Global Maritime Transport and Ballast Water Management Sep 17

2021 Ballast water management is a complex subject with many issues and still limited knowledge, however, it is building up on new scientific researches and practical experience. The Ballast Water Management Convention is the global legal framework which still needs to be implemented. This book brings together a long-term and newest experience from practical work, scientific research, administration and policy involvements, offering unique insights to readers who would like to learn more about this subject. It also provides recommendations and practical solutions especially important for professionals, administrations and organizations in the process of the implementation of this Ballast Water Management Convention.

Soil Survey Laboratory Methods Manual Dec 21 2021 The purpose of this manual is to document methodology and to serve as a reference for the laboratory analyst. The standard methods described in this SSIR No. 42, Soil Survey Laboratory Methods Manual, Version 4.0 replaces as a methods reference all earlier versions of the SSIR No. 42 (1989, 1992, and 1996, respectively) and SSIR No. 1, Procedures for Collecting Soil Samples and Methods of Analysis for Soil Survey (1972, 1982, and 1984). All SSL methods are performed with methodologies appropriate for the specific purpose. The SSL SOP's are standard methods, peer-recognized methods, SSL-developed methods, and/or specified methods in soil taxonomy (Soil Survey Staff, 1999). An earlier version of this manual (1996) also served as the primary document from which a companion manual, Soil Survey Laboratory Information Manual (SSIR No. 45, 1995), was developed. The SSIR No. 45 describes in greater detail the application of SSL data. Trade names are used in the manual solely for the purpose of providing specific information. Mention of a trade name does not constitute a guarantee of the product by USDA nor does it imply an endorsement by USDA.

Maximal Cohen-Macaulay Modules Over Non-Isolated Surface

Singularities and Matrix Problems Jul 16 2021 In this article the authors develop a new method to deal with maximal Cohen-Macaulay modules over non-isolated surface singularities. In particular, they give a negative answer on an old question of Schreyer about surface singularities with only countably many indecomposable maximal Cohen-Macaulay modules. Next, the authors prove that the degenerate cusp singularities have tame Cohen-Macaulay representation type. The authors' approach is illustrated on the case of k as well as several other rings. This study of maximal Cohen-Macaulay modules over non-isolated singularities leads to a new class of problems of linear algebra, which the authors call representations of decorated bunches of chains. They prove that these matrix problems have tame representation type and describe the underlying canonical forms.

Automated Peritoneal Dialysis Feb 20 2022 While continuous ambulatory peritoneal dialysis (CAPD) has been the standard peritoneal procedure since the seventies, different schedules of automated peritoneal dialysis (APD) have emerged during the eighties. Today, APD is considered a valuable tool in the management of ESRD patients, together with CAPD

and hemodialysis. However, despite its frequent use, APD has not yet been well assessed, and most pathophysiological and clinical studies on PD refer to CAPD. In this book, major experts in the field therefore discuss and evaluate the insights gained on APD up to now, presenting a comprehensive review of all experimental, technical and clinical aspects related to the various treatments grouped under the definition of APD. The recent developments presented are divided into four sections: membrane permeability, transport mechanisms and kinetic modeling applied to APD; prescription and adequacy of different APD treatment schedules; dialysis machines and solutions for APD, and, lastly, different clinical aspects such as the possibility to maintain APD program and residual renal function. Physicians involved in ESRD care, renal fellows and scientists both in the academic world and in the hospital setting will undoubtedly profit from this timely publication.

An Anthropology of Anthropology Mar 24 2022 The book uses anthropological methods and insights to study the practice of anthropology. It calls for a paradigm shift, away from the publication treadmill, toward a more profile-raising paradigm that focuses on addressing a broad array of social concerns in meaningful ways.

Becoming Conspicuous Jul 24 2019 The first comprehensive and accessible history of Travelers in Twentieth-century Ireland.

