The Business of Social and Environmental Innovation Jun 27 2019 In the face of limited progress toward meeting Millennium Development Goals or addressing climate change and resource degradation, increasing attention turns to harnessing the entrepreneurial, innovative, managerial and financial capacities of business for improved social and environmental outcomes. A more proactive role for business in sustainable development is especially pertinent in sub-Saharan Africa, which has been plagued by conflict and poverty but shows signs of a brighter future as the world's second-fastest-growing region. The book considers how the socio-economic context influences the objectives of social innovation and even our definition of what we mean by social innovation. Secondly, the book aims to show how social innovation initiatives emerge and fare in context of the limited ability of many African countries to provide public goods and services.

Flash Point Oct 04 2022 In this first book of Steele Ridge's exciting new series, *The Blackwells*, USA Today bestselling author Tracey Devlyn plunges readers into the dangerous world of asset recovery with this one-night stand, frenemies to lovers story between a burned out recovery agent and a single mom who leads the FBI's art crime cases. A treasure hunter thought he had everything in his life firmly in hand until a chance encounter with a mysterious redhead tests the limits of his self-control. When FBI Special Agent Olivia Westcott's boss hands over her next assignment, she has an opportunity to retrieve a priceless artifact and shut down a high-profile drug scheme in one fell swoop. All Liv has to do is work with the lead recovery agent of Blackwell Asset Recovery Services—with whom she'd had a passionate one-night stand two weeks prior—and not let her feelings compromise the case. Zeke Blackwell still struggles with running the family business after his older brother unexpectedly left him in charge. Now he has the added responsibility of keeping drugs off the streets of small towns across Western North Carolina and keeping his hands off the too-enticing special agent while they're planning the joint operation. As if that's not enough to keep him up at night, he's also searching for a centuries-old treasure that could change the course of his and his family's lives. But what starts as a high-value asset recovery spirals out of control when their enemies force Liv and Zeke to stay one step ahead of danger. Is their attraction worth the risk? Or will they find themselves playing a game too dangerous to survive? The Baroque World of Fernando Botero Aug 29 2019 Colombian-born Fernando Botero (b. 1932) is a painter, sculptor, and draftsman renowned for his extravagantly rounded figures combining the polish and excess of Spanish colonial baroque with the social realism of the Mexican muralists. Their humorous exaggeration belies the more serious content of Botero's work—commentary on colonialism, political instability in Latin America, and the vernacular artistic traditions of the region, as well as European art history. Accompanying the artist's first American retrospective in over thirty years, *The Baroque World of Fernando Botero* is the most extensive study of his life and work to date. Drawn exclusively from Botero's private collection, the 100 works featured in this book, including previously unpublished paintings and drawings, represent the full scope of his oeuvre from a uniquely personal perspective. Many of these—portraits of friends and family members and remembered scenes—have remained in the artist's possession since their creation, while others he has bought back over the years as markers of significant developments in his career. Three essays examine the artist's creative life, from the aesthetic

environment in which Botero developed his unique style to his catalyzing influence on the Colombian art world of the 1960s and 70s.

Social Innovation and Social Enterprises Mar 05 2020 This book provides an exhaustive, critical analysis of the challenges and opportunities associated with social enterprises and social innovation. More specifically, it addresses questions such as: What is a social innovation? Which are the best theories that explain how social innovations are generated and propagated in the global society? What is a social enterprise? Which are the theoretical perspectives that best describe the functioning of Social Enterprises, the threats and opportunities? How do social enterprises deal with the profit and non profit worlds and how these interactions affect their capability to be social innovators? The most recent literature has focused on strategies integrating conflicting logic, organizational practices or processes. In all these cases, the hybrid nature of the organization is implemented and sustained through original business models, new organizational arrangements and governance and novel strategies. We believe that the hybrid and institutional perspectives are just one of the many theoretical lenses that can be used to frame social innovation and social enterprises. Along this line, some have highlighted the inherent ethical nature of these phenomena, the critical role played by ethical values whose advancement go well beyond what expected by the corporate social responsibility, business ethics and institutional theorizing. This book follows these perspectives exploring the link between social innovation and social enterprises, presenting them as a new a new possible field of research that support new ways to understand and theorize individual, organizational and community behaviors.

