[Toward a Typology of European Languages](#) Apr 24 2022 The series is a platform for contributions of all kinds to this rapidly developing field. General problems are studied from the perspective of individual languages, language families, language groups, or language samples. Conclusions are the result of a deepened study of empirical data. Special emphasis is given to little-known languages, whose analysis may shed new light on long-standing problems in general linguistics.

*On a Global Mission: The Automobiles of General Motors International Volume 3* Dec 21 2021 Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification

tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

*NIE TYLKO FIAT* Sep 17 2021 Prezentowana książka jest pierwszą w historiografii próbą całościowego przedstawienia stosunków polsko-włoskich w latach 1945-1989. Na podstawie szeroko przeprowadzonej kwerendy źródłowej, obejmującej archiwalia polskie i włoskie, oraz najnowszej literatury przedmiotu Autorzy w przystępny sposób omawiają kulisy politycznych kontaktów między państwowych Polski i

Włoch, jak również wzajemne relacje gospodarcze, handlowe, kulturalne i naukowo-techniczne obu państw. Pokazują, że w powojennych relacjach Warszawy i Rzymu stosunkowo najtrudniejsze okazało się uzyskanie porozumienia w kwestiach politycznych, co w sposób oczywisty wynikało z ówczesnego podziału Europy i świata na bloki polityczno-militarne. Polityka zagraniczna niesuwerennej Polski była bowiem kontrolowana przez Moskwę, a polityka suwerennych Włoch często musiała się podporządkować strategii Waszyngtonu. W tych warunkach, gdy polsko-włoski dialog polityczny okazywał się jałowy, coraz większą rolę w kontaktach obu państw odgrywała współpraca kulturalna i naukowa, a zwłaszcza gospodarcza (czego najbardziej spektakularnym wyrazem była aktywność koncernu Fiata w Polsce). Maria Pasztor - prof. zw. w Instytucie Stosunków Międzynarodowych Uniwersytetu Warszawskiego, profesor wizytujący na Panthéon-Sorbonne (Paris I), stypendystka école des Hautes études en Sciences Sociales, L'Université Libre de Bruxelles, Sorbonne Nouvelle (Paris III), Sorbonne (Paris IV) oraz dwukrotnie Fundacji Lanckorońskich. W 2017 r. odznaczona prestiżowym francuskim Orderem Palm Akademickich. Autorka m.in.: *Polska w oczach francuskich kół rządowych w latach 1924-1939* (1999); *Między Paryżem, Warszawą i Moskwą. [Geely Drives Out: The Rise Of The New Chinese Automaker In The Global Landscape](#) Nov 07 2020 Since 2008, while the global automotive manufacturing has been faltering, the Chinese auto industry has been swiftly transformed into the largest producer in the world. The growth of the Chinese automakers is a close reflection of China's powerful manufacturing economy, and Geely Auto is one such best example. This book closely examines the rise of Geely as a privately-owned automaker in China. From its humble beginning as a refrigerator component maker and motorcycle manufacturer in the late twentieth century, Geely has grown to become not only a top selling national brand in China, the largest auto market in the world, but also a significant player in the global automotive industry. The book studies Geely's successful acquisition of Volvo, within a long-term framework of asset-seeking foreign direct investment, and then further investigates its recent strategic initiatives with Daimler, London Taxi, PROTON and Lotus. The book reveals how the little-known carmaker is worth close examination, via its product development, organizational dynamics, corporate culture, brand development, talent and cross-cultural management strategies, as well as the entrepreneurship of its visionary founder Shufu Li. From catching up in technology to a leader in product, service and business model innovations, Geely has driven out as a new Chinese automaker on the world stage. Facing challenges in clean energy and Internet of Things, artificial intelligence, new user's experience towards smart and mobility solution, Geely will continue to play an increasingly important role in the globalization age of the twenty-first century.

**China's Accession to the World Trade Organization** Nov 27 2019 With China's accession to the World Trade Organization imminent, this book brings together the expert views of scholars, policy-makers and business representatives on the consequences of this historic event. Insight into the past and future of China's relationship to the WTO is offered by authors involved on both sides of the negotiations on the

EU-China bilateral agreement of May 2000 and the on-going negotiations up to spring 2001. An analyst and representatives from four economic sectors (the automobile industry, telecommunications, insurance and banking) clash over their predictions for the future. Also presented is an investigation of the challenges for China's political, social and legal systems, and revealing prognoses are given for the implications for global trade and investment flows for the EU and Greater China, and for the modus operandi of the WTO itself. By shedding light on economic effects and social and legal implications, the book gives a comprehensive picture of potential challenges arising from China's entry to the WTO.

[Rainy Season](#) Sep 05 2020 Considered the best book ever written about Haiti, now updated with a New Introduction, "After the Earthquake," features first hand-reporting from Haiti weeks after the 2010 earthquake. Through a series of personal journeys, each interwoven with scenes from Haiti's extraordinary past, Amy Wilentz brings to life this turbulent and fascinating country. Opening with her arrival just days before the fall of Haiti's President-for-Life, Jean-Claude "Baby Doc" Duvalier, Wilentz captures a country electric with the expectation of change: markets that bustle by day explode with gunfire at night; outlaws control country roads; farmers struggle to survive in a barren land; and belief in voodoo and the spirits of the ancestors remains as strong as ever. The Rainy Season demystifies Haiti—a country and a people in cruel and capricious times. From the rebel priest Father Aristide and the street boys under his protection to the military strongmen who pass through the revolving door of power into the gleaming white presidential palace—and the buzzing international press corps members who jet in for a coup and leave the minute it's over—Wilentz's Haiti haunts the imagination.

**No Speed Limit** Jun 22 2019 During his sixty years as a motoring journalist, Stuart Bladon test drove almost every car on the road. Working for Autocar, and later as a freelance writer, he was granted access to some of the oddest vehicles off the road as well, including the three-wheeled Bond Minicar, in which he was very nearly killed. The best part of any car test, however, was finding out how fast they would go. In 1970, he set what was for a long time Autocar's fastest road test maximum speed, at 172mph. Going back to the days when the only speed limit was the 30mph restriction in built-up areas, each chapter of this book brings a motoring story of travel, testing and adventure. Since a fond aunt began teaching him to drive at the age of 7, Stuart Bladon has enjoyed a lifelong passion for cars. This book recounts the many motors and the colourful escapades of a life spent very near - if not over - the speed limit.

*365 Cars You Must Drive* Aug 17 2021 What began as a solution for transportation has evolved into a desire for speed, luxury, personal expression, and freedom. For many, the thrill of the drive has eclipsed the pure utility of the automobile. And the pursuit of that thrill is the driving force behind 365 Cars You Must Drive. From the Ford Model T to the Porsche Carrera GT, there are certain cars that any self-respecting auto enthusiast just has to know—and experience from the driver's seat. With homage to the greatest cars and good-natured mockery of the strangest, authors Matt Stone and John Matras detail which cars to drive and why, how to get behind the wheel, where to drive them, and who to invite along for the ride. Each entry contains a colorful spec box noting the car's claim to fame, a Did You Know? factoid, the author's clever suggestions for "The Perfect Passenger" and the "Soundtrack" coming out of the speakers, Behind the Wheel notes, and a "Perfect Drive" for the marque or model covered. Engine details, production information, the price when it debuted and the collectible price now - all of it adds up to at-a-glance fun reading to go with informative essays on each car, archival and full-color photos, and more.