Nuclear Energy and Global Governance Feb 29 2020 The book considers the implications of the nuclear energy revival for global governance in the areas of safety, security and non-proliferation. Increased global warming, the energy demands of China, India and other emerging economic powerhouses and the problems facing traditional and alternative energy sources have lead many to suggest that there will soon be a nuclear energy 'renaissance'. This book examines comprehensively the drivers of and constraints on the revival, its nature and scope and the possibility that nuclear power will spread significantly beyond the countries which currently rely on it. Of special interest are developing countries which aspire to have nuclear energy and which currently lack the infrastructure, experience and regulatory structures to successfully manage such a major industrial enterprise. Of even greater interest are countries that may see in a nuclear energy program a 'hedging' strategy for a future nuclear weapons option. Following on from this assessment, the author examines the likely impact of various revival scenarios on the current global governance of nuclear energy, notably the treaties, international organizations, arrangements and practices designed to ensure that nuclear power is safe, secure and does not contribute to the proliferation of nuclear weapons. The book concludes with recommendations to the international community on how to strengthen global governance in order to manage the nuclear energy revival prudently. This book will be of much interest to students of energy security, global governance, security studies and IR in general.

Family Health Care Nursing May 26 2022 Prepare for the real world of family nursing care! Explore family nursing the way it's practiced today—with a theory-guided, evidence-based approach to care throughout the family life cycle that responds to the needs of families and adapts to the changing dynamics of the health care system. From

health promotion to end of life, a streamlined organization delivers the clinical guidance you need to care for families. Significantly updated and thoroughly revised, the 6th Edition reflects the art and science of family nursing practice in today's rapidly evolving healthcare environments. The ABC of XYZ Oct 19 2021 "Based on more than a decade of research, The ABC of XYZ is designed for educators, business managers and parents who want a short and lively introduction to Australia's living generations. The book explores what a generation is, how its definition has changed over the years, and the trends that are emerging for the future. It examines generational conflicts in the school, home and workplace, and the ways in which they can be understood and resolved, and what might be beyond Z. Written by one of Australia's foremost social researchers, this revised edition of The ABC of XYZ reveals the truth behind the labels and is essential reading for anyone interested in how our current generations live, learn and work."--Cover.

Growth and Productivity in Agriculture and Agribusiness Jun 26 2022 The report assesses the World Bank Group's support for growth and productivity in the agriculture sector. Enhancing agricultural growth and productivity is essential to meeting the worldwide demand for food and to reducing poverty, particularly in the poorest developing countries. Between 1998 and 2008, the period covered by this evaluation, the World Bank Group (WBG) provided \$23.7 billion in financing for agriculture and agribusiness in 108 countries (roughly 8 percent of total WBG financing), spanning areas from irrigation and marketing to research and extension. However, this was a time of declining focus on agricultural growth and productivity by both countries and donors. The cost of inadequate attention to agriculture, especially in agriculture-based economies, came into focus with the food crisis of 2007-08. The crisis added momentum to an emerging renewal of attention and stepped-up financing to agriculture and agribusiness at the World Bank and International Finance Corporation (IFC), as well as at several multilateral and bilateral agencies. World Bank financing rose two and a half times from 2008 to 2009, though that increase in lending seems to have been accompanied by a decline in analytical work, which this review finds valuable for results. This evaluation seeks to provide lessons from successes and failures to help improve the development impact of the renewed attention to the sector. Ratings against the World Bank's stated objectives and IFC's market-based benchmarks for agriculture and agribusiness projects have been equal to or above portfolio averages in East Asia, Latin America, and the transition economies in Europe, with notable successes over a long period in China and India. But performance of WBG interventions has been well below average in Sub-Saharan Africa, where IFC has had little engagement in agribusiness. Inconsistent client commitment and weak capacity have limited the effectiveness of WBG support in agriculture-based economies, particularly in Sub-Saharan Africa, and constraints on staffing and internal coordination within the WBG have also hurt outcomes. Financial sustainability has been constrained by insufficient government funding and the difficulty of maintaining agricultural services and infrastructure. The WBG has a unique opportunity to match the increases in the financing for agriculture with sharper focus on improving agricultural growth and productivity in agriculture-based economies, notably in Sub-Saharan Africa. Greater effort will be needed to connect sectoral interventions and achieve synergies from public and private sector interventions; to build capacity and knowledge exchange; to take stock of experience in rain-fed agriculture; to ensure attention to financial sustainability and to cross-cutting issues of gender, environmental and social impacts, and climate; and to better integrate WBG support at the global and regional levels with that at the country level.

