instrument can dramatically affect results produced and indirectly affect research papers, the quality of student training, and an investigator's chances for advancement. Buying and Selling Laboratory Instruments offers the valuable insights of an analytical chemist and consultant with over four decades of experience in locating instruments based upon both need and price. It helps all decision makers find the best equipment, service, and support while avoiding the brand-loyalty bias of sales representatives so you can fully meet your laboratory's requirements. The first section of the book guides buyers through the hurdles of funding, purchasing, and acquiring best-fit instruments at the least-expensive price. It explains how to find vendors that support their customers with both knowledgeable service and application support. Also offered is guidance on adapting your existing instruments to new applications, integrating new equipment, and what to do with instruments that can no longer serve in research mode. The second section explains the sales process in detail. This is provided both as a warning against manipulative sales reps and as a guide to making the sale a win-win process for you and your vendor. It also shows you how to select a knowledgeable technical guru to help determine the exact system configuration you need and where to find the best price for it. Added bonuses are summary figures of buying sequence and sales tools and an appendix containing frequently asked questions and memory aids. Buying and Selling Laboratory Instruments is for people directly involved in selecting and buying instruments for operational laboratories, from the principle investigator to the person actually delegated with investigating and selecting the system to be acquired. Sales representatives; laboratory managers; universities; pharmaceutical, biotech, and forensic research firms; corporate laboratories; graduate and postdoctoral students; and principle investigators will not want to be without this indispensible guide.

Handbook of Emerging Communications Technologies Feb 09 2021 Communication technologies change the way we live our lives-the ways we communicate and share information, the news, and our entertainment. The new millennium promises to bring some of the most volatile activity in the

history of communications, as we continue to be bombarded by new standards and technologies. The near frenzy of corporate mergers and acquisitions accelerates technological development and can provide hints of what is to come. The Handbook of Emerging Communications Technologies: The Next Decade fills this gap. Until now, information on many of its topics, such as Multiprotocol over ATM, IP Multicasting, and RSVP, existed only as fragmented articles on the Internet or as complex feature specifications. In this landmark volume, 18 leading authorities each tackle one of the cutting edge technologies destined to shape the future. Each chapter Describes a technology and any standards on which it is based Discusses its impact on the communications field Forecasts its future direction Developed primarily for telecommunications specialists network managers, developers, and analysts, the Handbook of Emerging Communications Technologies: The Next Decade, offers the opportunity to acquire a deeper understanding of future technologies necessary to remaining current, and serves as a valuable reference guide for corporate executives, planners, and information managers-anyone seeking general knowledge about where the communications industry is heading.
