The Shaping of Indian Science: 1948-1981 Feb 24 2020 This is a compendium of the speeches of the Presidents of the Indian Science Congress Association (ISCA) from 1914-2003. Through the years, these Presidents have inspired the Congress by their speeches-some of them visionary, some impassioned in their plea for Science, but all of them with a message that Science must be used for the good of the human race.

Perspectives on contemporary printmaking Nov 22 2019 This anthology, the first of its kind, presents thirty-two texts on contemporary prints and printmaking written from the mid-1980s to the present by authors from across the world. The texts range from history and criticism to creative writing. More than a general survey, they provide a critical topography of artistic printmaking during the period. The book is directed at an audience of international stakeholders in the field of contemporary print, printmaking and printmedia, including art students, practising artists, museum curators, critics, educationalists, print publishers and print scholars. It expands debate in the field and will act as a starting point for further research.

Wastewater Treatment Sep 25 2022 Wastewater Treatment is another indispensable work from the author of Water Treatment. Both books are helpful tools for crisis identification and, most importantly, resolution. Tillman writes in a concise, well organized format - perfect for fast reference. This operator's guide presents basic troubleshooting and problem solving information for typical problems that can occur during the operation of processes used at municipal and industrial wastewater treatment plants. Common problems and the recommended operator responses are listed in tabular form for individual unit processes. Entry level operators will benefit greatly from the problems Tillman addresses, while experienced operators will appreciate it as a handy reference. The information compiled in this volume has been collected from various equipment manufacturers' operation and maintenance manuals, U.S. Environmental Protection Agency (EPA) technology transfer documents, the authors personal experience as a plant Operations and Maintenance manual writer, and his experience as a plant manager and operator. He includes only the most common wastewater treatment unit processes. He gives an overview of the treatment objective of the unit process, and then provides each with a troubleshooting table divided into Indicators/Observations: Possible Cause; Check or Monitor; Possible Solutions columns. Wastewater Treatment reads like the best of training manuals. Tillman's know-how, combined with his clarity, make this book required occupational reading. The brief, straightforward format and easy-to-read tables make the guide an accessible problem solving reference.

The Making of Anti-Sexist Men Jun 22 2022 The idea of the "anti-sexist man" is often treated with scorn by feminists and hesitantly by men. People are suspicious and unsure about the whole idea. Based around interviews with eight men who have responded positively to feminism, this book provides the reader with the first full length discussion of anti-sexist male attitudes. The interviewees tell their life stories, their 'making' and reveal their differences to male chauvinists. Timely and sincere, *The Making of Anti-Sexist Men* will appeal to all those interested in changing oppressive gender attitudes and social structures.

Florence Nightingale on Health in India May 09 2021 Florence Nightingale is famous as the "lady with the lamp" in the Crimean War, 1854-56. There is a massive amount of literature on this work, but, as editor Lynn McDonald shows, it is often erroneous, and films and press reporting on it have been even less accurate. The Crimean War reports on Nightingale's correspondence from the war hospitals and on the staggering amount of work she did post-war to ensure that the appalling death rate from disease (higher than that from bullets) did not recur. This volume contains much on Nightingale's efforts to achieve real reforms. He.

Urban Terrorism May 21 2022 Outrageous myths have been created and perpetrated about terrorism in general and terrorism by Muslims in particular. There are two reasons for it. One is, of course, genuine ignorance about things

Islamic. The other reason is more sinister. Myths are created and perpetuated because that keeps everyone in business. By spinning yarns about the most horrible things the terrorists are capable of doing, the media ensures that they have a never-ending supply of sensational material with which to keep the people hooked it also enables the intelligence agencies and security forces to appear more relevant and expand their turf in the process. The myths must be busted because they tend to settle deep in the collective subconscious and ultimately come to influence policy decisions. The media, for example, would have you believe that we have not been able to eradicate terrorism only because we do not have enough commandos everywhere! The fact is that terrorism would not be finished by killing a few terrorists. Bomb blasts continue to take place in spite of the arrests of the masterminds . As long as we do not address the root cause, there would be many more willing to kill and get killed. Victory against terrorism can be achieved only if you have completely understood the fundamental reasons of terrorism, the motivation of the terrorists, the intrinsic weaknesses of the targets, the innate strength of the way of the terrorist , and the follies of the approach that you have persisted with so far. If a nation has floundered in its war against terrorism , it is because it has never had a serious and honest-to-God analysis of terrorism. Hence this book. Exhaustive yet attractive, informative yet interesting and above all, extremely hard-hitting it is the ultimate encyclopedia of terrorism.