Pediatric Dialysis Oct 31 2022 Since the inaugural publication of *Pediatric Dialysis* in 2004, a wide range of advances have taken place in dialysis-related care, leading to a wealth of new knowledge in the field. *Pediatric Dialysis, Second Edition* brings this knowledge together to provide the most comprehensive source of state-of-the-art information on the dialysis of infants, children and adolescents. With new chapters, updated chapters and references, and contemporary, unique perspectives from authors who are leaders in the global pediatric nephrology community, *Pediatric Dialysis, Second Edition* is, once again, an authoritative reference that will facilitate best practices in both acute and chronic dialysis. Experienced clinicians and trainees alike will find

Pediatric Dialysis, Second Edition not only another valuable contribution to the literature but an indispensable guide to managing their pediatric patients on dialysis.

Computer Applications for Handling Legal Evidence, Police Investigation and Case Argumentation Mar 12 2021 This book provides an overview of computer techniques and tools — especially from artificial intelligence (AI) — for handling legal evidence, police intelligence, crime analysis or detection, and forensic testing, with a sustained discussion of methods for the modelling of reasoning and forming an opinion about the evidence, methods for the modelling of argumentation, and computational approaches to dealing with legal, or any, narratives. By the 2000s, the modelling of reasoning on legal evidence has emerged as a significant area within the well-established field of AI & Law. An overview such as this one has never been attempted before. It offers a panoramic view of topics, techniques and tools. It is more than a survey, as topic after topic, the reader can get a closer view of approaches and techniques. One aim is to introduce practitioners of AI to the modelling legal evidence. Another aim is to introduce legal professionals, as well as the more technically oriented among law enforcement professionals, or researchers in police science, to information technology resources from which their own respective field stands to benefit. Computer scientists must not blunder into design choices resulting in tools objectionable for legal professionals, so it is important to be aware of ongoing controversies. A survey is provided of argumentation tools or methods for reasoning about the evidence. Another class of tools considered here is intended to assist in organisational aspects of managing of the evidence. Moreover, tools appropriate for crime detection, intelligence, and investigation include tools based on link analysis and data mining. Concepts and techniques are introduced, along with case studies. So are areas in the forensic sciences. Special chapters are devoted to VIRTopsy (a procedure for legal medicine) and FLINTS (a tool for the police). This is both an introductory book (possibly a textbook), and a reference for specialists from various quarters.

Cephalopods of the World Jul 28 2022 This is the third volume of the entirely rewritten, revised and updated version of the original FAO Catalogue of Cephalopods of the World (1984). The present volume is a multiauthored compilation that reviews 13 families, i.e. (in alphabetical order), Alloposidae, Amphitretidae, Argonautidae, Bolitaenidae, Cirroctopodidae, Cirroteuthidae, Octopodidae, Ocythoidae, Opisthoteuthidae, Stauroteuthidae, Tremoctopodidae, Vampyroteuthidae, Vitreledonellidae, with 56 genera and the 279 species known and named to the date of the completion of the volume.

Dialysis Therapy Feb 08 2021 A comprehensive reference covering all aspects of the clinical management of adult and child dialysis patients. This edition includes seven new chapters including one on EPO use in dialysis patients and one on the HIV positive patient.

Family Health Care Nursing May 02 2020 The purpose of *Family Health Care Nursing: Theory, Practice, and Research, 2nd Edition* is to provide a foundation in the concepts of family health care nursing and to learn how these concepts and theories are practiced in the traditional specialties within the nursing profession. It is appropriate for both undergraduate and graduate students who need a foundation in family health care nursing. -- A comprehensive overview of family nursing that links family theory and research to clinical implementation in such practice areas as gerontology, maternity, pediatrics, med/surg, and mental health -- Encompasses broad definitions of families, including nuclear, cohabitating individuals, single parents, blended, gay, as well as cultural differences -- Clinical case studies illustrate intervention and health promotion for the family as a client in a variety of settings -- Chapter pedagogy includes introduction, outline, objectives, summary, study questions, references, and bibliography -- "Highlighting Current Research" tool appears in appropriate chapters -- New chapter on family nursing research

