Register implementation for land cover legends Oct 02 2019 Land cover assessment and monitoring of its dynamics are essential requirements for the sustainable management of natural resources, environmental protection, food security, humanitarian programmes as well as core data for monitoring and modelling. Land Cover (LC) data are therefore fundamental in fulfilling the mandates of many United Nations (UN), international and national institutions and programmes. Despite the recognition of such importance, current users of LC data still lack access to sufficient reliable or comparable baseline LC data. These data are essential to tackle the increasing concerns in regard to food security, environmental degradation, and climate change. Critically, maintaining and restoring land resources plays a vital task in tackling climate change, securing biodiversity, and maintaining crucial ecosystem services, while ensuring resilient livelihoods and food security.

200% - an Instruction Manual for Living Fully Jul 31 2019 "Every human should get a copy of this book when they are born." - Manyu, internationally renowned mindfulness/meditation teacher This book is a guide for the human condition. It is a practical, real and honest roadmap for anyone who wants to experience life to its fullest - at 200%. 200% of life is the experience of everything. It is the whole of life: 100% inner connection, peace and stability and 100% outer enjoyment, effectiveness and fulfilment. Success without contentment and peace is half a life. Being "Zen" without action or the good things of life is only half the picture. You can have both; you deserve both. You deserve to live 200% of life. A step-by-step, "How to live fully" manual, this book gives you everything you need to cultivate the right rock solid inner foundation for the most fulfilling, and even thrilling, external existence. Light-hearted, entertaining and incredibly clear, this is the rarest of spiritual books - it doesn't take itself too seriously, yet what it delivers is profound. Do you want to live 200% of life? Here is your complete guide on how to do it. _____ Reviews for 200%: "I believe every human should get a copy of this book when they are born. It's a book that actually shows you how to LIVE. A Life manual. A practical Life guide. A How-to-Let-Go guide. A guide on How-to-be-Happy, How to find Peace, and How to Make Life Easy. Arjuna has done a truly amazing job. It is a wonderful book. I love it." - Manyu, internationally renowned meditation/mindfulness teacher "This is a lovely book. Yes, in a way, it is a 'self help' book, but it would be like saying Dan Millman's Peaceful Warrior books or the writings of Seneca are 'self help.' This book has a clear vision of teaching us the path to true happiness in body, mind, soul and spirit. It is a wonderful read and I will come back to dip in its waters many, many times." - Dan John, strength coaching legend, religious studies academic, best-selling author of eleven books including Never Let Go "200% holds so much real life relatable wisdom. I know this book will change lives because it makes living the best of lives possible for anyone with an inner desire and calling for more. If 'more' is calling you, then Arjuna's book is the answer." - Sandy C. Newbigging, coaching and meditation expert, best-selling author of seven books including Mind Detox "Arjuna strikes that just right balance between finding inner peace and living to perform. These two aspects, commonly at odds, need no longer be. Welcome to the 200% club." - Pat Flynn, fitness expert, philosopher, best-selling author of five books including How to Be Better at (Almost) Everything, top 500 health and fitness blogger "200% is written with such clarity and humour that simply reading it is an enormous pleasure. But it doesn't stop there - if readers put these words into action there will be a tremendous impact, not just on themselves, but on the entire world." - Rebekah Palmer, journalist, editor and author of two books including Rhythm, as well as the children's series Champ the Chopper "I absolutely LOVE it. I love the mixture of wisdom, humility and humour. I love the format and the very real and practical advice, which is life changing. Everyone should read this book!" - Joanna Taylor, international yoga and meditation expert

New Trends in Software Methodologies, Tools and Techniques Jan 17 2021 Software is the essential enabling means for science and the new economy. It helps us to create a more reliable, flexible and robust society. But software often falls short of our expectations. Current methodologies, tools, and techniques remain expensive and are not yet sufficiently reliable, while many promising approaches have proved to be no more than case-by-case oriented methods. This book contains extensively reviewed papers from the eleventh International Conference on New Trends in software Methodology, Tools and Techniques (SoMeT_12), held in Genoa, Italy, in September 2012. The conference provides an opportunity for scholars from the international research community to discuss and share research experiences of new software methodologies and techniques, and the contributions presented here address issues ranging from research practices and techniques and methodologies to proposing and reporting solutions for global world business. The emphasis has been on human-centric software methodologies, end-user development techniques and emotional reasoning, for an optimally harmonized performance between the design tool and the user. Topics covered include the handling of cognitive issues in software development to adapt it to the user's mental state and intelligent software design in software utilizing new aspects on conceptual ontology and semantics reflected on knowledge base system models. This book provides an opportunity for the software science community to show where we are today and where the future may take us.