Learning One's Native Tongue Dec 14 2020 "Tracy Strong explores the development of the concept of American citizenship and of what it means to belong to this country, beginning with the Puritans in the 17th century and continuing to the present day. He examines in detail the conflicts over what citizenship means as reflected in the writings and speeches of America's leading thinkers and leaders ranging from John Winthrop and Roger Williams, to Thomas Jefferson, Nathaniel Hawthorne, Abraham Lincoln, Frederick Douglass, and Franklin Roosevelt, among others who have participated in our cultural and political debates. We see how the requirements and demands of citizenship have been discussed and better understand how groups are defined into and out of the American nation"--

Willem de Kooning Nonstop Jul 29 2019 This image-rich essay offers a radical rethinking of the ab-ex painter Willem de Kooning by one of the greatest American art critics. Many have written about de Kooning's startling canvases of monstrous women, but none have approached them this way. In prose as energetic as her subject, Rosalind Krauss demonstrates how de Kooning could never stop reworking the same subject. Deploying one telling image after another, she shows that, from the early days of his career, de Kooning nearly always (1) worked with a tripartite vertical structure, (2) projected his own figure and point of view as the (male) artist into the painting, and (3) was compelled to produce the female figure, legs splayed obscenely or knees projected into the viewer's space in practically everything he made. Hidden in plain sight even in paintings of highways, boats, and landscapes, Woman is always there. How could we have missed this?"

Loving Deep Jul 21 2021 A rough-around-the-edges country boy falls for the one woman who could make his dream...or break his heart. Britt Steele is fiercely protective of what he loves. Even if it means putting his own ambitions aside. He's worked too hard keeping a red wolf pack from extinction to let some city girl auction off their sanctuary. But Randi is no pushover. He's watched—and wanted—her from behind a whiskey glass for months. She's determined, much too tempting, and quickly turning Britt's attempts at persuasion into seduction. And he'll need every weapon in the Steele arsenal to change her mind. Miranda Shepherd's bar is her passion, but money's flowing out faster than she can pour a drink. To save her business, Randi must sell her family's land to the highest bidder. One man stands in her way: ruggedly sexy Britt Steele. The definition of strong and silent, Britt's gruff exterior hides a raw vulnerability she's aching to explore. Yet Randi knows all about sacrificing for your dreams—and isn't willing to give up on hers so easily. Still, Britt's heated caresses are all too convincing. Some offers are too good to be true. When the buyer's real motive surfaces, Randi and Britt join forces against a ruthless hunter. But protecting the wolves leaves them fighting for their own lives...and their new love. Reconstructing Obesity May 07 2020 In the crowded and busy arena of obesity and fat studies, there is a lack of attention to the lived experiences of people, how and why they eat what they do, and how people in cross-cultural settings understand risk, health, and bodies. This volume addresses the lacuna by drawing on ethnographic methods and analytical emic explorations in order to consider the impact of cultural difference, embodiment, and local knowledge on understanding obesity. It is through this reconstruction of how obesity and fatness are studied and understood that a new discussion will be introduced and a new set of analytical explorations about obesity research and the effectiveness of obesity interventions will be established.

The Vertical City Oct 12 2020 Each century has its own unique approach toward addressing the problem of high density and the 21st century is no exception. As cities try to cope with rapid population growth - adding 2.5 billion dwellers by 2050 - and grapple with destructive sprawl, politicians, planners and architects have become increasingly interested in the vertical city paradigm. Unfortunately, cities all over the world are grossly unprepared for integrating tall buildings, as these buildings may aggravate multidimensional sustainability challenges resulting in a "vertical sprawl" that could have worse consequences than "horizontal" sprawl. By using extensive data and numerous illustrations this book provides a comprehensive guide to the successful and sustainable integration of tall buildings into cities. A new crop of skyscrapers that employ passive design strategies, green technologies, energy-saving systems and innovative renewable energy offers significant architectural improvements. At the urban scale, the book argues that planners must integrate tall buildings with efficient mass transit, walkable neighbourhoods, cycling networks, vibrant mixed-use activities, iconic transit stations, attractive plazas, well-landscaped streets, spacious parks and engaging public art. Particularly, it proposes the Tall Building and Transit Oriented Development (TB-TOD) model as one of the sustainable options for large cities going forward. Building on the work of leaders in the fields of ecological and sustainable design, this book will open readers' eyes to a wider range of possibilities for utilizing green, resilient, smart, and sustainable features in architecture and urban planning projects. The 20 chapters offer comprehensive reading for all those interested in the planning, design, and construction of sustainable cities.