Poverty Reduction Support Credits Nov 19 2021 This evaluation examines the relevance and effectiveness of Poverty Reduction Support Credits (PRSCs), introduced by the Bank in early 2001 to support comprehensive growth, improve social conditions, and reduce poverty in IDA countries. PRSCs were intended to allow greater country-ownership, provide more predictable annual support, exhibit more flexible conditionality, and strengthen budget processes in a results-based framework. By September 2009, the Bank had approved 99 PRSCs totaling some \$7.5 billion and representing 38% percent of IDA policy based lending. The evaluation finds that in terms of process, PRSCs were effective in easing conditionality, increasing country ownership and aid predictability, stimulating dialogue between central and sectoral

ministries, and improving donor harmonization. In terms of content, PRSCs succeeded in emphasizing public sector management and pro-poor service delivery. Yet in terms of results, it is difficult to distinguish growth and poverty outcomes in countries with PRSCs from other better performing IDA countries. There is scope for further simplifying the language of conditionality and underpinning PRSCs with better pro-poor growth diagnostics. PRSCs can also strengthen their results frameworks and limit sector policy content in multi-sector DPLs to high-level or cross-cutting issues. Today, Bank policy has subsumed PRSCs under the broader mantle of Development Policy Lending and the rationale for a separate brand name although differences linger from the past. Since PRSCs and other policy-based lending have gradually converged in design, remaining differences compared to other Development Policy Loans should be clearly spelled out, or the separate PRSC brand name should be phased out.

Demonization in International Politics Jun 14 2021 This book investigates demonization in international politics, particularly in the Middle East. It argues that while demonization's origins are religious, its continued presence is fundamentally political. Drawing upon examples from historical and modern conflicts, this work addresses two key questions: Why do leaders demonize enemies when waging war? And what are the lasting impacts on peacemaking? In providing answers to these inquiries, the author applies historical insight to twenty-first century conflict. Specific attention is given to Israel and Palestine as the author argues that war-time demonization in policy, media, and art is a psychological and relational barrier during peace talks.

Private Sector and Enterprise Development Jan 22 2022 This important and well-researched book examines the challenges to private sector growth in twelve Middle East and North African (MENA) countries, assessing comparative performance against a number of indicators and focussing on the special role of SMEs and entrepreneurial activity.

Handbook of Dialysis Sep 29 2022 The revised, updated Fourth Edition of this popular handbook provides practical, accessible information on all aspects of dialysis, with emphasis on day-to-day management of patients. Chapters provide complete coverage of hemodialysis, peritoneal dialysis, special problems in dialysis patients, and problems pertaining to various organ systems. This edition reflects the latest guidelines of the National Kidney Foundation's Kidney Disease Outcomes Quality Initiative (KDOQI) on hemodialysis and peritoneal dialysis adequacy and on nutrition. New chapters cover chronic kidney disease management in predialysis patients, frequent daily or nocturnal hemodialysis, and hemodiafiltration. Chapters on venous and arteriovenous access have been completely revised. Each chapter provides references to relevant Web sites.

Family Nursing Nov 27 2019 Written for undergraduate/graduate courses in community & family nursing, this popular text teaches a holistic, philosophical approach. The student is guided through generalized concepts & theoretical foundations, reality-based applications, case studies, thorough & updated discussions, assessment, & nursing diagnoses.

Life Cycle Impact Assessment Dec 09 2020 This book offers a detailed presentation of the principles and practice of life cycle impact assessment. As a volume of the LCA compendium, the book is structured according to the LCIA framework developed by the International Organisation for Standardisation (ISO) passing through the phases of definition or selection of impact categories, category indicators and characterisation models (Classification): calculation of category indicator results (Characterisation); calculating the magnitude of category indicator results relative to reference information (Normalisation); and converting indicator results of different impact categories by using numerical factors based on value-choices (Weighting). Chapter one offers a historical overview of the development of life cycle impact assessment and presents the boundary conditions and the general principles and constraints of characterisation modelling in LCA. The second chapter outlines the considerations underlying the selection of impact categories and the classification or assignment of inventory flows into these categories. Chapters three through thirteen explore all the impact categories that are commonly included in LCIA, discussing the characteristics of each followed by a review of midpoint and endpoint characterisation methods, metrics, uncertainties and new developments,

