Corporate Governance Aug 09 2020 Emerging markets are becoming important engines of global growth. These markets, such as the transition economies in Europe and Central Asia, are viewed with increasing interest by foreign investors as private sector participation grows, as regulatory reforms take effect, and as individual firms focus on elevating their business practices to align with international standards. In fact, foreign direct investment inflows to transition economies increased by 28 percent to reach \$108 billion in 2013, according to the United Nations Conference on Trade and Development. Sound corporate governance is a critical element in helping these emerging markets meet their full economic potential. Good corporate governance, defined as the structures and processes by which companies and banks are directed and controlled, helps firms operate more efficiently, improves access to capital, mitigates risk, and safeguards against mismanagement. Good governance also facilitates appropriate consideration of other critical issues for enterprises, including environmental and social responsibility. It is the foundation for long-term business growth and sustainability, adding value for investors and contributing lasting dividends for economies. Companies and banks, particularly those in emerging markets that are focused on improving their corporate governance can look to a growing body of evidence that such efforts matter, yielding bottom line benefits, reputational enhancements, and competitive differentiation. In one study of note, the Emerging Market Investor Survey, 100 percent of the investors interviewed said they will pay a higher premium for good governance in an emerging market firm than what they would pay for a similar firm in a developed market. As companies and banks in Europe and Central Asia find their place on the world's economic stage, efforts to enhance governance practices are helping them reduce their business risks, improve performance, and set the course for long-term success and profitability.

Rethinking G.K. Chesterton and Literary Modernism Dec 13 2020 This book comprehensively rethinks the relationship between G.K. Chesterton and a range of key literary modernists. When Chesterton and modernism have previously been considered in relation to one another, the dynamic has typically been conceived as one of mutual hostility, grounded in Chesterton's advocacy of popular culture and modernist literature's appeal to an aesthetic elite. In setting out to challenge this binary narrative, Shallcross establishes for the first time the depth and ambivalence of Chesterton's engagement with modernism, as well as the reciprocal fascination of leading modernist writers with Chesterton's fiction and thought. Shallcross argues that this dynamic was defined by various forms of parody and performance, and that these histrionic expressions of cultural play not only suffused the era, but found particular embodiment in Chesterton's public persona. This reading not only enables a far-reaching reassessment of Chesterton's corpus, but also produces a framework through which to re-evaluate the creative and critical projects of a host of modernist writers—most sustainedly, T.S. Eliot, Wyndham Lewis, and Ezra Pound—through the prism of Chesterton's disruptive presence. The result is an innovative study of the

literary performance of popular and 'high' culture in early twentieth-century Britain, which adds a valuable new perspective to continuing critical debates on the parameters of modernism.

Advances in Robot Design and Intelligent Control Feb 12 2021 This book presents the proceedings of the 25th International Conference on Robotics in Alpe-Adria-Danube Region, RAAD 2016 held in Belgrade, Serbia, on June 30th–July 2nd, 2016. In keeping with the tradition of the event, RAAD 2016 covered all the important areas of research and innovation in new robot designs and intelligent robot control, with papers including Intelligent robot motion control; Robot vision and sensory processing; Novel design of robot manipulators and grippers; Robot applications in manufacturing and services; Autonomous systems, humanoid and walking robots; Human–robot interaction and collaboration; Cognitive robots and emotional intelligence; Medical, human-assistive robots and prosthetic design; Robots in construction and arts, and Evolution, education, legal and social issues of robotics. For the first time in RAAD history, the themes cloud robots, legal and ethical issues in robotics as well as robots in arts were included in the technical program. The book is a valuable resource for researchers in fields of robotics, engineers who implement robotic solutions in manufacturing, services and healthcare, and master's and Ph.D. students working on robotics projects.

Motor Carriers Road Atlas Feb 24 2022 Road maps are accompanied by information on federally-designated routes and trucking restrictions.

More Than the Truth Oct 03 2022 The inspirational success story of the first 100 years of Hutchinson Builders. What started out as a one-man band in 1912, when an English immigrant builder arrived with his family to start a new life in Australia, has grown into the country's largest privately owned construction company. The Hutchies' story straddles a century that witnessed two world wars, the great depression and tumultuous cycles of financial crises against the back drop of the rough and tumble world of construction. As well as tracking the survival and eventual growth of Hutchies into the dynamic and well respected company of today, the book outlines its evolution through successive generations of Jack Hutchinsons at the helm with a fifth generation poised to take on that role. That story is told by way of a historical account as well as captured through the republication and inclusion of every back issue of "Hutchies' Truth", the company's colourful, tabloid-style newsletter covering those years.

Container Logistics Jan 26 2022 Whilst the maritime container business has been studied in depth, the impact on shippers and how shippers deal with the given challenges has not been fully examined. Container Logistics bridges this gap and looks at the maritime business from a customer's perspective. The book examines the challenges, solutions and the latest developments in the container industry as well as the interaction between the different actors involved, such as freight forwarders, supply chain managers and shippers. Current hot topics from the supply chain and the maritime business perspective are included. From the supply chain perspective, Container Logistics covers areas such as the purchase of transportation services from ocean carriers and transport management, to effective and efficient logistics execution. From the maritime business perspective, the book covers topics such as intermodal freight optimisation and hinterland transportation, and terminal and port optimisation. With the inclusion of clear examples of best practice and bona fide case studies, as well as invaluable contributions from an international team of experts, Container Logistics is an essential guide for supply chain managers and shippers, as well as academics and industry professionals working in the maritime business. Online supporting resources include images from the book and chapter summaries.

2009 3rd International Conference on Application of Information and Communication Technologies Nov 23 2021

A House to Remember Oct 23 2021 What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In *A House To Remember*, she explains why.

American Trucking Trends Apr 28 2022

The Drowner May 30 2022 In the warm alkaline waters of the public bath a headstrong young engineer accidentally collides with a beautiful actress. From this innocent collision of flesh begins a passion that takes them from the Wiltshire Downs to the most elemental choices of life and death in the Australian desert. Their intense romance is but part of the daring story that unfolds. Mingling history, myth and technology with a modern cinematic and poetic imagination, Robert Drewe presents a fable of European ambitions in an alien landscape, and a magnificently sustained metaphor of water as the life-and-death force.

Elevator Mechanical Design Sep 09 2020

Trucking in British Columbia Jun 30 2022 Accompanied by hundreds of previously unpublished archival and contemporary photographs, award-winning historian Daniel Francis delivers a fascinating account of the first hundred years of trucking in BC. Beginning in Vancouver with James Starks first delivery van in 1907, motorized transport exploded in the province, soon traversing every dirt track, hauling logs on temporary plank roads and leading to a frenzy of experimentation and innovation from the failed Renard Road Train and early battery-operated vehicles to some truly impressive purpose-built trucks, many of them manufactured in BC.
