Raising Kids Who Read Aug 17 2021 How parents and educators can teach kids to love reading in the digital age Everyone agrees that

reading is important, but kids today tend to lose interest in reading before adolescence. In *Raising Kids Who Read*, bestselling author and psychology professor Daniel T. Willingham explains this phenomenon and provides practical solutions for engendering a love of reading that lasts into adulthood. Like Willingham's much-lauded previous work, *Why Don't Students Like School?*, this new book combines evidence-based analysis with engaging, insightful recommendations for the future. The three key elements for reading enthusiasm—decoding, comprehension, and motivation—are explained in depth in *Raising Kids Who Read*. Teachers and parents alike will appreciate the practical orientation toward supporting these three elements from birth through adolescence. Most books on the topic focus on early childhood, but Willingham

understands that kids' needs change as they grow older, and the science-based approach in *Raising Kids Who Read* applies to kids of all ages. A Family of Readers Mar 31 2020 Two of the most trusted reviewers in the field join with top authors, illustrators, and critics in a definitive guide to choosing books for children—and nurturing their love of reading. A FAMILY OF READERS is the definitive resource for parents interested in enriching the reading lives of their children. It's divided into four sections: 1. Reading to Them: Choosing and sharing board books and picture books with babies and very young children. 2. Reading with Them:

Launching the new reader with easy readers and chapter books. 3. Reading on Their Own: Exploring what children read—and how they read—by genre and gender. 4. Leaving Them Alone: Respecting the reading privacy of the young adult. Roger Sutton knows how and why children read. He must, as the editor in chief of THE HORN BOOK, which since 1924 has been America's best source for reviews of books for young readers. But for many parents, selecting books for their children can make them feel lost. Now, in this essential resource, Roger Sutton and Martha V. Parravano, executive editor at the magazine, offer thoughtful essays that consider how books are read to (and then by) young people. They invite such leading authors and artists as Maurice Sendak, Katherine Paterson, Margaret Mahy, and Jon Scieszka, as well as a selection of top critics, to add their voices about the genres they know best. The result is an indispensable readers' companion to everything from wordless board books to the most complex

and daring young adult novels.

Did I Say That Out Loud? Nov 27 2019 Enjoy this hilarious and deeply insightful take on the indignities of middle age and how to weather them with grace--from the former editor-in-chief of Real Simple. "A pure pleasure to read." (Cathi Hanauer, author of *Gone*) Do you hate the term "middle age?" So does Kristin van Ogtrop, who is still trying to come up with a less annoying way to describe those years when you find yourself both satisfied and outraged, confident and confused, full of appreciation but occasional disdain for the world around you. Like an intimate chat with your best friend, this mostly funny, sometimes sad, always affirming volume from longtime magazine journalist van Ogtrop is a celebration of that period of life when mild humiliations are significantly outweighed by a self-actualized triumph of the spirit. Finally!

Featuring stories from her own life, as well as anecdotes from her unwitting friends and family, van Ogtrop encourages you to laugh at the small irritations of midlife: neglectful children, stealth insomnia, forks that try to kill you, t.v. remotes that won't find Netflix, abdominal muscles that can't seem to get the job done. But also to acknowledge the things you may have lost: innocence, unbridled optimism, smooth skin. Dear friends. Parents. It's all here: the sublime and the ridiculous, living together in the pages of this book as they do in your heart, like a big messy family, in this no-better-term-for-it middle age.

The importance of teaching Sep 05 2020 England's school system performs below its potential and can improve significantly. This white paper outlines action designed to: tackle the weaknesses in the system; strengthen the status of teachers and teaching; reinforce the standards set by the curriculum and qualifications; give schools back the freedom to

determine their own development; make schools more accountable to parents, and help them to learn more quickly and systematically from good practice elsewhere; narrow the gap in attainment between rich and poor. The quality of teachers and teaching is the most important factor in determining how well children do. The Government will continue to raise the quality of new entrants to the profession, reform initial teacher training, develop a network of "teaching schools" to lead training and development, and reduce the bureaucratic burden on schools. Teachers will be given more powers to control bad behaviour. The National Curriculum will be reviewed, specifying a tighter model of knowledge of core subjects so that the Curriculum becomes a benchmark against which school can be judged. Schools will be given more freedom and autonomy, the Academies programme extended and parents will be able to set up "Free Schools" to meet parent demand. Accountability for pupil performance is critical,

and much more information will be available to aid understanding of a school's performance. School improvement will be the responsibility of schools, not central government. Funding of schools needs to be fairer and more transparent, and there will be a Pupil Premium to target resources on the most deprived pupils.