and a discussion of research needs. Chapter-length treatment is accorded to Climate Change; Stratospheric Ozone Depletion; Human Toxicity; Particulate Matter Formation; Photochemical Ozone Formation; Ecotoxicity; Acidification; Eutrophication; Land Use; Water Use; and Abiotic Resource Use. The final two chapters map out the optional LCIA steps of Normalisation and Weighting.

Extending Social Security to All Aug 29 2022 This book outlines basic concepts such as the social protection floor and the social security staircase, analyses the affordability of various approaches, and examines the results of practices around the world, especially in low- and middle-income countries.

Soil Survey Manual (New Revised Ed.) Nov 07 2020 This book, specially prepared for soil scientists and engineers, offers comprehensive coverage of basic soil concepts, systematics, mapping and examination procedures for soils. The Manual is universally useful and is the primary reference on principles and technical detail for local, State and Federal contributions to authorized soil surveys. Soil scientists concerned with soil surveys in other countries have used it as well. Teachers have used it both as a text and as a reference for students.

Acute Renal Failure in the Critically Ill May 14 2021 Over the last 10 years the syndrome of severe acute renal failure has progressively changed in its epidemiology. It is now most frequently seen in critically ill patients, typically in the context of sepsis and multiorgan failure. This epidemiologic change has meant that intensive care physicians and nephrologists must now work in close cooperation at all times and must take many complex issues of prevention, pathogenesis, and management into account that they did not previously have to tackle. Simultaneously, the last 10 years have seen the development of major technical and conceptual changes in the field of renal replacement therapy. There are now previously unavailable therapeutic options that provide physicians with a flexible and rapidly evolving armamentarium. The nutrition of these patients, previously limited by the partial efficacy of renal replacement therapies, has also become more aggressive and more in tune with the needs of critically ill patients. Increased understanding of the pathogenesis of the multi organ failure syndrome has focused on the role of many soluble "mediators of injury" (cytokines, leukotrienes, prostanooids etc.). These molecules are likely to participate in the pathogenesis of acute renal failure. Their generation and disposal is also affected by different techniques of artificial renal support.

The Impact of the Freedom of Information Act on Central Government in the UK Mar 31 2020 Based on interviews with officials, requesters and journalists, as well as a survey of FOI requesters and a study of stories in the national media, this book offers a unique insight into how the Freedom of Information Act 2000 really works.

Handbook on Life Cycle Assessment Jul 04 2020 Environmental policy aims at the transition to sustainable production and consumption. This is taking place in different ways and at different levels. In cases where businesses are continuously active to improve the environmental performance of their products and activities, the availability of knowledge on environmental impacts is indispensable. The integrated assessment of all environmental impacts from cradle to grave is the basis for many decisions relating to achieving improved products and services. The assessment tool most widely used for this is the environmental Life Cycle Assessment, or LCA. Before you is the new Handbook of LCA replacing the previous edition of 1992. New developments in LCA methodology from all over the world have been discussed and, where possible, included in this new Handbook. Integration of all developments into a new, consistent method has been the main aim for the new Handbook. The thinking on environment and sustainability is, however, quickly evolving so that it is already clear now that this new LCA Handbook does not embrace the very latest developments. Therefore, further revisions will have to take place in the future. A major advantage of this Handbook is that it now also advises which procedures should be followed to achieve adequate, relevant and accepted results.

Furthermore, the distinction between detailed and simplified LCA makes this Handbook more broadly applicable, while guidance is provided as to which additional information can be relevant for specialised applications.

