No One Would Listen Aug 29 2019 Harry Markopolos and his team of financial sleuths discuss first-hand how they cracked the Madoff Ponzi scheme No One Would Listen is the thrilling story of how the Harry Markopolos, a little-known number cruncher from a Boston equity derivatives firm, and his investigative team uncovered Bernie Madoff's scam years before it made headlines, and how they desperately tried to warn the government, the industry, and the financial press. Page by page Markopolos details his pursuit of the greatest financial criminal in history, and reveals the massive fraud, governmental incompetence, and criminal collusion that changed thousands of lives forever-as well as the world's financial system. The only book to tell the story of Madoff's scam and the SEC's failings by those who were first hand Describes how Madoff was enabled by investors and fiduciaries alike Discusses how the SEC missed the red flags raised by Markopolos Despite repeated written and verbal warnings to the SEC by Harry Markopolos, Bernie Madoff was allowed to continue his operations. No One Would Listen paints a vivid portrait of Markopolos and his determined team of financial sleuths, and what impact Madoff's scam will have on financial markets and regulation for decades to come.
New Business Models and Value Creation: A Service Science Perspective 2022 The contemporary economic landscape features the prevalence of the service sector in economic systems, the pervasive servitisation of manufacturing, innovations in traditional business models and new value creation models, thanks to the possibilities offered by the web, ICT and other enabling technologies. In this evolving context, this book provides qualified contributions on the topic of service science from a managerial perspective. A multidisciplinary perspective is adopted, dealing with both the structural-technological and dynamic-relational aspects of managerial complexity. In addressing the contribution that service science can make to business value creation, this book covers relevant issues such as product servitisation, business modelling, value cocreation with customers, performance measures and the role of ICT. It also presents some innovative experiences of management in service organisations operating in the environmental, energy and health-care sectors. This book aims to enhance the value of the results of research intertwined with the development of a new training curriculum started four years ago at the Scuola Superiore Sant'Anna of Pisa (Italy) with the evolution of the "Master in Management Innovation" into the new "Master in Management, Innovation and Service Engineering" (MAINS).

Travels of Marco Polo Dec 26 2021 His journey through the East began in 1271—when, still a teenager, he set out of Venice and found himself traversing the most remote countries. His acceptance into the court of the great emperor Kublai Khan, and his service to the vast and dazzling Mongol empire, led him to places as far away as Burma, lands rich with gems and gold and silk, but virtually unknown to Europeans. Later, as a prisoner of war, Marco Polo would record the details of his remarkable travels across harsh deserts, great mountain ranges, and dangerous seas, as well as of his encounters with beasts and birds, plants and people. His chronicle is both fascinating and awe-inspiring—and still serves as the most vivid depiction of the mysterious East in the Middle Ages. Edited and with an Introduction by Milton Rugoff and an Afterword by Howard Mittelmark

Web Services: Concepts, Methodologies, Tools, and Applications Jan 05 2020 Web service technologies are redefining the way that large and small companies are doing business and exchanging information. Due to the critical need for furthering automation, engagement, and efficiency, systems and workflows are becoming increasingly more web-based. Web Services: Concepts, Methodologies, Tools, and Applications is an innovative reference source that examines relevant theoretical frameworks, current practice guidelines, industry standards and standardization, and the latest empirical research findings in web services. Highlighting a range of topics such as cloud computing, quality of service, and semantic web, this multi-volume book is designed for computer engineers, IT specialists, software designers, professional researchers, and upper-level students interested in web services architecture, frameworks, and security.
North American Marine Highways May 07 2020 "This report presents an evaluation of the potential for moving intermodal containers on chassis, non-containerized trailers, or rail cars on marine highways in North America. The report is especially valuable for its assessment of the conditions for feasibility; its analysis of the economic, technical, regulatory, and logistical barriers inhibiting greater use of the marine highway system; and proposed solutions for barrier elimination. This report will enable public and private stakeholders to better understand the underlying reasons for the current underutilization of the marine highway system. This marine highway system (often referred to as short sea shipping) includes navigable rivers, lakes, canals, seaways, and coastal waterways. Currently, less than 4% of the domestic freight moves by water."-Pub. desc.
Six Chukkers of Low Apr 29 2022 It is no secret that consumers are afraid of the used vehicle buying process. In recent years there have been television programs exposing the rampant deception and fraud perpetrated on an unsuspecting public. A recent article from the Associated Press announced "Car Sales Hassles Top Complaint List". This "honor" is well deserved. In the fast-paced world we live in today, no one has the time to spend trekking to the service department to deal with a vehicle problem. It robs you of part of your day and, in some cases, your income. Information is power. I believe that armed with the proper information, the average consumer can tilt the odds in their favor. An educated consumer is the best defense against a shady dealer. I will provide you with the tools to make an educated purchase.

Manufacturing in the New Urban Economy 12 2020 In large cities in developed countries, the share of manufacturing has declined drastically in the last decade
and the share of service has grown as many manufacturing firms have closed or moved to lower-cost locations. The process of deindustrialization is often seen
the inevitable shift towards a knowledge based economy and urban economies come to rely on research and development, financial services, tourism and the cr
industries. This book looks at the changing link between manufacturing and knowledge-based activities in urban regions. The authors develop a new framework
drawing on insights from organization studies and regional economic literature looking at various international case studies in Western and Eastern Europe, South
America and Asia.

