Microdevices' 2006 report on flat panel display (FPD) industry includes: -Exclusive in-depth interviews with 28 top executives in the industry -Over 250 information-packed

Downloaded from diy-compressors.com on December 2, 2022 by guest

figures, tables and pictures -
Proprietary intelligence not
available anywhere else In
2006, competitive conditions in
the flat panel display (FPD)
industry will change
significantly. The era in which
competition was primarily
based on increasing investment
and glass substrate sizes is
over. Henceforth, overall
capability, including
parts/material strategy and

equipment strategy, will
become the decisive factor. By
2010, parts and material costs
will account for 80% of the
total cost of large-size LCD
panels, which will drive future
market expansions; thus, parts
and materials will make up
most of the value addition in
panels. Leading panel makers
are starting to reinforce their
cooperative relationships with

parts and material makers, as
well as with equipment makers.