World Development Report 2008 Dec 29 2019 The world's demand for food is expected to double within the next 50 years, while the natural resources that sustain agriculture will become increasingly scarce, degraded, and vulnerable to the effects of climate change. In many poor

countries, agriculture accounts for at least 40 percent of GDP and 80 percent of employment. At the same time, about 70 percent of the world's poor live in rural areas and most depend on agriculture for their livelihoods. 'World Development Report 2008' seeks to assess where, when, and how agriculture can be an effective instrument for economic development, especially development that favors the poor. It examines several broad questions: How has agriculture changed in developing countries in the past 20 years? What are the important new challenges and opportunities for agriculture? Which new sources of agricultural growth can be captured cost effectively in particular in poor countries with large agricultural sectors as in Africa? How can agricultural growth be made more effective for poverty reduction? How can governments facilitate the transition of large populations out of agriculture, without simply transferring the burden of rural poverty to urban areas? How can the natural resource endowment for agriculture be protected? How can agriculture's negative environmental effects be contained? This year's report marks the 30th year the World Bank has been publishing the 'World Development Report'.

Core Curriculum for the Dialysis Technician Aug 05 2020 The Core Curriculum covers physiology, chemistry, psychology of renal failure, life on dialysis, and technology including water treatment, safe cannulation, and equipment. It helps teach new dialysis technicians and nurses to be capable and compassionate care providers who understand what to do and why.

Handbook of Enumerative Combinatorics Oct 26 2019 Presenting the state of the art, the Handbook of Enumerative Combinatorics brings together the work of today's most prominent researchers. The contributors survey the methods of combinatorial enumeration along with the most frequent applications of these methods. This important new work is edited by Miklós Bóna of the University of Florida where he is a member of the Academy of Distinguished Teaching Scholars. He received his Ph.D. in mathematics at Massachusetts Institute of Technology in 1997. Miklós is the author of four books and more than 65 research articles, including the award-winning *Combinatorics of Permutations*. Miklós Bóna is an editor-in-chief for the *Electronic Journal of Combinatorics* and Series Editor of the *Discrete Mathematics and Its Applications* Series for CRC Press/Chapman and Hall. The first two chapters provide a comprehensive overview of the most frequently used methods in combinatorial enumeration, including algebraic, geometric, and analytic methods. These chapters survey generating functions, methods from linear algebra, partially ordered sets, polytopes, hyperplane arrangements, and matroids. Subsequent chapters illustrate applications of these methods for counting a wide array of objects. The

contributors for this book represent an international spectrum of researchers with strong histories of results. The chapters are organized so readers advance from the more general ones, namely enumeration methods, towards the more specialized ones. Topics include coverage of asymptotic normality in enumeration, planar maps, graph enumeration, Young tableaux, unimodality, log-concavity, real zeros, asymptotic normality, trees, generalized Catalan paths, computerized enumeration schemes, enumeration of various graph classes, words, tilings, pattern avoidance, computer algebra, and parking functions. This book will be beneficial to a wide audience. It will appeal to experts on the topic interested in learning more about the finer points, readers interested in a systematic and organized treatment of the topic, and novices who are new to the field.

Intersection Local Times, Loop Soups and Permanent Wick Powers Apr 24 2022 Several stochastic processes related to transient Lévy processes with potential densities ψ , that need not be symmetric nor bounded on the diagonal, are defined and studied. They are real valued processes on a space of measures endowed with a metric d . Sufficient conditions are obtained for the continuity of these processes on \mathcal{M} . The processes include α -fold self-intersection local times of transient Lévy processes and permanent chaoses, which are 'loop soup α -fold self-intersection local times' constructed from the loop soup of the Lévy process. Loop soups are also used to define permanent Wick powers, which generalizes standard Wick powers, a class of α -th order Gaussian chaoses. Dynkin type isomorphism theorems are obtained that relate the various processes. Poisson chaos processes are defined and permanent Wick powers are shown to have a Poisson chaos decomposition. Additional properties of Poisson chaos processes are studied and a martingale extension is obtained for many of the processes described above.

New Zealand Health System Review Apr 12 2021 The Health Systems in Transition (HiT) profiles are country-based reports that provide a detailed description of a health system and of reform and policy initiatives in progress or under development in a specific country. Each profile is produced by country experts in collaboration with an international editor. In order to facilitate comparisons between countries, the profiles are based on a common template used by the Asia Pacific and European Observatories on Health Systems and Policies. The template provides detailed guidelines and specific questions, definitions and examples needed to compile a profile.