Press Freedom and Pluralism in Europe 17 2021 How free are the media in Europe? Freedom of the press and an independent media system are often taken for
granted and all of the EU-member states today have implemented guarantees of press freedom in their constitutions and judicial systems. In Press Freedom and
Pluralism in Europe, researchers from twelve countries examine media systems regarding conditions for independence and pluralism. They discuss a European
approach to press freedom and diversity and include case studies of a broad spectrum of media systems including Bulgaria, the Baltics, Poland, Romania, Finland
France, Germany, Aust.

Handbook of Evidence-Based Therapies for Children and Adolescents 2020 The comprehensive coverage in this hugely important and timely handbook makes it
invaluable to clinical child, school, and counseling psychologists; clinical social workers; and child psychiatrists. As a textbook for advanced clinical and counseling
psychology programs, and a solid reference for the researcher in child/adolescent mental health, its emphasis on flexibility and attention to emerging issues will
readers meet ongoing challenges, as well as advance the field. Its relevance cannot be overstated, as growing numbers of young people have mental health prob
requiring intervention, and current policy initiatives identify evidence-based therapies as the most effective and relevant forms of treatment.

Marco Polo Apr 05 2020 In September 1298, the rival Italian republics of Genoa and Venice fought a fierce sea battle at Curzola off the rocky coast of southern Dalmatia. Against the odds the Venetians, led by Admiral Andrea Dandolo, son of the Doge, were defeated. Among the thousands of Venetians captives was one Marco Polo, gentleman, merchant of Venice, and sometime traveller to East Asia. Incarcerated in a Ligurian fastness, he told his story to a fellow-prisoner, a writer of fiction named Rustichello of Pisa. The account of his travels that Marco Polo dictated to Rustichello in captivity - *Il Milione* - would be exceptionally widely read and would stimulate European interest in the East and its riches. **Marco Polo: from Venice to Xanadu** is Laurence Bergreen's thrilling and masterly reconstruction of the life and wanderings of one of the great adventurers of world history. Between 1271 and 1275 Marco Polo accompanied his father Niccolò and uncle Maffeo on a journey from Acre into central Asia along the Silk Route, eventually reaching China and the court of the Great Khan of the Mongol Empire, Kublai Khan. Entering the service of the Khan, he travelled extensively in the Mongol Empire. The three Venetians returned home by sea in 1292-5, calling at Sumatra and southern India before reaching Persia, and making the last part of their journey to Venice overland. Three years later came that fateful encounter with the Genoese fleet in the Adriatic...

Mental Health Services: A Public Health Perspective Mar 29 2022 This revised and expanded third edition text utilizes a public health framework and the latest epidemiological, treatment, and service systems research to promote a comprehensive understanding of the organization, financing, and delivery of mental health substance abuse services in the United States. Written by national experts in the field, this timely work will provide policymakers, administrators, clinicians, and health and behavioral health graduate students with the knowledge base needed to manage and transform mental health service systems, both nationally and locally. The book is unique in providing a public health framework of the most significant issues facing mental health policy makers, administrators, planners, and practitioners. It combines issues (e.g., evaluation; law; ethnicity) that extend across different age groups, treatment settings, and disorders, with issues that are population and disorder specific. The publication of this book is timely for those involved with the debate over national health care reform legislation, and provides important and timely information (on populations at-risk for mental disorders, services, and systems issues) for those responsible for implementing policies and programs resulting from reform effort.

The Accident Aug 22 2021 Six Chukkers of Love is more than Clark Hetherington's autobiography. It is a first-hand account of the history of polo in the United States post World War II. Clark knew all of the movers and shakers, great players and sundry characters that were responsible for polo's growth and development. His book is filled with wonderful stories of these individuals and their enthusiasm for the sport. These pages portray not only his love of polo and his important role in its growth, but also the influential roles played by each of many other individuals. At the National Museum of Polo and Hall of Fame part of our mission is to preserve, record, and archive the history and tradition of polo. Much of what Clark has written in these pages are anecdotes of personal experiences no where else previously documented. Anecdotes and stories convey what all of us who live the sport know to be the true flavor of its tradition. Our heartfelt gratitude goes out to the author for preserving this history. **Six Chukkers of Love** is another chapter in Clark Hetherington's dedicated service to the sport of polo. In 2004, the National Museum of Polo and Hall of Fame recognized his lifetime contributions with the Iglehart Award. Some of these contributions are briefly outlined on the plaque in his honor at the Museum as follows: Clark spent a lifetime dedicated to polo. An avid player since age 7. He later captained the Oklahoma University team. He started Broad Acres Polo Club in 1954 and served four years as USPA circuit governor. At his own expense, he produced educational films such as *Charlie Chukker* and an umpire training presentation. Clark has been called by many, "The father of professional umpiring". He tirelessly promoted a uniform standard for all umpires to the USPA and to clubs around the country. After his appointment as USPA chief umpire, he developed umpire training programs and conducted numerous clinics across the nation, furnishing horses and equipment.
