Runways & Racers May 29 2020 Runways and Racers concentrates on the short transitional period, 1952-1954, for sports car racing in

America following the ban on public road racing in many of the States. The ban left the rapidly expanding Sports Car Club of America with a problem: where to hold races. At precisely the same time, Curtis LeMay, head of Strategic Air Command, was having problems obtaining funds from Congress to improve conditions on the many air bases located around the country. The solution was a marriage of convenience, whereby the SCCA was allowed access to active SAC air bases

to hold its race programmes. In return, the SAC base would receive the net profits from the event, which would be put into the Airmen's Living Improvement Fund. As a result of some initial financial success for the SAC bases, the scheme was also adopted by non-SAC bases together with regional clubs, with the same agreement in place. Complaints from airmen alerted Congressman Errett Scrivner to potential irregularities, and he ordered an audit to be conducted to ascertain

precisely what it was costing the air bases to host the races. His findings led to the cessation of the races, ordered by Congress. The product of a long period of extensive research by the author, this book gives a fascinating insight into this two-year period, complemented by over 150 period pictures, many previously unpublished.

Ferrari 333 SP Nov 22 2019 This book details the origin and racing history of the Ferrari 333 SP. Uniquely, none of the 333 SP models were entered into races by Ferrari itself. The

cars were built specifically for customer use; a purchase price of \$900,000 included two spare engines and race technical support supplied by Ferrari engineers. A total of 40 cars were built; the first four by Ferrari, the remainder manufactured by Dallara & Michellotto using Ferrari engines. All of the cars were sold to, and race entries made by, privateer teams. From 1994, the cars contested the IMSA World Sports Car Championship, the United States Road Racing Championship, and the American Le Mans Series, at circuits throughout North America. In 1997, the cars also featured in the Europe-based

International Sports Racing Series, as well as the 24 Hours of Le Mans. Two years later, the Doran-Lista team installed a Judd V10 engine into its 333 SP, with the aim of increasing power and improving fuel efficiency. In all, from the 126 races entered, 47 victories were claimed by the 333 SP. *Alpine Renault* Apr 08 2021 The beautiful design of the Alpine Renault 'berlinettes' and their extraordinary performances in competition made them the cars to beat in the late 1960s and early 1970s. This book brings to life the efforts, successes and failures of the engineers and drivers that worked with the cars, and explores the berlinettes'

Mercedes-Benz SL W113

Series Aug 12 2021 The W113 isn't just a visual treat; its combination of superb original design, peerless engineering and build quality has ensured that many of these cars can still be seen in regular use today, with reliability and practicality adding to the desirability of the series. Covering the SL's ever-changing specification, its competition record, and its presence in many of the world's major markets is a huge task, but it's all presented here in definitive detail, along with stunning contemporary photography, in a volume that will readily grace any reference library shelf or connoisseur's

coffee table.

Amedee Gordini Mar 27 2020

This is a story of excitement, laughs, astonishment and anger - a story of the determination of a man with a dream and a passion for motor racing in the big leagues. It is the first time that the history of the always under-financed Gordini racing team has been documented in English, and the first complete story of Gordini himself in any language. This volume will appeal to new enthusiasts and old hands of Formula 1 and sports prototype racing, especially those who have owned a Gordini-badged high-performance Renault road car. It charts Gordini's early life and beginnings in

motorsport, up to 1969 when Renault took over the Gordini company, keeping his name on all the racing engines until 1986, before finally resurrecting it for a performance version of the Renault Twingo and Clio in 2009. The book is packed with evocative period images from important collections, supplementary transcripts in English from many contemporary interviews, plus recollections from former employees remembering their time working with Gordini, and an exhaustive set of statistics. All the way it's a roller coaster of joy, despair, humour, and stunning images. The racing legend of 'Le Sorcier' lives on.

Mercedes-Benz

Mar 07 2021 It's hard to believe, but the

W129-series Mercedes-Benz SL was launched over 20 years ago. However, its timeless styling has kept it fresh and attractive in the eyes of a new generation of enthusiasts, as well as those returning to the car having owned one when they were still in the dealerships. A combination of superb original design and peerless engineering and build quality adds to the desirability of this series of classic German machines, and has ensured that many of these cars can still be seen in regular use today. The British at Indianapolis Nov 03 2020 The British at Indianapolis recounts the history of the Indianapolis 500 race through the eyes and actions of those British born or British citizens who have driven in it, or been involved in any other way - be it as a designer, mechanic, or official. It also examines the British built cars that have won the

Indy 500 and the significance of the rear engined revolution brought to the Indianapolis Motor Speedway by Cooper in 1961, and elevated to success by Lotus and Lola. It includes such names as Jim Clark, Graham Hill, Nigel Mansell and 2010 Indy 500 champion, and two times winner, Dario Franchitti.

Fiat & Abarth 500 & 600 May 09 2021 Available again after a long absence! Always big on character and charm, Fiat's little cars played an important international roll in providing affordable and practical private transport for millions who had previously thought their dream impossible. With particular emphasis on the now classic

600 and Nuova 500 cars, this book tells the full story of these 'baby' Fiats. Built, and exported to, many countries outside of the marque's native Italy, over 6.5 million Topolinos, 600s and Nuova 500s were sold, and an amazing number survive to this today. Also covered are the wonderful models built on these cars' tiny chassis by Italy's leading coachbuilders, and the motorsport success achieved by the Abarth versions of the little cars that everybody loves.