Building Communities of Engaged Readers Aug 29 2022 Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a

reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project

schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading. The Work of Reading Jan 22 2022 The Work of Reading: Literary Criticism in the 21st Century is a sustained critical examination of the developments in the field of literary studies from the early 2000s onwards within the context of the systematic problems in the humanities. This volume analyzes the origins of the current

methods—including New Historicism, empiricism, New Formalism, postcritique, and others—and posits alternatives to the present state of literary studies. At a time when many aspects of current methods show a desire to adopt values from other disciplines to solve internal crises, this volume advocates a renewed focus on questions of form by means of the praxis of aesthetic study, close reading, and other modes of engaging directly with literary texts.

Reading George Szirtes Jan 28 2020 George Szirtes is a leading figure in contemporary poetry in England and in Hungary, the country of his birth. His poems explore - in a wide variety of complex, skilfully handled forms - his origins,

his life, and his critical engagements with works by other poets and artists. They offer powerful and moving meditations on the roles and functions of the poet in the modern world.

Reading George Szirtes offers the first sustained analysis of Szirtes' work, mapping his development chronologically and thematically, and paying close attention to form and technique in its analysis of each poem. Haunted by his family's knowledge and experience of war, occupation and the Holocaust, as well as by loss, danger and exile, all of Szirtes' poetry covers universal themes: love, desire and illusion; loyalty and betrayal; history, art and memory; humanity and truth. Throughout his work, there is a conflict between two states of mind, the possibility of happiness and apprehension of disaster. These are played out especially in his celebrated long poems and extended sequences, *The Photographer in Winter*, *Metro*, *The Courtyards*, *An English Apocalypse* and *Reel*. John Sears offers detailed and lucid readings of

these and other key poems - including Szirtes' most recent poetry - relating them to historical events and to work by other poets. Reading George Szirtes is a critical companion volume to George Szirtes' New and Collected Poems. Both books are published on Szirtes' 60th birthday.

Twilight of the Idols Jun 26 2022 "Twilight of the Idols means that the old truth is on its last legs," declared Friedrich Nietzsche in this 1889 polemic. Forceful in his language and profound in his message, the philosopher delivered the nineteenth century's most devastating attack on Christianity. Intended by Nietzsche as a general introduction to his philosophy, it assails the "idols" of Western philosophy and culture, including the concepts of Socratic rationality and Christian morality. Written while Nietzsche was at the peak of his powers, less than a year before the onset of the insanity that gripped him until his death in 1900, this work's proximity to the end of the author's career renders it a distinctive portrait from his later period. The

source of the famous dictum, "Whatever does not kill me makes me stronger," it blazes with provocative, inflammatory rhetoric that challenges readers to reexamine what they worship and why.

Reader, Come Home Jun 22 2019 The author of the acclaimed *Proust and the Squid* follows up with a lively, ambitious, and deeply informative book that considers the future of the reading brain and our capacity for critical thinking, empathy, and reflection as we become increasingly dependent on digital technologies. A decade ago, Maryanne Wolf's *Proust and the Squid* revealed what we know about how the brain learns to read and how reading changes the way we think and feel. Since then, the ways we process written language have changed dramatically with many concerned about both their own changes and that of children. New research on the reading brain chronicles these changes in the brains of children and adults as they learn to read while immersed in a digitally

dominated medium. Drawing deeply on this research, this book comprises a series of letters Wolf writes to us—her beloved readers—to describe her concerns and her hopes about what is happening to the reading brain as it unavoidably changes to adapt to digital mediums. Wolf raises difficult questions, including: Will children learn to incorporate the full range of "deep reading" processes that are at the core of the expert reading brain? Will the mix of a seemingly infinite set of distractions for children's attention and their quick access to immediate, voluminous information alter their ability to think for themselves? With information at their fingertips, will the next generation learn to build their own storehouse of knowledge, which could impede the ability to make analogies and draw inferences from what they know? Will all these influences change the formation in children and the use in adults of "slower" cognitive processes like critical thinking, personal reflection, imagination, and

empathy that comprise deep reading and that influence both how we think and how we live our lives? How can we preserve deep reading processes in future iterations of the reading brain? Concerns about attention span, critical reasoning, and over-reliance on technology are never just about children—Wolf herself has found that, though she is a reading expert, her ability to read deeply has been impacted as she has become increasingly dependent on screens. Wolf draws on neuroscience, literature, education, and philosophy and blends historical, literary, and scientific facts with down-to-earth examples and warm anecdotes to illuminate complex ideas that culminate in a proposal for a biliterate reading brain. Provocative and intriguing, *Reader, Come Home* is a roadmap that provides a cautionary but hopeful perspective on the impact of technology on our brains and our most essential intellectual capacities—and what this could mean for our future.
