Persons In Little Rock Jul 23 2022 On June 1, 1999, at 2350:44 central daylight time, American Airlines flight 1420, a McDonnell Douglas DC-9-82, crashed after it overran the end of runway 4R during landing at Little Rock National Airport in Little Rock, Arkansas. The flight originated from Dallas/Fort Worth International Airport, Texas. There were 145 persons on board. The airplane was destroyed by impact forces and a postcrash fire. The captain and 10 passengers were killed; 120 crewmembers and passengers received serious or minor injuries; and 24 passengers were not injured. The National Transportation Safety Board determines that the probable causes were the flight crew's failure to discontinue the approach when severe thunderstorms.

The SGML Implementation Guide Feb 18 2022 Foreword----- SGML is misunderstood and underestimated. I have always wanted to write this book. I am pleased that two people with whom I have had the pleasure to work were finally able to do so. Since I have always been a bit of an evangelist, I feel pride when my "students" become recognized "teachers". In the early years of SGML we struggled to define a language that would bring the information to its rightful place. We succeeded. Then

we had to explain these idea to technical adoptors. Again, I think we have succeeded. We have learned much about SGML in the process of implementing it. These experiences must now also be shared, along with comprehensible information on the lan guage itself. The word must move out of the lab and the computer center and reach the business people, the users, the movers and shakers. The next generation will do things with SGML that we can't even imagine yet- it is that versatile.

Air Crash Investigations: Disaster in the Everglades the Crash of ValuJet Airlines Flight 592 Jun 22 2022
On May 11, 1996, at 1413:42 eastern daylight time, a Douglas DC-9-32 crashed into the Everglades about 10 minutes after takeoff from Miami International Airport, Miami, Florida. The airplane was being operated by ValuJet Airlines, Inc., as flight 592 and was on its way to Atlanta, Georgia. Both pilots, the three flight attendants, and all 105 passengers were killed. The National Transportation Safety Board determined that the probable cause of the accident, was a fire in the airplane's cargo compartment that was initiated by the actuation of one or more oxygen generators being improperly carried as cargo.

The Airliner Cabin Environment and the Health of Passengers and Crew Jul 19 2019 Although poor air quality is probably not the hazard that is foremost in peoples' minds as they board planes, it has been a concern for years. Passengers have complained about dry eyes, sore throat, dizziness, headaches, and other symptoms. Flight attendants have repeatedly raised questions about the safety of the air that they breathe. The Airliner Cabin Environment and the Health of Passengers and Crew examines in detail the aircraft environmental control systems, the sources of chemical and biological contaminants in aircraft cabins, and the toxicity and health effects associated with these contaminants. The book provides some recommendations for potential approaches for improving cabin air quality and a surveillance and research program.
